This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

POCKET BRA SYSTEM

APPLICATION

FOR UNITED STATES LETTERS PATENT

SPECIFICATION

TO ALL WHOM IT MAY CONCERN:

BE IT KNOWN THAT I, SHARON J. GOFF, a citizen of the UNITED STATES OF AMERICA, have invented new and useful improvements in a POCKET BRA SYSTEM of which the following is a specification:

POCKET BRA SYSTEM

BACKGROUND OF THE INVENTION

Field of the Invention

The present invention relates to a pocket bra system and more particularly pertains to removably receiving a handheld electronic device while providing support and shape to the breasts of a wearer, the receiving and supporting and shaping being done in a safe, convenient and economical manner.

SUMMARY OF THE INVENTION

In view of the disadvantages inherent in the known types of bra systems of known designs and configurations now present in the prior art, the present invention provides an improved pocket bra system. As such, the general purpose of the present invention, which will be described subsequently in greater detail, is to provide a new and improved pocket bra system and method which has all the advantages of the prior art and none of the disadvantages.

To attain this, the present invention essentially comprises a pocket bra system. First provided is a strap assembly which includes a chest strap and shoulder straps. Similarly configured left and right cups are provided. The strap assembly is attached to the cups whereby the strap assembly adheres the

cups to a wearer. Each cup has curved upper, lower, interior and exterior edges. Each cup has inside and outside surfaces. A patch is operatively associated with each cup. Each patch has a linear upper edge and curved lower, interior and exterior edges. Each patch has inside and outside surfaces. Stitching couples the lower, interior and exterior edges of each patch to the lower, interior and exterior edges of an associated cup. A linear opening is formed along the upper edge of each patch. Piping covers the upper edge of each patch. The piping is adapted to allow the patch to move away from and back toward the cup between open and closed orientations.

In other embodiments, any of the pockets disclosed herein may have a closure structure, such as a hook and loop connector, zipper, a snap closure, button, magnet, and the like.

There has thus been outlined, rather broadly, the more important features of the invention in order that the detailed description thereof that follows may be better understood and in order that the present contribution to the art may be better appreciated. There are, of course, additional features of the invention that will be described hereinafter and which will form the subject matter of the claims attached.

In this respect, before explaining at least one embodiment of the invention in detail, it is to be understood that the invention is not limited in its application to the details of construction and to the arrangements of the components set forth in the following description or illustrated in the drawings. The invention is capable of other embodiments and of being practiced and carried out in various ways. Also, it is to be understood that the phraseology and terminology employed herein are for the purpose of descriptions and should not be regarded as limiting.

As such, those skilled in the art will appreciate that the conception, upon which this disclosure is based, may readily be utilized as a basis for the designing of other structures, methods and systems for carrying out the several purposes of the present invention. It is important, therefore, that the claims be regarded as including such equivalent constructions insofar as they do not depart from the spirit and scope of the present invention.

It is therefore an object of the present invention to provide a new and improved pocket bra system which has all of the advantages of the prior art bra systems of known designs and configurations and none of the disadvantages.

It is another object of the present invention to provide a new and improved pocket bra system which may be easily and efficiently manufactured and marketed.

It is further object of the present invention to provide a new and improved pocket bra system which is of durable and reliable constructions.

An even further object of the present invention is to provide a new and improved pocket bra system which is susceptible of a low cost of manufacture with regard to both materials and labor, and which accordingly is then susceptible of low prices of sale to the consuming public, thereby making such pocket bra system economically available to the buying public. It should be understood that the present invention may be formed of any material capable of being used as a bra. These materials may include any sort of flexible fabric, whether elastic or not, plastics, films, and the like. In some embodiments, certain materials may be stitched or layered into the materials to provide different functionality such as an underwire, radio-frequency shielding materials, elastic materials, and the like.

Even still another object of the present invention is to provide a pocket bra system for removably receiving a handheld electronic device while providing support and shape to the breasts of a wearer,

the receiving and supporting and shaping being done in a safe, convenient and economical manner.

Lastly, it is an object of the present invention to provide a new and improved pocket bra system for removably receiving a handheld electronic device and other objects while providing support and shape to the breasts of a wearer.

These handheld electronic devices and other objects may be any items that are capable of being stored within a pocket on a bra. For example, the electronic devices may be any portable electronic-based device, including, but not limited to cellular telephones (including smartphones), tablets, portable music players, exercise tracking devices such as GPS devices, pedometers, bio-monitors, computation devices, electronic devices, and medical devices, and the like, any other portable and relatively small electronic device, as well as personal items. Similarly, the other objects may be any small objects that are commonly placed in a pocket of a wearer, such as keys, cards, wallets, medicines and medicine dosages, insulin pumps, and the like.

These together with other objects of the invention, along with the various features of novelty which characterize the invention, are pointed out with particularity in the claims annexed to and forming a part of this disclosure. For a better understanding of the

invention, its operating advantages and the specific objects attained by its uses, reference should be had to the accompanying drawings and descriptive matter in which there is illustrated preferred and alternate embodiments of the invention.

BRIEF DESCRIPTION OF THE DRAWINGS

The invention will be better understood and objects other than those set forth above will become apparent when consideration is given to the following detailed description thereof. Such description makes reference to the annexed drawings wherein:

DESCRIPTION OF THE PREFERRED EMBODIMENT

With reference now to the drawings, and in particular to Figure 1 thereof, the preferred embodiment of the new and

improved pocket bra system embodying the principles and concepts of the present invention and generally designated by the reference numeral 10 will be described.

The present invention, the pocket bra system 10 is comprised of a plurality of components. Such components in their broadest context include a strap, left and right cups, a rectangular patch and a linear slit. Such components are individually configured and correlated with respect to each other so as to attain the desired objective.

First provided is a strap assembly. The strap assembly includes a generally horizontal chest strap 14. The chest strap is positionable around the chest and back of a wearer. The strap assembly includes left and right generally vertical shoulder straps 16. The shoulder straps are positionable over the shoulders of the wearer. The shoulder straps have free ends. The free ends are coupled to the chest strap adjacent to the chest of the wearer and adjacent to the back of the wearer.

A left cup 18 is provided. A similarly configured right cup 20 is provided. Each cup has an inside surface and an outside surface. The left and right cups each have an upper-most point 22. The left and right cups each have a lower-most point 24. A generally vertical axis is provided. The vertical

axis divides each cup into an inner hemisphere interiorly and an outer hemisphere exteriorly. The left and right cups each have an inner-most point 26. The left and right cups each have an outer-most point 28. A generally horizontal axis is provided. The horizontal axis divides each cup into an upper hemisphere above and a lower hemisphere below.

A rectangular patch 32 is provided next. The patch is operatively associated with each cup. Each patch has generally horizontal upper and lower edges. Each patch has generally vertical interior and exterior edges. The patch has a periphery. The periphery has stitching. In this manner the periphery of each patch is coupled to the inside surface of an associated cup. The majority of each patch is in the upper hemisphere. The majority of each patch is in the outer hemisphere. A rectangular chamber 34 is provided. The chamber is provided between each patch and its associated cup. The chamber is rectangular. The chamber has a height of 120 and 140 millimeters. The chamber has a width of between 60 and 70 millimeters. The pockets and the patches are fabricated of a resilient closed cell polyurethane foam. The foam has a thickness of from 2 to 4 millimeters. The patches are fabricated of an elastic fabric.

Further provided is a linear slit 38. The slit is provided in each patch. The slit is provided parallel with, and closely spaced from, the upper edge of each patch. Each slit has a length greater than 90 percent of the width of the chamber. An elastic band 40 is provided. The elastic band is provided within each patch. The elastic band surrounds the slit. The elastic band is adapted to return the slit to a closed orientation. The elastic band is further adapted to allow the slit to stretch to an enlarged orientation.

Provided last is a handheld electronic device 46. The handheld electronic device is positionable within the chamber. In one embodiment, the handheld electronic device has a height of 115 millimeters, plus or minus 10 percent. The handheld electronic device has a width of 59 millimeters. The handheld electronic device has a thickness of 9 millimeters plus or minus 10 percent. The slit is adapted to stretch to the open orientation when adding the handheld device to, or removing the handheld device from, the chamber. The slit is adapted to contract to the closed orientation when the handheld device is within or without the chamber. The thickness and the material of the cups and the patches are adapted to abate inward projections by the handheld devices in the chambers tending to

poke a user. The thickness and the material of the cups and the patches are adapted to abate outward projections by the handheld devices in the chambers tending to create unsightly projections.

An alternate embodiment 100 of the present invention is provided. An under-wire 104 is provided. The under-wire is provided beneath each cup.

A central patch 108 is provided. The central patch is provided intermediate the cups. In this manner a central chamber is formed. The central patch has horizontal upper and lower edges 110, 112. The central patch has vertical side edges 114, 116. The upper and lower edges are longer than the side edges. The central patch has a central slit 118. The central slit is provided parallel with and in proximity to the upper edge. The central chamber is adapted to receive and support keys.

An upper patch 120 is provided on each shoulder strap. The upper patches have horizontal upper and lower edges 122, 124. The upper patches have vertical side edges 126, 128. The upper and lower edges are shorter than the side edges. The upper patches each have an upper slit 130. The upper slit is provided parallel with and in proximity to the upper edge. The upper chambers are adapted to receive and support pills.

Figures 9 through 12 illustrate a system 200 constructed in accordance with another alternate embodiment of the invention. In such alternate embodiment, enlarged bra pockets 204 are constructed on the cups of the bra. In addition, side pockets 268 are constructed along both sides of the bra. Although only a right side pocket is illustrated, it should be understood that a similarly constructed left side pocket is preferably provided additionally.

As shown in Figures 9 and 10, there is illustrated a pocket bra system 200 for removably receiving a handheld electronic device and other objects while providing support and shape to the breasts of a wearer. The system includes a strap assembly 214. The strap assembly is formed of a chest strap 216 and shoulder straps 218.

Next provided are similarly configured left and right cups 222, 224. Each cup has inside and outside surfaces. The strap assembly is attached to the cups whereby the strap assembly adheres the cups to a wearer. Each cup has curved upper edge 226, a lower edge 228, an interior edge 230 and an exterior edge 232. Each cup has inside and outside surfaces.

A patch 236 is operatively associated with each cup. Each patch has a linear upper edge 238 and a curved lower edge 240,

an interior edge 242 and an exterior edge 248. Each patch has inside and outside surfaces.

Stitching 250 couples the lower, interior and exterior edges of each patch to the lower, interior and exterior edges of an associated cup. A linear opening 252 is thus formed along the upper edge of each patch. Piping 256 covers the upper edge of each patch. The upper edge of the patch and the piping are adapted to allow the patch to move away from and back toward the cup between open and closed orientations.

Pockets 260 are formed between the patches and the cups. In one embodiment, the cups are fabricated of a resilient closed cell polyurethane foam with a thickness of from 2 to 4 millimeters. In another embodiment, the patches are fabricated of a resilient closed cell polyurethane foam with a thickness of from 2 to 4 millimeters.

A handheld electronic device 46 is adapted to be placed within a pocket.

An under-wire 264 is coupled beneath each cup in a generally vertical plane.

Lastly provided is a side patch 268 forming a side pocket on each side of the chest strap. The side patches each have a horizontal upper edge 270 and a lower edge 272 and vertical side

edges 274. The upper and lower edges of each patch are longer than the side edges. The side patches include side stitching 276 along the lower and side edges. Thus is formed an upper opening 278 at each side patch, the pocket 268 formed between two layers of the chest strap and defined by the stitching 276.

In one embodiment, the side pocket 268 may be configured to have the upper edge 270 and top edge of the chest strap aligned or nearly aligned. In another embodiment, a pocket flap may extend from the chest strap over the upper opening 278 to form an 'envelope pocket' and thus to cover the upper opening 278. In further embodiments, the flap may be positioned on a side, bottom, or middle of the pocket, with the opening being at least partially covered by the flap when in a closed (and/or non-accessing) position. The pocket flap may be secured via hook and loop connector, button, snap, zipper, or the like to the exterior of the pocket 268, or may simply rest over the upper opening 278. In still a further embodiment, side pocket 268 may further extend at least partially into, over, or beneath the cup such that the pocket, and potentially the upper opening 278 span both part of the chest strap and part of the cup.

Fig. 13 provides a view of an embodiment of a bra having a back pocket. The present embodiment is shown as a sports bra

version, however it should be understood that the back pocket design may be employed on any bra, and may be positioned on the chest strap, similarly to the side pocket embodiment described above. This may be particularly useful on front-open bra designs. In the embodiment shown, two shoulder straps 306, and two sides of the chest strap 301 extend away from a central area 305. On this central area is a pocket 304. The pocket may be formed in any manner and may be defined at its boundary 302 by stitching, a separate pocket material behind the central area 305 material, or by any other structure. An opening 303 to the pocket 304 is shown at a top, but it should be understood that the opening 303 may be on the sides, middle, bottom, or anywhere on the pocket, depending on embodiment. A closure (not shown) may be used to hold the pocket in a closed position. The closure may be any structure capable of holding the pocket opening 303 in a closed position.

A final embodiment of the invention is designed to protect wearers from radio frequency emissions from electronic devices supported by the system. To achieve this protection, the left and right cups are fabricated of a radio frequency protective material. The radio frequency protective material is fabricated of a blend of fabrics chosen from the class consisting of

polyester and cotton and further including copper and silver. In one embodiment, the radio frequency protective material is fabricated of 78 percent of a blend of fabric chosen from the class consisting of polyester and cotton and further including 21 percent copper and 1 silver. In another embodiment, the radio frequency protective material is fabricated of 90 percent of a blend of fabric chosen from the class consisting of polyester and cotton and further including 9.5 percent copper and 0.5 silver.

As to the manner of usage and operation of the present invention, the same should be apparent from the above description. Accordingly, no further discussion relating to the manner of usage and operation will be provided.

With respect to the above description then, it is to be realized that the optimum dimensional relationships for the parts of the invention, to include variations in size, materials, shape, form, function and manner of operation, assembly and use, are deemed readily apparent and obvious to one skilled in the art, and all equivalent relationships to those illustrated in the drawings and described in the specification are intended to be encompassed by the present invention.

Therefore, the foregoing is considered as illustrative only of the principles of the invention. Further, since numerous modifications and changes will readily occur to those skilled in the art, it is not desired to limit the invention to the exact construction and operation shown and described, and accordingly, all suitable modifications and equivalents may be resorted to, falling within the scope of the invention.

Claims:

What is claimed is:

1. A pocket bra assembly comprising:

a strap assembly including a chest strap and shoulder straps, the chest strap having a front portion configured to be positioned on a front of a user, and a rear portion configured to be positioned on a back of the user, the shoulder straps each having a front portion configured to be positioned on the front of the user, and a rear portion configured to be positioned on the back of the user;

a bra portion, the bra portion providing support and shape to breasts of the user, the strap assembly being attached to the bra portion whereby the strap assembly holds the bra portion to the user, with the chest strap extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back;

a back pocket positioned on the back portion of at least one of the chest strap and shoulder straps, the back pocket having an opening formed in its surface providing access to a pocket interior; and

an item positioned within the back pocket.

2. The pocket bra assembly of claim 1 wherein the bra is a sports bra.
3. The pocket bra assembly of claim 1 wherein the patch is positioned on the rear portion of the chest strap.
4. The pocket bra assembly of claim 1 wherein the back pocket is positioned on the rear portion of one of the shoulder straps.
5. The pocket bra assembly of claim 1 wherein the rear portion of each of the shoulder straps join together to form a central area, the back pocket positioned on the central area.
6. The pocket bra assembly of claim 1 wherein the back pocket comprises a closure.
7. The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about a part of a perimeter of the patch, a gap in the stitching leaving a portion of the perimeter of the patch unattached, thereby forming an opening providing access to the pocket interior portion formed by the patch.
8. The pocket bra assembly of claim 7 further comprising

an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.

9. The pocket bra assembly of claim 7 wherein the patch is formed of a stretchable material to allow for an expansion of the back pocket.

10. The pocket bra assembly of claim 7 wherein the opening is formed adjacent to a side of the patch.

11. The pocket bra assembly of claim 7 wherein the opening is formed adjacent to a top of the patch.

12. The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about an entire perimeter of the patch, the patch having an opening formed in its surface providing access to the pocket interior portion formed by the patch.

13. The pocket bra assembly of claim 12 further comprising an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it

is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.

14. The pocket bra assembly of claim 12 wherein the patch is formed of a stretchable material to allow for an expansion of the back pocket.

15. The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a top of the patch.

16. The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a side of the patch.

17. The pocket bra assembly of claim 1 further comprising an internal pocket defining the pocket interior, the interior pocket connected about a perimeter of the opening, the internal pocket being separate from the strap assembly.

18. The pocket bra assembly of claim 17 wherein the internal pocket is positioned adjacent to an interior surface of the back portion of at least one of the chest strap and shoulder straps.

ABSTRACT OF THE DISCLOSURE

A strap assembly includes a chest strap and shoulder straps. Similarly configured left and right cups are provided. The strap assembly is attached to the cups whereby the strap assembly adheres the cups to a wearer. Each cup has curved upper, lower, interior and exterior edges. Each cup has inside and outside surfaces. A patch is operatively associated with each cup. Each patch has a linear upper edge and curved lower, interior and exterior edges. Each patch has inside and outside surfaces. Stitching couples the lower, interior and exterior edges of each patch to the lower, interior and exterior edges of an associated cup. A linear opening is formed along the upper edge of each patch. Piping covers the upper edge of each patch. The piping is adapted to allow the patch to move away from and back toward the cup between open and closed orientations.

If checked, the undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the World Intellectual Property Office (WIPO), and any other intellectual property offices in which a foreign application claiming priority to the instant patent application is filed access to the instant patent application. See 37 CFR 1.14(c) and (h). This box should not be checked if the applicant does not wish the EPO, JPO, KIPO, WIPO, or other intellectual property office in which a foreign application claiming priority to the instant patent application is filed to have access to the instant patent application.

In accordance with 37 CFR 1.14(h)(3), access will be provided to a copy of the instant patent application with respect to: 1) the instant patent application-as-filed; 2) any foreign application to which the instant patent application claims priority under 35 U.S.C. 119(a)-(d) if a copy of the foreign application that satisfies the certified copy requirement of 37 CFR 1.55 has been filed in the instant patent application; and 3) any U.S. application-as-filed from which benefit is sought in the instant patent application.

In accordance with 37 CFR 1.14(c), access may be provided to information concerning the date of filing this Authorization.

Applicant Information:

Providing assignment information in this section does not substitute for compliance with any requirement of part 3 of Title 37 of CFR to have an assignment recorded by the Office.				
Applicant 1				
If the applicant is the inventor (or the remaining joint inventor or inventors under 37 CFR 1.45), this section should not be completed. The information to be provided in this section is the name and address of the legal representative who is the applicant under 37 CFR 1.43; or the name and address of the assignee, person to whom the inventor is under an obligation to assign the invention, or person who otherwise shows sufficient proprietary interest in the matter who is the applicant under 37 CFR 1.46. If the applicant is an applicant under 37 CFR 1.46 (assignee, person to whom the inventor is obligated to assign, or person who otherwise shows sufficient proprietary interest) together with one or more joint inventors, then the joint inventor or inventors who are also the applicant should be identified in this section.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

DETAILED ACTION

Notice of Pre-AIA or AIA Status

The present application, filed on or after March 16, 2013, is being examined under the first inventor to file provisions of the AIA.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent for a claimed invention may not be obtained, notwithstanding that the claimed invention is not identically disclosed as set forth in section 102, if the differences between the claimed invention and the prior art are such that the claimed invention as a whole would have been obvious before the effective filing date of the claimed invention to a person having ordinary skill in the art to which the claimed invention pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103 as being unpatentable over Knutson (US 6626733) in view of O (US 2010/0000003).

In regard to claim 1, Knutson discloses a pocket bra assembly 10 comprising: a strap assembly 12,13 including a chest strap 12,13 and shoulder straps 17,18, the chest strap 12,13 having a front portion 12 configured to be positioned on a front of a user, and a rear portion 13 configured to be positioned on a back of the user, the shoulder straps 17, 18 each having a front portion 12 configured to be positioned on the front of the user, and a rear portion 13 configured to be positioned on the back of the user; a bra portion at 11, the bra portion providing support and shape to breasts of the user, the strap 17, 18 assembly being attached to the bra portion at 11 whereby the strap

Art Unit: 3765

assembly 17, 18 holds the bra portion to the user, with the chest strap 12,13 extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back;

a back pocket 20 positioned on the back portion 13 of at least one of the chest strap 12,13 and shoulder straps 17, 18 , the back pocket 20 having an opening at 41 and

an item 21 positioned within the back pocket as discussed in col. 1, lines 36-67 and in figure 1 of Knutson.

. However, the back pocket 20 opening 41 is not formed in the pocket surface to provide access to a pocket interior.

O discloses a garment pocket 120 with an opening 130 on the pocket surface as in figure 5 and has discussed in O paragraph 0025.

Accordingly it would have been obvious to one having ordinary skill in the art to modify the pocket structure of Knutson to construct the pocket as disclosed by O to allow for the storage of other items therein and to construct the pocket so that the opening is on the surface of the pocket allowing for ease in opening and closing the pocket so that items are secure within the pocket.

In regard to claim 2 Knutson discloses the pocket bra assembly of is on a bra that is a sports bra.

Art Unit: 3765

In regard to claim 3, the pocket bra assembly of Knutson includes the patch 20 that is positioned on the rear portion 13 of the chest strap 12, 13 as in figure 1 .

In regard to claim 4 the pocket bra assembly of Knutson includes the back pocket 20 is positioned on the rear portion of one of the shoulder straps 17, 18 that extend into the back panel 13 as in figure 1.

In regard to claim 5 Knutson discloses the pocket bra assembly wherein the rear portion of each of the shoulder straps 17, 18 join together to form a central area within 13 as in figure 1 and wherein the back pocket 20 positioned on the central area of back 13.

In regard to claim 6, the Knutson pocket bra assembly includes the back pocket however it does not comprise a closure therein. O discloses a garment pocket 120 with an opening 130 on the pocket surface that includes a zipper closure as in figure 5 and has discussed in O paragraph 0025.

Accordingly it would have been obvious to one having ordinary skill in the art to modify the pocket structure of Knutson to construct the pocket as disclosed by O to allow for the storage of other items therein and to construct the pocket so that the opening is on the surface of the pocket with a zipper closure allowing for ease in opening and closing the pocket so that items are secure within the pocket.

Art Unit: 3765

In regard to claim 7, Knutson discloses the pocket bra assembly wherein the back pocket 20 is formed by a patch 25 at 20 connected to the back portion 13 of the at least one of the chest strap 12, 13 and shoulder straps 17, 18 by stitching col. 3 lines 57-62 about a part of a perimeter of the patch 25 at 20, a gap at the top edge at 41 in the stitching leaving a portion of the perimeter of the patch unattached, thereby forming an opening 41 in figure 1 providing access at 41 to the pocket interior portion formed by the patch.

In regard to claims 8, 12 and 13, Knutson discloses the pocket bra assembly attached to the back of the brassiere. However, Knutson does not disclose that the pocket comprises an internal pocket connected about a perimeter of the opening wherein the internal pocket is defining the pocket interior and is formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps. O discloses a pocket structured as claimed as seen in figure 9 at 920 and in para. (0028). The pocket as claimed in claim 13 is located on the back portion between the chest and shoulder straps as in figure 1. Accordingly it would have been obvious to modify the pocket construction of Knutson to form the pocket as claimed in O to disguise the pocket inclusion on the garment except for the opening and closure as seen on the pocket surface.

In regard to claims 9 and 14, Knutson discloses the pocket bra assembly wherein the patch is formed of a stretchable material that is the same material as the brassiere itself

Art Unit: 3765

as discussed in Knutson in col. 2, lines 45-65 to therefore allow for an expansion of the back pocket.

In regard to claims 10 and 15 Knutson discloses the pocket bra assembly wherein the opening is formed adjacent to a side of the patch in that the end of the opening is adjacent to a left or right side of the patch and to a top side of the patch of the pocket as broadly claimed in claim 11 and 16 and as seen in figure 1. Applicant has not claimed that the pocket is a side opening pocket.

O discloses the pocket bra assembly as claimed in claim 17 wherein the internal pocket defines the pocket interior, the interior pocket connected about a perimeter of the opening, the internal pocket being separate from the strap assembly as discussed above in regard to claim 8.

In regard to claim 18 Knutson discloses the pocket positioned adjacent to an interior surface of the back portion and of at least one of the chest strap and shoulder straps and the pocket is internal as disclosed by O as discussed above in regard to claim 8.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

AMENDMENT AND RESPONSE TO SEPTEMBER 7, 2017 OFFICE ACTION

This is a response to the Office Action issued on September 7, 2017 by the U.S. Patent and Trademark Office in connection with the above-identified application. With a one month extension of time, requested herein, a response to the September 7, 2017 Office Action is due January 7, 2018. Accordingly, this response is being timely filed.

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A pocket bra assembly comprising:

a strap assembly including a chest strap and shoulder straps, the chest strap having a front portion configured to be positioned on a front of a user, and a rear portion configured to be positioned on a back of the user, the shoulder straps each having a front portion configured to be positioned on the front of the user, and a rear portion configured to be positioned on the back of the user;

a bra portion, the bra portion providing support and shape to breasts of the user, the strap assembly being attached to the bra portion whereby the strap assembly holds the bra portion to the user, with the chest strap extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back;

a back pocket formed entirely of fabric positioned on the back portion of at least one of the chest strap and shoulder straps, the back pocket having an opening formed ~~in~~ its surface that is biased in a closed position at rest, providing access to a pocket interior; and

an item positioned within the back pocket.

2. (Original) The pocket bra assembly of claim 1 wherein the bra is a sports bra.

3. (Original) The pocket bra assembly of claim 1 wherein the patch is positioned on the rear portion of the chest strap.
4. (Original) The pocket bra assembly of claim 1 wherein the back pocket is positioned on the rear portion of one of the shoulder straps.
5. (Original) The pocket bra assembly of claim 1 wherein the rear portion of each of the shoulder straps join together to form a central area, the back pocket positioned on the central area.
6. (Original) The pocket bra assembly of claim 1 wherein the back pocket comprises a closure.
7. (Original) The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about a part of a perimeter of the patch, a gap in the stitching leaving a portion of the perimeter of the patch unattached, thereby forming an opening providing access to the pocket interior portion formed by the patch.
8. (Original) The pocket bra assembly of claim 7 further comprising an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.
9. (Original) The pocket bra assembly of claim 7 wherein the patch is formed of a stretchable material to allow for an expansion of the back pocket.

10. (Original) The pocket bra assembly of claim 7 wherein the opening is formed adjacent to a side of the patch.
11. (Original) The pocket bra assembly of claim 7 wherein the opening is formed adjacent to a top of the patch.
12. (Currently Amended) The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about an entire perimeter of the patch, the patch having a[[n]] slit opening formed in its surface in close proximity to a top of the patch providing access to the pocket interior portion formed by the patch.
13. (Original) The pocket bra assembly of claim 12 further comprising an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.
14. (Original) The pocket bra assembly of claim 12 wherein the patch is formed of a stretchable material to allow for an expansion of the back pocket.
15. (Original) The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a top of the patch.
16. (Original) The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a side of the patch.
17. (Original) The pocket bra assembly of claim 1 further comprising an

internal pocket defining the pocket interior, the interior pocket connected about a perimeter of the opening, the internal pocket being separate from the strap assembly.

18. (Original) The pocket bra assembly of claim 17 wherein the internal pocket is positioned adjacent to an interior surface of the back portion of at least one of the chest strap and shoulder straps.

Remarks

Applicant thanks the Office for the attention accorded to the present application in the September 7, 2017 Office Action. Claims 1-18 were pending in the subject application.

Without prejudice or disclaimer, claims 1 and 12 have been amended. Upon entry of this amendment, claims 1-18 will be pending in the present application.

The amendments to the claims are primarily to correct matters of form and/or clarity in response to the Office's recommendation. Applicant asserts that all claims are supported in the specification as originally filed. Support for amendments can be seen in the Figures, as well as at, for example, the paragraph bridging page 4 and 5, page 10 last paragraph, and the paragraph bridging page 14 and 15. No new matter has been added.

The claim amendments and cancellations made herein are made solely to expedite prosecution of the instant application, and should not be construed as acquiescence to the Office's rejections. Applicant reserves the right to pursue the cancelled and/or non-elected subject matter in one or more divisional or continuation applications.

Applicant respectfully traverses all rejections and asserts that the claims are now in condition for allowance.

Rejections under 35 U.S.C. § 103(a)

The Examiner has rejected claims 1-18 under 35 U.S.C. 103(a) as being unpatentable over Knutson (US 6626733) in view of O (US 2010/0000003).

Without prejudice or disclaimer, Applicant has amended claim 1, from which claims 2-18 depend. Applicant respectfully asserts that the combination of Knutson and

O do not teach each and every element of this claim. Therefore, the combination of references does not establish a prima facie case of obviousness under 35 U.S.C. 103(a).

Specifically, it would not be obvious to modify Knutson based on O to teach a pocket formed entirely of fabric with the opening biased in a closed position, as is required by claim 1. Knutson is a specially designed structure for a specific purpose: to allow a user to insert and reinsert a water bottle into a rear pocket while exercising. Col. 4 lines 23-25 states:

The water bottle **21** is carried by the wearer in the pocket **20** of the sports top **10**, and is designed for convenient access and use when running. Without breaking stride, the user simply reaches over her shoulder, grabs the top of the water bottle **21**, and removes it from the pocket **20** of the sports top **10**. After drinking, the user replaces the bottle **21** by reaching back over her shoulder, and sliding the tapered base of the bottle **21** downwardly against the insulating layer **26** at the top of the pocket panel **25**. The bottle **21** reenters the pocket through the mouth opening created by the shape-retaining insert. The curved shape and rigidity of the insert facilitate reentry of the bottle into the pocket.

Knutson achieves this purpose by using a rigid plastic insert (Element 40, Col. 4 lines 16-23) which biases the pocket in an open position so that the water bottle can be easily reinserted. Col. 4 lines 12-23:

The plastic insert **40** opens the mouth **41** of the pocket **20** when the sports top **10** is stretched around the upper torso, such that the water bottle **21** is readily inserted into the pocket **20** while running without slowing or disrupting the pace of the wearer.

By contrast, the present invention serves to keep items held safe within the pocket during exercise. It would not be obvious to modify Knutson to remove these critical structural elements based on O because Knutson would fail to operate as intended.

For example, if the Knutson pocket were replaced with the claimed pocket, the fabric of the pocket would be too flexible, and the fact that it is biased in a closed position would require additional manipulation to try to open it. This would be nearly

impossible while wearing the bra with the pocket between the shoulder blades, and would be even harder if the user was trying to exercise at the same time.

Regarding claim 12, Applicant reiterates the above arguments, and further notes that none of Knutson and O teach the pocket formed as a patch connected by stitching about an entire perimeter of the patch, with the patch having a slit formed in its surface as the opening, as required by this claim. Neither reference teaches this. O teaches that the opening is formed by a lack of connection of a top edge of the pocket. (O. Paragraph 20). No slit is discussed. Further, the claimed structure would be even further unusable for the purpose intended by Knutson because of the near impossibility of manipulating this structure to put a water bottle into a pocket behind the back shoulders.

Thus, Applicant respectfully asserts that claims 1-18 are now patentably distinguished from Knutson in view of O. Applicant further asserts that this claim is now in condition for allowance.

Conclusion

Applicant again thanks the Office for the attention accorded to the present Application in the September 7, 2017 office action. Applicant has herein amended claims 1 and 12. Applicant asserts that based on the amendments and comments presented herein, all of the pending claims are in condition for allowance. Early and favorable action is respectfully requested.

The Examiner is invited to telephone the undersigned, Applicant's attorney of record, to facilitate advancement of the present application.

Respectfully submitted,

DETAILED ACTION

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There is no support in the specification for the new language in claim 1 of the “back pocket being entirely of fabric” and that the opening is “Biased in a closed position at rest”.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112(a):

(a) IN GENERAL.—The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor or joint inventor of carrying out the invention.

The following is a quotation of the first paragraph of pre-AIA 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-18 are rejected under 35 U.S.C. 112(a) or 35 U.S.C. 112 (pre-AIA), first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a

Art Unit: 3765

way as to reasonably convey to one skilled in the relevant art that the inventor or a joint inventor, or for pre-AIA the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1 the newly added limitations that "an opening formed that is biased in a closed position at rest" is not disclosed in the original specification or claims and is therefore new matter. There is no support in the specification for the pocket being "biased in a closed position at rest" in that the material structure of the back panel and the pocket was not disclosed as being of the structural makeup to remain closed and that it does not hang freely on the back of the brassiere to remain open when at rest.

Claim Rejections - 35 USC § 112

The following is a quotation of 35 U.S.C. 112(b):

(b) CONCLUSION.—The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the inventor or a joint inventor regards as the invention.

The following is a quotation of 35 U.S.C. 112 (pre-AIA), second paragraph:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor, or for pre-AIA the applicant regards as the invention.

In claim 1, line 12; claim 7, line 2; claim 8, line 4; claim 12, line 2; claim 13, line 4 and claim 18, line 2, there is no antecedent basis for "The back portion".

Claim Rejections - 35 USC §103

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent for a claimed invention may not be obtained, notwithstanding that the claimed invention is not identically disclosed as set forth in section 102, if the differences between the claimed invention and the prior art are such that the claimed invention as a whole would have been obvious before the effective filing date of the claimed invention to a person having ordinary skill in the art to which the claimed invention pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-18 are rejected under 35 U.S.C. 103 as being unpatentable over Knutson (US 6626733) in view of O (US 2010/0000003).

In regard to claim 1, Knutson discloses a pocket bra assembly 10 comprising: a strap assembly 12,13 including a chest strap 12,13 and shoulder straps 17,18 , the chest strap 12,13 having a front portion 12 configured to be positioned on a front of a

Art Unit: 3765

user, and a rear portion 13 configured to be positioned on a back of the user, the shoulder straps 17, 18 each having a front portion 12 configured to be positioned on the front of the user, and a rear portion 13 configured to be positioned on the back of the user;

a bra portion at 11 , the bra portion providing support and shape to breasts of the user, the strap 17, 18 assembly being attached to the bra portion at 11 whereby the strap

assembly 17, 18 holds the bra portion to the user, with the chest strap 12,13 extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back;

a back pocket 20 positioned on the back portion 13 of at least one of the chest strap 12,13 and shoulder straps 17, 18 , the back pocket 20 having an opening at 41 and

an item 21 positioned within the back pocket as discussed in col. 1, lines 36-67 and in figure 1 of Knutson.

Art Unit: 3765

. However, the back pocket 20 opening 41 is not formed in the pocket surface to provide access to a pocket interior.

O discloses a garment pocket 120 with an opening 130 on the pocket surface as in figure 5 and has discussed in O paragraph 0025.

Accordingly it would have been obvious to one having ordinary skill in the art to modify the pocket structure of Knutson to construct the pocket as disclosed by O to allow for the storage of other items therein and to construct the pocket so that the opening is on the surface of the pocket allowing for ease in opening and closing the pocket so that items are secure within the pocket.

In regard to claim 2 Knutson discloses the pocket bra assembly of is on a bra that is a sports bra.

In regard to claim 3, the pocket bra assembly of Knutson includes the patch 20 that is positioned on the rear portion 13 of the chest strap 12, 13 as in figure 1 .

In regard to claim 4 the pocket bra assembly of Knutson includes the back pocket 20 is positioned on the rear portion of one of the shoulder straps 17, 18 that extend into the back panel 13 as in figure 1.

Art Unit: 3765

In regard to claim 5 Knutson discloses the pocket bra assembly wherein the rear portion of each of the shoulder straps 17,18 join together to form a central area within 13 as in figure 1 and wherein the back pocket 20 positioned on the central area of back 13.

In regard to claim 6, the Knutson pocket bra assembly includes the back pocket however it does not comprise a closure therein. O discloses a garment pocket 120 with an opening 130 on the pocket surface that includes a zipper closure as in figure 5 and has discussed in O paragraph 0025.

Accordingly it would have been obvious to one having ordinary skill in the art to modify the pocket structure of Knutson to construct the pocket as disclosed by O to allow for the storage of other items therein and to construct the pocket so that the opening is on the surface of the pocket with a zipper closure allowing for ease in opening and closing the pocket so that items are secure within the pocket.

In regard to claim 7, Knutson discloses the pocket bra assembly wherein the back pocket 20 is formed by a patch 25 at 20 connected to the back portion 13 of the at least one of the chest strap 12,13 and shoulder straps 17, 18 by stitching col. 3 lines 57-62 about a part of a perimeter of the patch 25 at 20, a gap at the top edge at 41 in the stitching leaving a portion of the perimeter of the patch unattached, thereby

Art Unit: 3765

forming an opening 41 in figure 1 providing access at 41 to the pocket interior portion formed by the patch.

In regard to claims 8, 12 and 13, Knutson discloses the pocket bra assembly attached to the back of the brassiere. However, Knutson does not disclose that the pocket comprises an internal pocket connected about a perimeter of the opening wherein the internal pocket is defining the pocket interior and is formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps. O discloses a pocket structured as claimed as seen in figure 9 at 920 and in para. (0028). The pocket as claimed in claim 13 is located on the back portion between the chest and shoulder straps as in figure 1. Accordingly it would have been obvious to modify the pocket construction of Knutson to form the pocket as claimed in O to disguise the pocket inclusion on the garment except for the opening and closure as seen on the pocket surface. Knutson and O both have the slit openings along the top edge of the pocket as in claim 12.

In regard to claims 9 and 14 , Knutson discloses the pocket bra assembly wherein the patch is formed of a stretchable material that is the same material as the brassiere itself as discussed in Knutson in col. 2, lines 45-65 to therefore allow for an expansion of the back pocket.

In regard to claims 10 and 15 Knutson discloses the pocket bra assembly wherein the opening is formed adjacent to a side of the patch in that the end of the opening is adjacent to a left or right side of the path and to a top side of the patch of the pocket as broadly claimed in claim 11 and 16 and as seen in figure 1. Applicant has not claimed that the pocket is a side opening pocket.

O discloses the pocket bra assembly as claimed in claim 17 wherein the internal pocket defines the pocket interior, the interior pocket connected about a perimeter of the opening, the internal pocket being separate from the strap assembly as discussed above in regard to claim 8.

In regard to claim 18 Knutson discloses the pocket positioned adjacent to an interior surface of the back portion and of at least one of the chest strap and shoulder straps and the pocket is internal as disclosed by O as discussed above in regard to claim 8.

Response to Arguments

Applicant's arguments filed 12-21-17 have been fully considered but they are not persuasive because applicant's amendments to claim 1 contain new matter that does not have support in the original specification. Therefore, the newly added limitations with the new matter there in have not been considered and the claims were re-examined without the new limitations as originally filed. Therefore the previous prior art rejection still stands as outlined above.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

AMENDMENT AND RESPONSE TO APRIL 5, 2018 OFFICE ACTION

This is a response to the Office Action issued on April 5, 2018 by the U.S. Patent and Trademark Office in connection with the above-identified application. With a three month extension of time, requested herein, a response to the April 5, 2018 Office Action is due October 5, 2018. Accordingly, this response is being timely filed.

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A pocket bra assembly comprising:

a strap assembly including a chest strap and shoulder straps, the chest strap having a front portion configured to be positioned on a front of a user, and a ~~rear~~ back portion configured to be positioned on a back of the user, the shoulder straps each having a front portion configured to be positioned on the front of the user, and a ~~rear~~ back portion configured to be positioned on the back of the user;

a bra portion, the bra portion ~~providing~~ configured to provide support and shape to breasts of the user, the strap assembly being attached to the bra portion whereby the strap assembly holds the bra portion to the user, with the chest strap extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back;

a back pocket formed entirely of stretchable fabric positioned on the back portion of at least one of the chest strap and shoulder straps, the back pocket having an opening formed that is biased in a closed position at rest, providing access to a pocket interior;
and

an item positioned within the back pocket.

2. (Original) The pocket bra assembly of claim 1 wherein the bra is a sports bra.

3. (Currently Amended) The pocket bra assembly of claim 1 wherein the patch is positioned on the ~~rear~~ back portion of the chest strap.
4. (Currently Amended) The pocket bra assembly of claim 1 wherein the back pocket is positioned on the ~~rear~~ back portion of one of the shoulder straps.
5. (Currently Amended) The pocket bra assembly of claim 1 wherein the ~~rear~~ back portion of each of the shoulder straps join together to form a central area, the back pocket positioned on the central area.
6. (Original) The pocket bra assembly of claim 1 wherein the back pocket comprises a closure.
7. (Original) The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about a part of a perimeter of the patch, a gap in the stitching leaving a portion of the perimeter of the patch unattached, thereby forming an opening providing access to the pocket interior portion formed by the patch.
8. (Original) The pocket bra assembly of claim 7 further comprising an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.
9. (Canceled).
10. (Original) The pocket bra assembly of claim 7 wherein the opening is

formed adjacent to a side of the patch.

11. (Original) The pocket bra assembly of claim 7 wherein the opening is formed adjacent to a top of the patch.
12. (Previously Presented) The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about an entire perimeter of the patch, the patch having a slit opening formed in its surface in close proximity to a top of the patch providing access to the pocket interior portion formed by the patch.
13. (Original) The pocket bra assembly of claim 12 further comprising an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.
14. (Canceled).
15. (Original) The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a top of the patch.
16. (Original) The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a side of the patch.
17. (Original) The pocket bra assembly of claim 1 further comprising an internal pocket defining the pocket interior, the interior pocket connected about a perimeter of the opening, the internal pocket being separate from the strap assembly.

18. (Original) The pocket bra assembly of claim 17 wherein the internal pocket is positioned adjacent to an interior surface of the back portion of at least one of the chest strap and shoulder straps.

19. (New) A pocket bra comprising:

a strap assembly including a chest strap and shoulder straps, the chest strap having a front portion configured to be positioned on a front of a user, and a ~~rear~~ back portion configured to be positioned on a back of the user, the shoulder straps each having a front portion configured to be positioned on the front of the user, and a ~~rear~~ back portion configured to be positioned on the back of the user;

a bra portion, the bra portion configured to support and shape ~~to~~ breasts of the user, the strap assembly being attached to the bra portion whereby the strap assembly holds the bra portion to the user, with the chest strap extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back; and

a back pocket formed of stretchable fabric positioned on the back portion of at least one of the chest strap and shoulder straps, the back pocket having a slit forming an opening providing access to a pocket interior, a closure of the opening holding the pocket in a closed position, wherein the closure is adapted to contract to a closed orientation; and

a second pocket on the bra portion or the chest strap.

Amendment to the Specification

Please amend the third paragraph on page 5 as follows:

An even further object of the present invention is to provide a new and improved pocket bra system which is susceptible of a low cost of manufacture with regard to both materials and labor, and which accordingly is then susceptible of low prices of sale to the consuming public, thereby making such pocket bra system economically available to the buying public. It should be understood that the present invention may be formed of any material capable of being used as a bra. These materials may include any sort of flexible fabric, including being formed entirely of the flexible fabric, whether elastic or not, plastics, films, and the like. In some embodiments, certain materials may be stitched or layered into the materials to provide different functionality such as an underwire, radio-frequency shielding materials, elastic materials, and the like.

Please amend the paragraph bridging page 15 and 16 as follows:

Fig. 13 provides a view of an embodiment of a bra having a back pocket. The present embodiment is shown as a

sports bra version, however it should be understood that the back pocket design may be employed on any bra, and may be positioned on the chest strap, similarly to the side pocket embodiment described above. This may be particularly useful on front-open bra designs. In the embodiment shown, two shoulder straps 306, and two sides of the chest strap 301 extend away from a central area 305. On this central area is a pocket 304. The pocket may be formed in any manner and may be defined at its boundary 302 by stitching, a separate pocket material behind the central area 305 material, or by any other structure. An opening 303 to the pocket 304 is shown at a top, but it should be understood that the opening 303 may be on the sides, middle, bottom, or anywhere on the pocket, depending on embodiment. A closure (not shown) may be used to hold the pocket in a closed position. The closure may be any structure capable of holding the pocket opening 303 in a closed position. In a particular embodiment, the closure may bias the opening of the back pocket in a closed position at rest.

Remarks

Applicant thanks the Office for the attention accorded to the present application in the April 5, 2018 Office Action. Claims 1-18 were pending in the subject application.

Without prejudice or disclaimer, claims 1 and 3-5 have been amended, claims 9 and 14 have been canceled, and claim 19 has been added. Upon entry of this amendment, claims 1-8, 10-13, and 15-19 will be pending in the present application.

The amendments to the claims are primarily to correct matters of form and/or clarity in response to the Office's recommendation. The claim amendments and cancellations made herein are made solely to expedite prosecution of the instant application, and should not be construed as acquiescence to the Office's rejections. Applicant reserves the right to pursue the cancelled and/or non-elected subject matter in one or more divisional or continuation applications.

Applicant respectfully traverses all rejections and asserts that the claims are now in condition for allowance.

Objection to the Specification

In the present Office Action, the Examiner objected to the specification as failing to provide proper antecedent basis for the claimed subject matter. Applicant has herein amended the specification to specifically note these limitations. No new matter has been added, and support is found in the specification as discussed below regarding the 35 U.S.C. §112(a) rejection.

Rejection based 35 U.S.C. §112(a)

In the present Office Action, the Examiner rejected claims 1-18 under 35 U.S.C. §112(a) as failing the written description requirement. Specifically, Examiner rejected the claim limitations “an opening formed that is biased in a closed position at rest.” Applicant respectfully disagrees. Initially, it is noted that claim 1 has been amended to now require that the back pocket is made entirely of stretchable fabric. This stretchable fabric is described in the specification as able to bias the opening of a patch pocket in a closed position. This is supported in the specification at, for example:

Regarding biased in the closed position:

P. 11 first full paragraph, second to last sentence; P. 11 second paragraph, 7-8th sentences. Particularly “The slit is adapted to contract to the closed orientation when the handheld device is within or without the chamber.”

P. 14, first paragraph, last sentence: “The upper edge of the patch and the piping are adapted to allow the patch to move away from and back toward the cup between open and closed orientations.”

P. 16 last two sentences of first paragraph, particularly “The closure may be any structure capable of holding the pocket opening in a closed position.” Being held in a closed position is the same as being biased in the closed position.

Fig. 13 shows the opening 303 being biased in the closed position because it is at rest and is closed.

Accordingly, Applicant respectfully asserts that claim 1 and the claims depending therefrom are fully supported in the specification. Accordingly, Applicant respectfully

believes that this rejection has been overcome. Newly added claim 19 is also considered patentable for these reasons.

Rejection based 35 U.S.C. §112(b)

In the present Office Action, the Examiner rejected claims 1-18 under 35 U.S.C. §112(b) as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. In response, Applicant has herein amended claims 1 and 3-5 to change “rear portion” to “back portion” thereby providing antecedent basis. As such, Applicant respectfully asserts that the 35 U.S.C. 112 rejections are now moot, and Applicant respectfully requests that the Examiner remove the rejection.

Rejections under 35 U.S.C. § 103(a)

The Examiner has rejected claims 1-18 under 35 U.S.C. 103(a) as being unpatentable over Knutson (US 6626733) in view of O (US 2010/0000003).

Without prejudice or disclaimer, Applicant has amended claim 1, from which claims 2-18 depend. Applicant respectfully asserts that the combination of Knutson and O do not teach each and every element of this claim. Therefore, the combination of references does not establish a prima facie case of obviousness under 35 U.S.C. 103(a).

As discussed in the December 21, 2017 Office Action Response, it would not be obvious to modify Knutson based on O to teach a pocket formed entirely of fabric with the opening biased in a closed position, as is required by claim 1.

Knutson is a specially designed structure for a specific purpose: to allow a user to insert and reinsert a water bottle into a rear pocket while exercising. By contrast, the present invention serves to keep items held safe within the pocket during exercise. It would not be obvious to modify Knutson to remove these critical structural elements based on O because Knutson would fail to operate as intended.

For example, if the Knutson pocket were replaced with the claimed pocket, the fabric of the pocket would be too flexible, and the fact that it is biased in a closed position would require additional manipulation to try to open it. This would be nearly impossible while wearing the bra with the pocket between the shoulder blades, and would be even harder if the user was trying to exercise at the same time.

Regarding claim 12, Applicant reiterates the above arguments, and further notes that none of Knutson and O teach the pocket formed as a patch connected by stitching about an entire perimeter of the patch, with the patch having a slit formed in its surface as the opening, as required by this claim. Neither reference teaches this. O teaches that the opening is formed by a lack of connection of a top edge of the pocket. (O. Paragraph 20). No slit is discussed. Further, the claimed structure would be even further unusable for the purpose intended by Knutson because of the near impossibility of manipulating this structure to put a water bottle into a pocket behind the back shoulders.

Thus, Applicant respectfully asserts that claims 1-18 are now patentably distinguished from Knutson in view of O. Applicant further asserts that this claim is now in condition for allowance.

Comments on Newly Added Claim 19

Applicant respectfully asserts that claim 19 is patentable for at least the same reasons as claim 1, as discussed herein.

Conclusion

Applicant again thanks the Office for the attention accorded to the present Application in the April 5, 2018 office action. Applicant has herein amended claims 1, and 3-5, claims 9 and 14 have been canceled, and claim 19 has been added. Applicant asserts that based on the amendments and comments presented herein, all of the pending claims are in condition for allowance. Early and favorable action is respectfully requested.

The Examiner is invited to telephone the undersigned, Applicant's attorney of record, to facilitate advancement of the present application.

Respectfully submitted,

/David J. Connaughton, Jr./

THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies. If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above. If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)". For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Maintenance fees are due in utility patents issuing on applications filed on or after Dec. 12, 1980. It is patentee's responsibility to ensure timely payment of maintenance fees when due. More information is available at www.uspto.gov/PatentMaintenanceFees.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)

(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 30 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A pocket bra assembly comprising:

a strap assembly including a chest strap and shoulder straps, the chest strap having a front portion configured to be positioned on a front of a user, and a back portion configured to be positioned on a back of the user, the shoulder straps each having a front portion configured to be positioned on the front of the user, and a back portion configured to be positioned on the back of the user;

a bra portion, the bra portion configured to provide support and shape to breasts of the user, the strap assembly being attached to the bra portion whereby the strap assembly holds the bra portion to the user, with the chest strap extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back;

a back pocket formed entirely of stretchable fabric positioned on the back portion of at least one of the chest strap and shoulder straps, the back pocket having an opening formed that is biased in a closed position at rest, providing access to a pocket interior;
and

an item positioned within the back pocket.

2. (Original) The pocket bra assembly of claim 1 wherein the bra is a sports bra.

3. (Currently Amended) The pocket bra assembly of claim 1 wherein the ~~patch~~ back pocket is positioned on the back portion of the chest strap.
4. (Previously Presented) The pocket bra assembly of claim 1 wherein the back pocket is positioned on the back portion of one of the shoulder straps.
5. (Previously Presented) The pocket bra assembly of claim 1 wherein the back portion of each of the shoulder straps join together to form a central area, the back pocket positioned on the central area.
6. (Original) The pocket bra assembly of claim 1 wherein the back pocket comprises a closure.
7. (Currently Amended) The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about a part of a perimeter of the patch, a gap in the stitching leaving a portion of the perimeter of the patch unattached, thereby forming an opening providing access to the pocket interior ~~portion~~ formed by the patch.
8. (Original) The pocket bra assembly of claim 7 further comprising an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.
9. (Canceled).
10. (Original) The pocket bra assembly of claim 7 wherein the opening is

formed adjacent to a side of the patch.

11. (Original) The pocket bra assembly of claim 7 wherein the opening is formed adjacent to a top of the patch.
12. (Currently Amended) The pocket bra assembly of claim 1 wherein the back pocket is formed by a patch connected to the back portion of the at least one of the chest strap and shoulder straps by stitching about an entire perimeter of the patch, the patch having a slit opening formed in its surface in close proximity to a top of the patch providing access to the pocket interior ~~portion~~ formed by the patch.
13. (Original) The pocket bra assembly of claim 12 further comprising an internal pocket connected about a perimeter of the opening, the internal pocket defining the pocket interior and formed such that it is positioned between the patch and the one of the back portion of the chest strap and the shoulder straps.
14. (Canceled).
15. (Original) The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a top of the patch.
16. (Original) The pocket bra assembly of claim 12 wherein the opening is formed adjacent to a side of the patch.
17. (Original) The pocket bra assembly of claim 1 further comprising an internal pocket defining the pocket interior, the interior pocket connected about a perimeter of the opening, the internal pocket being separate from the strap assembly.

18. (Original) The pocket bra assembly of claim 17 wherein the internal pocket is positioned adjacent to an interior surface of the back portion of at least one of the chest strap and shoulder straps.

19. (Previously Presented) A pocket bra comprising:

a strap assembly including a chest strap and shoulder straps, the chest strap having a front portion configured to be positioned on a front of a user, and a back portion configured to be positioned on a back of the user, the shoulder straps each having a front portion configured to be positioned on the front of the user, and a back portion configured to be positioned on the back of the user;

a bra portion, the bra portion configured to support and shape the breasts of the user, the strap assembly being attached to the bra portion whereby the strap assembly holds the bra portion to the user, with the chest strap extending from a first side of the bra portion towards the user's back and extending from a second opposite side of the bra portion towards the user's back; and

a back pocket formed of stretchable fabric positioned on the back portion of at least one of the chest strap and shoulder straps, the back pocket having a slit forming an opening providing access to a pocket interior, a closure of the opening holding the pocket in a closed position, wherein the closure is adapted to contract to a closed orientation; and

a second pocket on the bra portion or the chest strap.

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment is 0 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.
