Obvious 68
11.1 Independent Claim 1 68
11.2 Dependent Claim 2 94
11.3 Dependent Claim 3: "The method of claim 1 wherein converting the command into corresponding programming code to control the media player includes using information in a look-up table." 97
11.4 Dependent Claim 4: "The method of claim 3 wherein the look-up table stores a plurality of specific commands, each of which represents, respectively, a corresponding command for a different media player." .. 98
11.5 Dependent Claim 5: "The method of claim 1 wherein the universal command represents an instruction to play the video content, to stop playing the video content or to pause playing the video content." 100
11.6 Dependent Claim 6: "The method of claim 1 wherein the video content is an interactive video game." 100
11.7 Dependent Claim 7: "The method of claim 1 wherein the video content is streaming media." 102
11.8 Dependent Claim 8: "The method of claim 1 wherein the synchronization code is uniquely associated with the display device on which the video content is to be played." 103
11.9 Dependent Claim 9: "The method of claim 8 wherein the synchronization code is different from an IP address associated with the display device and is different from a MAC address associated with the display device." 103
11.10 Dependent Claim 10: "The method of claim 8 wherein assigning a synchronization code includes assigning a randomly generated code to the display device each time the display device connects to the server system." 104
11.11 Independent Claim 11 105
11.12 Dependent Claim 12: [12A]-[12C]: "The system of claim 11 including: a library storing protocols or application programming interfaces, wherein the server system is configured to check the identity of the media player identified in the one or more signals from the personal computing device, load an appropriate set of protocols or application programming interfaces from the library based on the identity of the media player, and convert the command from the personal computing device into a corresponding programming code to control the media player." 109

11.13 Dependent Claim 13: "[13A]-[13C]: "The system of claim 11 including: a look-up table storing a plurality of commands each of which is for a particular type of media player, wherein the server system is configured to convert the command into corresponding programming code to control the media player based on information in the look-up table." 109

11.14 Dependent Claim 14: "The system of claim 11 wherein the look-up table stores a correspondence between the universal command and a plurality of specific commands, each of which is for a different media player.". 109

11.15 Dependent Claim 15: "The system of claim 14 the server system is configured to convert the universal command by selecting from among the plurality of specific commands stored in the look-up table." 110

11.16 Dependent Claim 16: "The system of claim 11 wherein the universal command represents an instruction to play the video content, to stop playing the video content or to pause playing the video content." 110

11.17 Dependent Claim 17: "The system of claim 11 wherein the video content is an interactive video game." 110

11.18 Dependent Claim 18: "The system of claim 11 wherein the video content is streaming media." 111

11.19 Dependent Claim 19: "The system of claim 11 wherein the synchronization code is uniquely associated with the display device on which the video content is to be played." 111

11.20 Dependent Claim 20: "The system of claim 19 wherein the synchronization code is different from an IP address associated with the display device and is different from a MAC address associated with the display device." 111

11.21 Dependent Claim 21: "The system of claim 19 wherein the server system is configured to assign as the synchronization code a randomly generated code each time the display device connects to the server system." 111

11.22 Independent Claim 22..... 112

11.23 Dependent Claim 23: "The method of claim 22 wherein the display device comprises a television set with a display screen." 117

11.24 Dependent Claim 24: "The method of claim 22 wherein the display device comprises a laptop or personal computer." 117

11.25 Dependent Claim 25: "The method of claim 22 wherein each of the first and second commands represents an instruction to play the respective video file, to stop playing the respective video file or to pause playing the

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
