FRESH HANDMADE

HERE'S THE SKINNY ON LUSH'S SKINCARE!

LUSH's pioneering approach to skincare marks an exciting evolutionary high point in "natural beauty." Each cleanser, toner and moisturizer contains "natural" ingredients – carefully blended plants, flower absolutes and the finest essential oils. In addition, in selected products LUSH has incorporated fresh, organic, nutritious fruits and vegetables in their whole form to harness the antioxidant, protective benefits of the vitamins, minerals, proteins and enzymes.

For twenty years the founders of LUSH have explored skincare regimes, evaluating the complexions of people all over the world, from the Arctic Circle to Queensland's beaches, and collating information. The result of a lifetime spent considering the skin - discussing (sometimes arguing) with leading experts in all fields of living tissue, studying, experimenting, working with ingredients, developing formulations, testing (on humans) and debating within the company – is encapsulated in a practical series of cleansers, toners and moisturizers developed for real people with real lives.

"We don't aim to create products limited to a 'skin type', we aim to create products that respond to a skin's needs. Also, we believe people already have a clear idea of the way they want their skin to feel, how they want to care for it and how they want to clean it. They rely on us to create these effects, and we do it through attention to every tiny detail, even the fragrances used in the range are formulated for the effect on the skin and the senses."
