A multifunctional display device and a method of controlling the same are disclosed herein. The method may include displaying a first card object in a first area of the display, displaying a second card object in a second area of the display, and partially displaying a third card object in a third area of the display to indicate that additional card objects are available for display. The first card object may be configured to display a video image and the second card object may have at least one link for connecting to a server. Based on a request to change the displayed card objects, the third card object may be displayed in the second area of the display and a fourth card object may be partially displayed in the third area of the display.
