A guest check presenter for a food establishment is provided. The guest check presenter includes a holder for holding a guest check information and a wireless communication device attached to the holder and adapted to communicate with a wireless mobile device of the guest. The wireless communication device contains a guest check identifier that identifies the guest check. The guest check identifier is adapted to be retrieved by the wireless mobile device of the guest for use in providing various useful mobile services that are associated with the food establishment or the food consumed by the guest. Thus, the check presenter is used as a platform for providing such mobile services as mobile payment of the guest check and loyalty coupons.
