(57) **ABSTRACT**

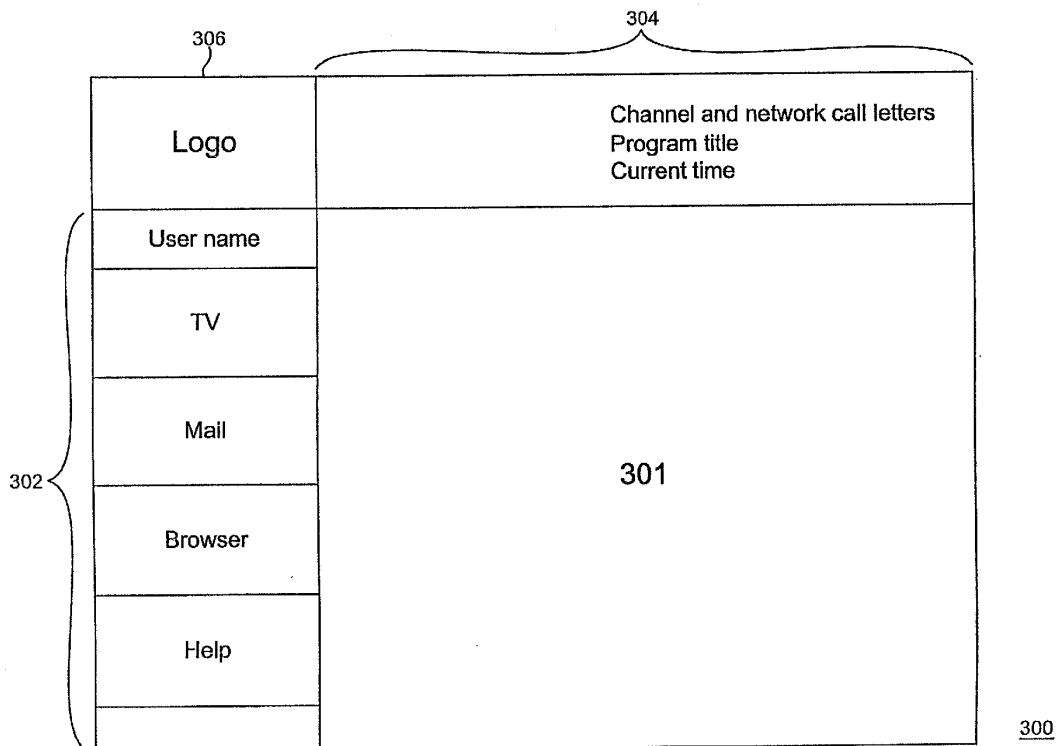

A method of displaying multimedia content on a display area of a broadband Internet-enabled television system includes providing a remote control to control contents being displayed on the display area. A television content is displayed on the display area. A first instruction transmitted by the remote control in response to activation of a first button is received. A first synthetic channel page is displayed in response to the first instruction. The first synthetic channel page includes a television content section and an Internet content section.
