Partners

3GPP produces Technical Specifications, to be transposed by seven Standardization Bodies (Organizational Partners) into their appropriate deliverables (e.g., standards).

The 3GPP Organizational Partners – from Asia, Europe and North America – determine the general policy and strategy of 3GPP and perform the following tasks:

- Approval and maintenance of the 3GPP scope
- Maintenance of the Partnership Project Description
- Taking decisions on the creation or cessation of Technical Specification Groups, and approving their scope and terms of reference
- Approval of Organizational Partner funding requirements
- Allocation of human and financial resources provided by the Organizational Partners to the Project Co-ordination Group
- Acting as a body of appeal on procedural matters referred to them

The Organizational Partners and Market Representation Partners (MRPs) jointly perform the following tasks:

- Maintenance of the Partnership Project Agreement;
- Approval of applications for 3GPP partnership;
- Taking decisions relating to the dissolution of 3GPP.

The 3GPP Technical Specif　　　　　(　)　　Technical Reports (TR) have, in themselves, no legal standing. They only become "official" when transposed into corresponding publications of the Organizational Partner (or the national / regional standards body acting as publisher for the Partner).

Once a Release is frozen (see definition in TR 21.900), 3GPP specifications are officially transposed and published by the Organizational Partners, as a part of their standards series.

Market Representation Partners

The 3GPP Organizational Partners may invite a Market Representation Partner to take part in 3GPP, which:

- Has the ability to offer market advice to 3GPP and to bring into 3GPP a consensus view of market requirements (e.g., services, features and functionality) falling within the 3GPP scope
- Does not have the capability and authority to define, publish and set standards within the 3GPP scope, nationally or regionally
- Has committed itself to all or part of the 3GPP scope
- Has signed the Partnership Project Agreement

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.

fastcase®
Smarter legal research.
