# Craig Rosenberg, Ph.D.

www.ui.expert
craig@ui.expert
206-451-0706

Dr. Rosenberg has worked on many high-profile cases and advanced engineering projects for a wide range of Fortune 500 companies, including Google, Samsung, Amazon, Boeing, IBM, Disney, Uber, Lyft, Nintendo, Dell, AT&T, Zillow, Motorola, Ericsson, LG, Sony, HTC, Maxell, Huawei, Mattel, United States Army, United States Air Force, Federal Aviation Administration, and many others.

Dr. Rosenberg has been retained as an expert witness approximately 110 times for both plaintiff and defense, assisting clients in intellectual property and trade secret cases in the areas of user interface, software design and architecture, and human factors for mobile, web, desktop, embedded, and server environments.

Dr. Rosenberg has testified at trial eight times in both State and Federal courts, worked on 19 IPR cases, and 5 ITC cases, and has testified at 45 depositions as well as before the USPTO.

Dr. Rosenberg is an accomplished software architect, software engineer, user interface designer, human factors and systems engineer with extensive expert witness experience specializing in software and user interface design as well as human factors issues for mobile, web, desktop, server, and embedded software.

Dr. Rosenberg specializes in software engineering, user-centered design, information architecture, user experience, systems engineering, GPS, object-oriented analysis, complex systems, and modeling and simulation. He has extensive experience in the entire software design and development life cycle applied to a wide range of domains, from mobile devices to enterprise-class mission-critical applications.

He has published 21 research papers in professional journals and proceedings relating to user interface design, computer graphics, and the design of spatial, stereographic, and auditory displays.

His company, Global Technica, has been a preferred engineering supplier to Boeing since 1997 designing, analyzing, and implementing numerous projects in the areas of Air Traffic Control, Missile Defense Systems, Army Communications, Unmanned Aerial Vehicles, Modelling and Simulation, Command and Control, and Cyber and Homeland Security Applications.

Dr. Rosenberg is a software architect and developer with the C, C++, C#, and Java languages.

Dr. Rosenberg designed the first two-way pager for AT&T in 1995 and 1996. This high-profile project involved designing the features, user interface, and user interaction design and specification, as well as all graphical design standards.

He is the founder and CEO of a Seattle technology company focusing on location tracking applications for GPS-enabled smartphones. He is the inventor, designer, and author of several GPS mobile application software products for iPhone and Android devices.

He is a co-founder of two medical technology companies, Healium and StratoScientific. Healium brought patient's electronic medical records into augmented reality for emergency room physicians. StratoScientific developed a smartphone stethoscope and advanced software applications for use in telemedicine.

He was the Chief Technology Officer of DataPrism, which produced an object-oriented application platform for authoring and deploying rich networked solutions running in web browsers on mobile devices. DataPrism focused on virtualizing computing to allow applications to run in web browsers.

He was the entrepreneur in residence for a Los Angeles based venture capital company focusing on investments in mobile technology companies and entertainment media companies.

He designed a complete VoIP home and office portable phone system for the consumer and business market that included a wide set of features such as Microsoft Outlook integration, photo and video capability, web browsing, internet radio, file browsing, and file sharing.

He designed and developed interactive multimedia games as well as educational software for children and adults and was responsible for functional specification, software design and architecture, user interface design, application prototyping, software development, focus group testing and internet research.

While working on his Ph.D., he developed one of the very first virtual musical instruments that utilized multiple six-dimensional spatial trackers to create and record electronic music.

He developed a suite of device drivers to interface high-end spatial tracking systems made by Polhemus and Ascension with computing systems made by Silicon Graphics, DEC, NEXT, Apple Macintosh, and IBM PCs.

Dr. Rosenberg was the lead human factors engineer for Eyematic Corporation, designing advanced facial tracking and facial recognition software for the entertainment and homeland security markets.

He was the sole recipient of a $10,000 scholarship award from I/ITSEC for advancing the field of interactive computer graphics for flight simulation.

He received a prestigious award from the Link Foundation for his work furthering the field of flight simulation and virtual interface design.

He created five book covers for books by Harcourt Brace Publishing that feature the authors Arthur C. Clarke, Isaac Asimov, and Stephen King. His computer graphics animations appear in the movie *Beyond the Mind's Eye* produced by MIRAMAR.

Dr. Rosenberg is a member of ACM, IEEE, and the Human Factors Society and has taught Human Factors and User Interface Design at the University of Washington.

EDUCATION

1994	Ph.D. Human Factors	University of Washington	Graduate GPA: 3.83
1990	M.S. Human Factors	University of Washington	
1988	B.S. Industrial Engineering	University of Washington	

SELECTED LAW FIRMS

Agentis Law	Farney Daniels	Kasowitz	Polsinelli
Alston & Bird	Fish & Richardson	King and Spalding	Pomerantz
Baker Botts	Frier Levitt	King and Wood	Quinn Emanuel
Berg & Androphy	Gibson Dunn	Klein, O'Neil & Singh	Riezman Berger
Bryan Cave	Gordon Tilden	Knobbe Martens	Ropes and Gray
Bunsow de Mory	Gowlings	Magstone Law	Shutts and Bowen
CKR Law	Greenberg Traurig	Mayer Brown	Stern Kessler
Covington & Burling	Hagens Berman	McDermott and Will	Susman Godfrey
Davis Wright	HammerSchmidt	McKool Smith	Sutton McAughan
Dentons	Broughton	McNaul Ebel	Tonkon Torp
Dunlap Codding	Hanson Bridgett	Meyers Roman	VB Attorneys
Ebbinghouse	Hart Wagner	Morrison Foerster	Williams McCarthy
Farbstein & Blackman	Hinkle	Norton Rose Fullbright	Wolf Greenfield
Farella Braun Martel	Holland & Hart	Orrick	
Finnegan	Honigman Miller	Paul Hastings	
Fenwick & West	Hovey Williams	Perkins Coie	

SELECTED PUBLICATIONS / PRESENTATIONS

Rosenberg C., Advanced Systems Engineering and Human Factors Engineering, International Forum on Composite Material Applications for Large Commercial Aircraft, Shanghai, China, 2011.

Parks P. and Rosenberg C., Interactive Distributed Simulation Environment for Collaborative Technology Experiments and Analysis, SimTecT, Brisbane, Australia, 2008.

Crutchfield J. and Rosenberg C., Predicting Subjective Working Ratings: A Comparison and Synthesis of Operational and Theoretical Models, HCI-Aero Conference Proceedings, Seattle, WA, 2006.

Barfield, W., Rosenberg, C., and Furness, T.A., Situation Awareness as a Function of Frame of Reference, Computer-Graphics Eyepoint Elevation, and Geometric Field of View, International Journal of Aviation Psychology, Vol 5, pp. 233-256, 1995.

Rosenberg, C., Barfield W., and Lotens, W., Virtual Environments and Advanced Interface Design, Augmented Reality Displays, Oxford University Press, pp. 542 – 575, 1995.

Barfield, W., and Rosenberg, C., Judgments of Azimuth and Elevation as a Function of Monoscopic and Binocular Depth Cues Using a Perspective Display, Human Factors, Volume 37, Number 1, 1995.

Rosenberg, C. and Barfield, W., Estimation of Spatial Distortion as a Function of Geometric Parameters of Perspective, IEEE Transactions on Systems, Man and Cybernetics, Volume 25, Issue 9, September 1995.

Barfield, W. and Rosenberg, C., Perspective versus Stereoscopic Displays for Spatial Judgments, accepted for publication, Human Factors, 1994.

Barfield, W. and Rosenberg, C., and Furness, T., Situational Awareness as a Function of Frame of Reference, Virtual Eyepoint Elevation, and Geometric Field of View, International Journal of Aviation Psychology, 1994.

Rosenberg, C. and Moses, B., Future Human Interfaces to Computer Controlled Sound Systems, 95th Annual Audio Engineering Conference, New York, New York, October 1993.

Barfield, W. and Rosenberg, C., Comparison of Stereoscopic and Perspective Display Formats for Spatial Tasks, SID Conference, Seattle, Washington, September 1993.

Barfield, W. and Rosenberg, C., Spatial Situational Awareness as a Function of Frame of Reference, Virtual Eyepoint Elevation, and Geometric Field of View, SID Conference, Seattle, Washington, September 1993.

Barfield, W., Rosenberg, and Cohen, M., Presence as a Function or Frame of Reference within Virtual Environments (Technical Report). Seattle, Washington, University of Washington, Sensory Engineering Lab, 1993.

Lion, D., Rosenberg, C., and Barfield, W., Overlaying Three-Dimensional Computer Graphics with Stereoscopic Live Motion Video: Applications for Virtual Environments, SID Conference, Seattle, Washington, September 1993.

Barfield, W., and Rosenberg, C., The Effect of Geometric Field of View and Tunnel Design for Perspective Flight-Path Displays, Transactions of the Society of Automotive Engineers, Seattle, Washington, July 1992.

Rosenberg, C., and Barfield, W., The Effects of Scene Complexity and Object Density for Low Level Flight, Sixth International Symposium on Aviation Psychology, Columbus Ohio, September 1991.
