A bra includes a first portion having a cup of a first size and a back panel attached to the cup of the first size and a second portion that is separable from the first portion, the second portion having a cup of a second size and a back panel attached to the cup of the second size. The second portion is connectable with the first portion by the connection of the cup of the first size with the cup of the second size and by the connection of the two back panels. In another aspect, a cup for a bra has an inner layer and an outer layer connected to the inner layer to define a pocket therebetween in which a pad can be received, the outer layer being fabricated from an elastic material. In another aspect, a bra-half adapted for cooperation with a second bra-half has a cup of a selected size, a back panel attached to the cup, means disposed on the cup for effecting the connection of the cup to the second bra-half, and means disposed on the back panel for effecting the connection of the back panel to the second bra-half. The cup has an inner layer and an outer layer, the inner layer and the outer layer being connected to each other to define a pocket.
