(57) **ABSTRACT**

A sports top is adapted for releasably holding a fluid container. The sports top includes a body fabric for being worn on an upper torso of a wearer. The body fabric has a front and back joined together and defining a pair of arm-holes and a neckhole. A pocket panel is formed with the back of the body fabric, and cooperates with the body fabric to form a pocket. The pocket has an open mouth, closed sides, and a bottom. A shape-retaining insert opens the mouth of the pocket such that the fluid container is readily inserted by the wearer into the pocket of the sports top during wear.
