

BITCOIN MINING

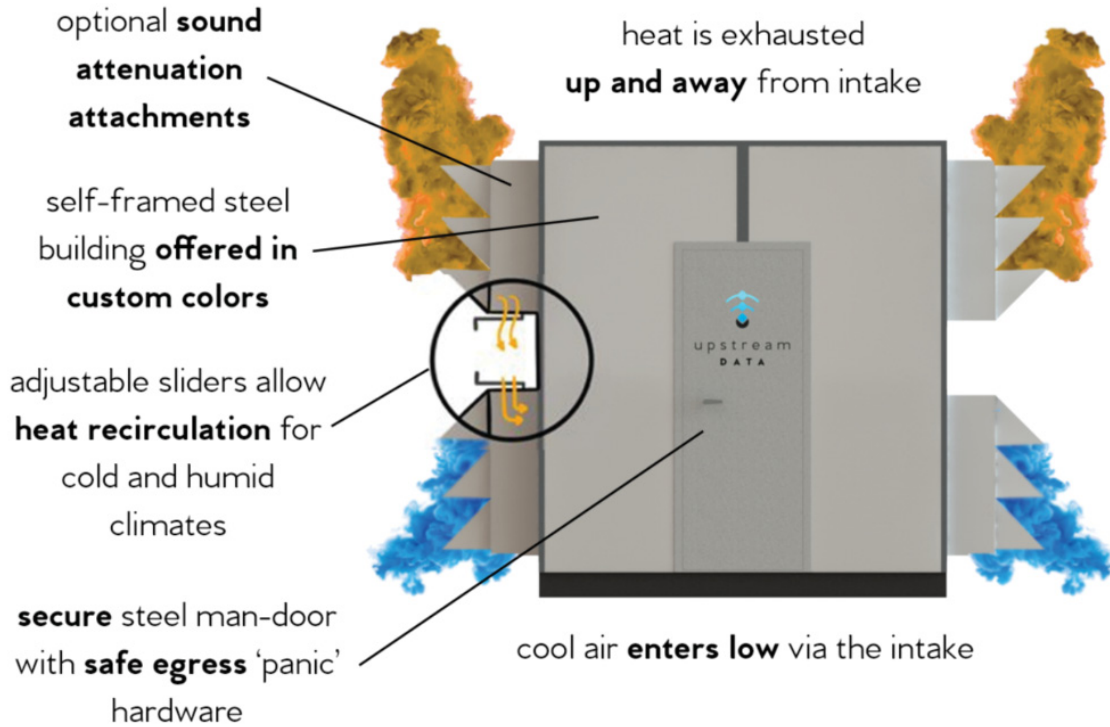

# High Performance Air Cooling Technology

*"Our patented air cooled loadcenters are unique in the market with a focus on high performance and robustness in all environmental conditions, whether it is the blistering heat of west Texas or frigid, unforgiving conditions of the Canadian prairies. We offer sizes for every application with built-in safety and performance features."*

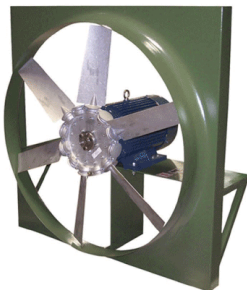

- Steve Barbour, President

# Interior Features

# Exterior Features

🔥 High powered **intake booster** fan for *hot climates* 🔥

**Positive static air pressure** prevents environmental ingress and improves cooling

**19,500 CFM** for every 24x servers

**Direct drive, belt-less motor** for minimal maintenance

Motor is located in cold aisle and **will not overheat from server exhaust**

# High Pressure Cold Aisle Booster Fans!

## WHY OUR LOADCENTERS OUTPERFORM THE COMPETITION:

TWO LAYERS OF FILTRATION

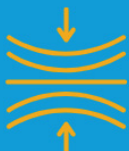

SWITCHGEAR MAINS INCLUDED

PASSIVE HEAT RECIRC FOR COLD CLIMATES

DIRECT DRIVE BOOSTER FANS LOCATED IN COLD AISLE NEVER OVERHEAT

POSITIVE AIR PRESSURE FOR OPTIMAL COOLING

VARIABLE SPEED DRIVES OPTIMIZE POWER USAGE

SAFE WORKING SPACE & EMERGENCY EGRESS

CERTIFIED TO NATIONAL BUILDINGS AND ELECTRICAL STANDARDS

### Get a Quote

We optimize power generation in both the utility power industry and the oil and gas sector.
