PETITIONER’S MOTION FOR SUMMARY JUDGMENT

Petitioner Cloudforce LLC, by and through counsel, hereby moves the Board for an order pursuant to Fed. R. Civ. P. 56 granting summary judgment in its favor on the grounds that: (i) no genuine issue as to any material fact exists in the captioned proceeding, (ii) Petitioner has priority use of its CLOUDFORCE mark, and (iii) the marks at issue are confusingly similar as a matter of law.

This motion is based on the pleadings, including Respondent’s Answer, Petitioner’s application, the Affidavit of Heba Eldien and exhibits thereto, and Petitioner’s accompanying memorandum of law.

Respectfully submitted,

SHULMAN ROGERS, P.A.

**MEMORANDUM OF POINTS AND AUTHORITIES IN SUPPORT OF
PETITIONER’S MOTION FOR SUMMARY JUDGMENT**

Petitioner Cloudforce LLC, by and through counsel, hereby submits this Memorandum in Support of its Motion for Summary Judgment on its Cancellation Proceeding against trademark Registration No. 7,300,716 for the mark CLOUDFORCE ONE, owned by Respondent Cloudflare, Inc.

I. INTRODUCTION

Petitioner moves to cancel Respondent’s registered trademark for CLOUDFORCE ONE covering “computer network security consultancy.” Petitioner is being damaged by Respondent’s registered trademark because the USPTO has refused registration of Petitioner’s pending trademark application for CLOUDFORCE under Section 2(d) of the Trademark Act due to Respondent’s registration of CLOUDFORCE ONE. In order to succeed on its Motion for Summary Judgment, Petitioner must prove that it has standing and that there are valid grounds why Respondent’s registration should not continue to be registered. *See e.g., Cunningham v. Laser Golf Corp.*, 222 F.3d 943, 945 (Fed. Cir. 2000) (“The party seeking cancellation must prove two

elements: (1) that it has standing; and (2) that there are valid grounds for canceling the registration.”).

This Motion for Summary Judgment is based on: (i) Petitioner’s priority of use of its CLOUDFORCE mark in commerce and (ii) a likelihood of confusion between Petitioner’s service mark CLOUDFORCE (Ser. No. 98/399919) and Respondent’s service mark CLOUDFORCE ONE (Reg. No. 7,300,716) both marks used in connection with competitive computer consulting services. As a direct result, Respondent’s CLOUDFORCE ONE mark (i) consists of or comprises a mark which so resembles a mark previously used in the United States and not abandoned, as to be likely, when used on or in connection with Respondent’s services, to cause confusion, or to cause mistake, or to deceive (Count I) or (ii) is likely to cause confusion, or to cause mistake, or to deceive as to the affiliation, connection, or association of Respondent with Petitioner, or as to the origin, sponsorship, or approval of Respondent’s services, or commercial activities by Petitioner (Count II).

Petitioner will first prove as a matter of law that it has priority of use in its mark over Respondent’s date of first use. Petitioner will then prove as a matter of law that the respective marks are likely to cause consumer confusion.

II. STANDING.

The Federal Circuit has emphasized that there are only two judicially-created requirements for standing in an inter-parties case: a petitioner must have (1) a real interest in the proceedings, and (2) a reasonable basis for the belief of damages. *Cunningham, supra at 945* (“Standing is the more liberal of the two elements and requires only that the party seeking cancellation believe that it is likely to be damaged by the registration.”). See also Section 13 of the Trademark Act, 15 U.S.C. § 1063; *Golden Gate Salami Co. v. Gulf States Paper Corp.*, 332 F.2d 184, 188 (C.C.P.A.

1964). Thus, a petitioner need only prove a good faith belief that it is likely to be damaged by the registration on the Register. *See also International Order of Job's Daughters v. Lindeburg Co.*, 727 F.2d 1087, 1091, (Fed. Cir. 1984).

Here, Petitioner's federal trademark application is refused because the USPTO believes that Petitioner's mark CLOUDFORCE is likely to cause consumer confusion with Respondent's mark CLOUDFORCE ONE. Petitioner's pleaded application is extant, owned by Petitioner, and said refusal is of record¹ and Petitioner has plead that it likely will be damaged if Respondent's registration for CLOUDFORCE ONE is not cancelled,² Thus, Petitioner has demonstrated its standing to bring this cancellation proceeding.

III. LEGAL STANDARD FOR SUMMARY JUDGMENT

The Federal Rules of Civil Procedure provide for summary judgment where "there is no genuine issue as to any material fact and that the moving party is entitled to judgment as a matter of law." Fed. R. Civ. P. 56(c). In 1986, the United States Supreme Court decided three cases which collectively made manifest that summary judgment is an integral and important part of the Federal Rules mandating a "just, speedy, and inexpensive determination of every action." Fed. R. Civ. P. 1. *See also, Celotex Corp. v. Catrett*, 477 U.S. 317 (1986); *Matsushita Electric Indus. Co. v. Zenith Radio Corp.*, 475 U.S. 574 (1986); and *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242 (1986). In *Celotex*, the Supreme Court held that the "summary judgment procedure is properly regarded not as a disfavored procedural shortcut, but rather as an integral part of the Federal Rules as a whole." *Celotex*, 477 U.S. at 327; *see also Anderson*, 477 U.S. at 250 ("there is no issue for

¹ *See Lipton Inds., Inc. v. Ralston Purina Co.*, 670 F.2d 1024 (C.C.P.A. 1982).

² *See Wilson v. Delaunay*, 245 F.2d 877 (C.C.P.A. 1957).

trial unless there is sufficient evidence favoring the non-moving party for a jury to return a verdict for that party”).

In *Matsushita*, the Court held that where a motion for summary judgment has been presented, the non-moving party must “do more than simply show that there is some metaphysical doubt as to the material facts.” *Matsushita*, 475 U.S. at 586. Instead, the non-moving party “must set forth specific facts showing there is a genuine issue for trial.” *Id.* (quoting Rule 56(e) Fed. R. Civ. P.). The Court explained there can be no “genuine issue for trial” in circumstances where “the record taken as a whole could not lead a rational trier of fact to find for the non-moving party.” *Id.* at 587. Following the trilogy of Supreme Court cases, the Federal Circuit has held that likelihood of confusion between two marks under Section 2(d) are questions of law to be decided by the Board. *See generally, Weiss Assocs., Inc. v. HRL Assocs., Inc.*, 902 F.2d 1546, 1547 (Fed. Cir. 1990) (“The likelihood of confusion is a question of law to be decided by the court.”). *See also Pure Gold, Inc. v. Syntex (U.S.A.), Inc.*, 739 F.2d 624, 636 (Fed. Cir. 1984) (likelihood of confusion is an issue well-suited for summary judgment); *Sweats Fashions v. Pannill Knitting Co., Inc.*, 833 F.2d 1560, 1565 (Fed. Cir. 1987). Moreover, 37 C.F.R. § 2.116(a) makes Fed. R. Civ. P. 56 applicable to all *inter partes* proceedings before the Board. In fact, the Board favors the granting of summary judgment in appropriate cases, as it favors judicial economy. *Univ. Book Store v. Univ. of Wis. Board of Regents*, 33 USPQ2d 1385 (TTAB 1994).

Thus, it is clear that the Board may decide upon summary judgment that Petitioner has priority of use, and even whether CLOUDFORCE ONE is confusingly similar to CLOUDFORCE.

IV. UNDISPUTED FACTS WITH RESPECT TO PRIORITY OF USE.

Petitioner is the owner of service mark CLOUDFORCE on file with the USPTO as Ser. No. 98/399919 covering information technology (IT) cloud technology consulting services. The

mark was first used in commerce on or before November 1, 2019 in connection with such services (see Exhibit 1, Affidavit of Heba Eldien, Petitioner’s Vice President of Finance), and has been used continuously since then. In its trademark application for CLOUDFORCE ONE (Ser. No. 97/469822), Respondent declared that its date of first use was June 21, 2022 and its date of first use in commerce was February 17, 2023.

When discussing inherently distinctive marks, it is blackletter law that ownership is governed by priority of use. *See e.g.*, 15 U.S.C. § 1127; *see also*, *Aktieselskabet AF 21 November 2001 v. Fame Jeans Inc.*, 525 F.3d 8 (D.C. Cir. 2008) (“The 1988 amendments to the Lanham Act codified a standard of ‘use in commerce,’ necessary for a valid trademark registration, which means ‘the bona fide use of a mark in the ordinary course of trade.’”). The proper test for unregistered trademarks is the well-established common law principle of “first in time, first in right,” that rewards actual and continuous use of a mark in commerce as between market competitors. *See, e.g.*, *Ford Motor Co. v. Summit Motor Prods.*, 930 F.2d 277, 292 (3rd Cir. 1991) (holding that actual and continuous use is required to acquire and retain a protectable interest in a mark, stating that the “first to use a mark on a product . . . in a . . . market acquires rights in the mark in that market.”), *citing Tally-Ho, Inc. v. Coast Cmty Coll. Dist.*, 889 F.2d 1018, 1022-23 (11th Cir. 1989).

Moreover, acquiring a federally registered trademark does not trump “first in time”. *See e.g.*, *In re Beatrice Foods Co.*, 429 F.2d 466, 472-73 (C.C.P.A. 1970) (“[Federal] registrations would not, in and of themselves, create any new right to use the trademark or to assert rights based on ownership of the trademark itself. Rights of trademark ownership, for example, the right to enjoin another from use of the mark, must be based upon actual use . . .”).

The facts here are uncontested. Petitioner first used the mark CLOUDFORCE in commerce in connection with computer consulting services thirty-nine months prior to Respondent first using the mark CLOUDFORCE ONE in commerce in connection with computer consulting services. Not only has Petitioner used its mark first in commerce, but has used it continuously in commerce covering its computer consulting services. For this reason, the Board should grant summary judgment in Petitioner's favor respecting priority of use.

V. UNDISPUTED FACTS WITH RESPECT TO LIKELIHOOD OF CONFUSION.

A. Opening Statement.

The Board should grant Petitioner's Motion for Summary Judgment and sustain the instant cancellation proceeding because there is a substantial likelihood of confusion between Petitioner's CLOUDFORCE mark and Respondent's CLOUDFORCE ONE mark. This conclusion is supported by the Board's decisions and the standards set forth in *In re E.I. DuPont DeNemours & Co.*, 476 F.2d 1357 (C.C.P.A. 1973); *see also Toro v. Torohead, Inc.*, 61 USPQ2d 1164 (TTAB 2001).

In *DuPont* the Court of Customs and Patent Appeals identified thirteen (13) evidentiary factors (called the DuPont factors) that should be evaluated in determining whether a likelihood of confusion exists between marks. As is clear from the decision itself, these factors are not listed in order of merit. The significance of each factor and its relevance varies from case to case. *DuPont*, 476 F.2d at 1361. Indeed, it has often been stated that while all of these factors may be relevant, they need not all be considered "when some are dispositive." *See, American Cyanamid Co. v. S.C. Johnson & Son, Inc.*, 729 F. Supp. 1018, 1021 (D.N.J. 1989), *citing, Freixenet, S.A. v. Admiral Wine & Liquor Co.*, 731 F.2d 148, 151-52 (3rd Cir. 1984).

While, likelihood of confusion is determined on a case-by-case basis by applying the DuPont factors, “not all of the DuPont factors are relevant or of similar weight in every case.” *In re Guild Mortg. Co.*, 912 F.3d 1376, 1379 (Fed. Cir. 2019) (quoting *In re Dixie Rests., Inc.*, 105 F.3d 1405, 1406 (Fed. Cir. 1997)). Even though certain DuPont factors may not be relevant, there are generally two key considerations that are always relevant in any likelihood of confusion analysis: (1) comparing the marks and (2) comparing the parties’ services. *In re I.Am.Symbolic* at 1322. (quoting *Herbko Int’l, Inc. v. Kappa Books, Inc.*, 308 F.3d 1156, 1164-65 (Fed. Cir. 2002)). As such, Petitioner shall focus on those factors most relevant to this case. Besides the above two factors, Petitioner also will focus on the similarity of established, likely-to-continue trade channels.

B. Comparing the Respective Marks.

Marks are first compared in their entireties for similarities in appearance, sound, connotation, and commercial impression. *In re Charger Ventures LLC*, 64 F.4th 1375, 1380, (Fed. Cir. 2023) (citing *Coach Servs., Inc. v. Triumph Learning LLC*, 668 F.3d 1356, 1368 (Fed. Cir. 2012)). Nonetheless, “[s]imilarity in any one of these elements may be sufficient to find the marks confusingly similar.” *In re Inn at St. John’s, LLC*, 126 USPQ2d 1742, 1746 (TTAB 2018) (citing *In re Davia*, 110 USPQ2d 1810, 1812 (TTAB 2014)), *aff’d per curiam*, 777 F. App’x 516, 2019 BL 343921 (Fed. Cir. 2019). When comparing marks, “[t]he proper test is not a side-by-side comparison of the marks, but instead whether the marks are sufficiently similar in terms of their commercial impression such that [consumers] who encounter the marks would be likely to assume a connection between the parties.” *Cai v. Diamond Hong, Inc.*, 901 F.3d 1367, 1373 (Fed. Cir. 2018) (quoting *Coach Servs.* at 1368). The proper focus is on the recollection of the average purchaser, whose mind is not perfect, but retains just a general rather than specific impression of

trademarks. *In re Ox Paperboard, LLC*, 2020 USPQ2d 10878, at *4 (TTAB 2020) (citing *In re Bay State Brewing Co.*, 117 USPQ2d 1958, 1960 (TTAB 2016)).

Further, in *Queen Mfg. Co. v. Isaac Gensberg & Bros.*, 25 F.2d 284 (8th Cir. 1928) the Court stated that “in order to constitute an infringement it is not necessary that the trademark be literally copied. Neither is it necessary that every word be appropriated. There may be infringement where the substantial and distinctive part of the trademark is copied or appropriated.” The same is true here. Moreover, in most composite marks, some part is more “dominant” in its total impact on the average purchaser, over and above the remaining elements in the mark. When the dominant portions of the two marks are exactly the same, then confusion is likely, notwithstanding any otherwise differences. *See, e.g., Vogue Co. v. Thompson-Hudson Co.*, 300 F. 509 (6th Cir. 1924); *see also, Century 21 Real Estate Corp. v. Sandlin*, 846 F.2d 1175, 1179 (9th Cir. 1988) (finding CENTURY INVESTMENTS & REALTY confusingly similar to CENTURY 21 because of the dominance of the word CENTURY).

Here, Petitioner’s mark is CLOUDFORCE in standard character form and Respondent’s mark is CLOUDFORCE ONE in standard character form. In this case, the applied-for mark, CLOUDFORCE, and the first word in Respondent’s mark, CLOUDFORCE ONE, are identical in appearance and sound and create a highly similar commercial impression. Marks may be confusingly similar in appearance where similar terms or similar parts of terms appear in the compared marks and create a similar overall commercial impression. *See Crocker Nat’l Bank v. Canadian Imperial Bank of Com.*, 228 USPQ 689, 690-91 (TTAB 1986) (holding COMMCASH and COMMUNICASH confusingly similar), *aff’d sub nom. Canadian Imperial Bank of Com. v. Wells Fargo Bank, N.A.*, 811 F.2d 1490 (Fed. Cir. 1987). Respondent cannot avoid a likelihood of confusion with Petitioner’s CLOUDFORCE mark where it has appropriated the dominant

portion of Petitioner's mark as the "substantial and distinctive" portion of its CLOUDFORCE ONE mark.

Indeed, Respondent applied for the non-stylized word mark CLOUDFORCE ONE. Respondent's mark does not contain a design feature or any stylization that would aid it in distinguishing it from Petitioner's CLOUDFORCE mark. *See e.g., Jockey Int'l Inc. v. Mallory & Church Corp.*, 25 USPQ2d 1233 (TTAB 1992) (ELAAN for neckties confusingly similar to ELANCE "unrestricted as to stylization" for underwear). In short, since Respondent's mark is unrestricted as to stylization, any minor differences which may exist cannot erase the obvious similarities of commercial impression generated by use of exactly the same dominant word CLOUDFORCE in Respondent's mark.

Not only is CLOUDFORCE the dominant portion of the respective marks, it is also the first word in Respondent's mark. Consumers are generally more inclined to focus on the first word, prefix, or syllable in any trademark or service mark. *See Palm Bay Imps., Inc. v. Veuve Clicquot Ponsardin Maison Fondée En 1772*, 396 F.3d 1369, 1372 (Fed. Cir. 2005) (finding similarity between VEUVE ROYALE and two VEUVE CLICQUOT marks in part because "VEUVE . . . remains a 'prominent feature' as the first word in the mark and the first word to appear on the label"); *Century 21 Real Estate Corp. v. Century Life of Am.*, 970 F.2d 874, 876 (Fed. Cir. 1992) (finding confusing similarity between CENTURY 21 and CENTURY LIFE OF AMERICA in part because "consumers must first notice th[e] identical lead word"). As CLOUDFORCE is the first word in the parties' respective marks, this similarity heightens the likelihood of confusion between these marks. *Presto Prods. V. Nice-Pak Prods.*, 9 USPQ2d 1895, 1897 (TTAB 1988) (holding KID WIPES confusingly similar to KID STUFF in part due to identical first words in marks, which is most likely to be impressed upon the mind of a purchaser

and remembered). Since the word CLOUDFORCE is identical in all respects in each mark, and the first word in the parties' respective marks, the marks are likely to appear similar to the relevant consumers. Thus, the word CLOUDFORCE is likely to have a lasting impression on the consumer such that a consumer seeing both marks is likely to focus on the first word CLOUDFORCE and incorrectly presume that the companies are related or that the respective services emanate from the same source.

Moreover, there is a long, unbroken line of cases that hold that a junior user taking another's mark and adding to it a nominal word, is not sufficient to avoid confusion. *See, generally, In re Integrated Embedded*, 120 USPQ2d 1504 (TTAB 2016) (holding BARR GROUP confusingly similar to BARR both for engineering services); *In re Jump designs*, 80 USPQ2d (TTAB 2006) (JUMP DESIGNS confusingly similar to JUMP both for furniture); *In re Denisi*, 225 USPQ 624 (TTAB 1985) (PERRY'S PIZZA confusingly similar to PERRY'S both for restaurant services); *see also, Hunter Indus., Inc. v. The Toro Co.*, 110 USPQ2d 1651, 1660, 2014 WL 1649332 (TTAB 2014) (holding PRECISION DISTRIBUTION CONTROL likely to cause consumer confusion with PRECISION, both for irrigation equipment because dominant part of the marks are identical). Similarly, in *In re El Torito Rests., Inc.*, 9 USPQ2d 2002 (TTAB 1988) the Board stated that MACHO COMBOS was likely to cause confusion with MACHOS, both for food products because applicant's mark "consists of registrant's entire mark, to which a [nominal] word has been added." *Id.* at 2004.

The only distinguishing feature (if it can be called that) in Respondent's mark is the additional word ONE. Although courts have held that adding the word ONE to another's mark does not change the commercial impression, and average purchasers are still likely to be confused. *See e.g., Qwest Communs. Int'l v. OneQwest*, NO. CO2-829R, 2002 U.S. Dist. LEXIS 25469

(W.D. Wash. 2002) (“OneQwest has simply inserted the word ‘One’ in front of ‘Qwest.’ . . . Infringement is not avoided merely by adding a term to an existing mark. The law does not permit such minor variations.”).

In the instant case, Respondent has merely added the nominal word ONE to the dominant portion of Petitioner’s mark CLOUDFORCE, which adds nothing to distinguishing Respondent’s mark. Put simply, adding the word ONE to CLOUDFORCE does not make it distinguishable from Petitioner’s CLOUDFORCE mark. Consumers still are likely to be confused. For all of the above reasons, CLOUDFORCE ONE is confusingly similar to Petitioner’s CLOUDFORCE mark as a matter of law.

C. Comparing the Respective Services.

In determining likelihood of confusion, the compared services need not be identical or even competitive to find a likelihood of confusion. *See On-line Careline Inc. v. Am. Online Inc.*, 229 F.3d 1080, 1086 (Fed. Cir. 2000); *Recot, Inc. v. Becton*, 214 F.3d 1322, 1329 (Fed. Cir. 2000). They need only be “related in some manner and/or if the circumstances surrounding their marketing are such that they could give rise to the mistaken belief that [the services] emanate from the same source.” *Coach Servs.* at 1369 (quoting *7-Eleven Inc. v. Wechsler*, 83 USPQ2d 1715, 1724 (TTAB 2007); *see also, Made in Nature, LLC v. Pharmavite LLC*, 2022 USPQ2d 557, at *44 (TTAB 2022) (quoting *In re Jump Designs LLC*, 80 USPQ2d 1370, 1374 (TTAB 2006)).

In *Safety-Kleen Corp. v. Dresser Indus., Inc.*, 186 USPQ 476 (C.C.P.A. 1975), the Court of Customs and Patent Appeals said “The law has long protected the legitimate interests of trademark owners and consumers from confusion among noncompetitive, but related, [services] bearing confusingly similar marks.” (citing *Aunt Jemima Mills Co. v. Rigney & Co.*, 247 F. 407 (2d Cir. 1917); *Yale Electric Corp. v. Robertson*, 26 F.2d 972 (2d Cir. 1928)). *See also W.E.*

Kautenberg Co. v. Ecko Prods. Co., 251 F.2d 628, 631 (C.C.P.A. 1958) (ECKO in connection with kitchen utensils held confusingly similar to WECKO as applied to mops and related products). Moreover, when marks are substantially identical, the respective services need only be somehow related in order for consumer confusion to be likely. *In re Hyper Shoppes (Ohio) Inc.*, 837 F.2d 483 (Fed. Cir. 1988) (BIGG'S (stylized) for grocery store and general merchandise store services held likely to be confused with BIGG'S and design for furniture); *In re Golden Griddle Pancake House Ltd.*, 17 USPQ2d 1074 (TTAB 1990) (GOLDEN GRIDDLE PANCAKE HOUSE (with PANCAKE HOUSE disclaimed) for restaurant services held likely to be confused with GOLDEN GRIDDLE for table syrup); *In re Mucky Duck Mustard Co., Inc.*, 6 USPQ2d 1467 (TTAB 1988) (MUCKY DUCK and duck design for mustard held likely to be confused with THE MUCKY DUCK and duck design for restaurant services).

In fact, the test for likelihood of confusion encompasses confusion as to “source, endorsement, affiliation or sponsorship.” *Wendy's Int'l, Inc. v. Big Bite, Inc.*, 223 USPQ 35 (S.D. Ohio 1983). This is often referred to as the “related goods or services” rule. *See e.g., Nat'l Cable Television Ass'n Inc. v. Am. Cinema Editors Inc.*, 19 USPQ2d 1424, 1430 (Fed. Cir. 1991). “Related” does not mean that there is necessarily any physical relationship between the goods or services identified by the conflicting marks. Rather, it means that the marks as used are “related” in the mind of the consuming public. *Herbko Int'l Inc. v. Kappa Books Inc.*, 64 USPQ2d 1375, 1381 (Fed. Cir. 2002) (“Even if the goods and services are not identical or specifically related in kind, they may be sufficiently related in the mind of the consuming public to cause confusion concerning the source or origin of the goods and services.”). As the Ninth Circuit stated in *Fleischmann Distilling Corp. v. Maier Brewing Co.*, 136 USPQ 508, 517 (9th Cir. 1963), “[t]he

use need not be the same as, nor one in competition with the original use. The question is, are the uses related so that they are likely to be connected in the mind of a prospective purchaser?"

In the instant case, Petitioner's mark CLOUDFORCE is used in connection with "IT cloud consulting services" in Class 42. Respondent's mark is CLOUDFORCE ONE and used for "computer network security consultancy" in Class 42. Here, the respective services are closely related because they typically are provided by the same technology companies traveling through the same channels of trade to the same class of consumer. Petitioner herewith submits twenty-one currently registered and valid trademark registrations for marks that are used on both IT cloud consulting and computer network security consultancy. See Exhibit 2.³ Petitioner's evidence demonstrates that "IT cloud consulting services" and "computer network security consultancy" are commonly provided together and commonly originate under the same mark from the same source. The attached evidence establishes: (i) that the same entity commonly provides IT cloud consulting services and computer network security consultancy services and markets the services under the same mark, (ii) that the relevant services are sold or provided through the same trade channels and used by the same classes of consumers in the same fields of use, and (iii) that the services are similar or complementary in terms of purpose or function. *In re Toshiba Med. Sys. Corp.*, 91 USPQ2d 1266, 1268-69, 1271-72 (TTAB 2009).

Upon encountering CLOUDFORCE for IT cloud consulting services and CLOUDFORCE ONE for computer network security consultancy, consumers are likely to be confused and mistakenly believe that the respective services emanate from a common source. Thus, Petitioner's

³ As these records were taken directly from the USPTO's online database, they comply with Rule 44 Fed. R. Civ. P. and as such are admissible.

and Respondent's services are considered related for likelihood of confusion purposes as a matter of law. *See, e.g., In re Davey Prods. Pty Ltd.*, 92 USPQ2d 1198, 1202-04 (TTAB 2009).

D. Comparing Established, Likely-to-Continue Trade Channels.

If the users of two similar marks use similar trade channels to advertise their services, there is a greater likelihood of confusion between the two marks. *DuPont*, 476 F.2d at 1361; *In re Majestic Distilling Co.*, 65 USPQ2d 1201, 1204 (Fed. Cir. 2003). Attached herewith as Exhibit 3 is Respondent's Statement of Use including the evidence of use Respondent submitted therewith with the USPTO in connection with its trademark application Ser. No. 97/469822. Respondent described its evidence of use as "screenshots of Applicant's websites offering the services in connection with the mark." The Statement of Use was filed under oath. Respondent signed the Statement of Use with the following warning:

The signatory being warned that willful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. § 1001, and that such willful false statements and the like may jeopardize the validity of the application or submission or any registration resulting therefrom, declares that all statements made of his/her own knowledge are true and all statements made on information and belief are believed to be true.

Accordingly, Respondent admits that it advertises its services via a website. Attached herewith as Exhibit 4 is Petitioner's evidence of use on file with the USPTO in connection with its trademark application Ser. No. 98/399919. Petitioner states that these are screenshot taken from its website.

Petitioner asserts that the parties use the same channels of trade for promotion of their respective services. Both Petitioner and Applicant promote their goods/services over the Internet. The Federal Circuit has stated that sharing of distribution channels among similar marks enhances the likelihood of confusion of those marks. *Century 21*, 970 F.2d at 877. As such, the parties' use of identical channels of trade increases the likelihood of confusion in this case.

IV. CONCLUSION.

The Board should grant this Motion for Summary Judgment and cancel Registration No. 7,300,716 because there is a likelihood of confusion between Respondent's CLOUDFORCE ONE mark and Petitioner's CLOUDFORCE mark, both used in connection with related computer services. Under the above analysis applying the factors set forth in *DuPont*, it is patently clear that there is a likelihood of confusion. Petitioner has used its CLOUDFORCE mark continuously since November 1, 2019. In contrast, Respondent's first use of CLOUDFORCE ONE, which is supported by its own Statement of Use declaration, is no earlier than June 21, 2022. Thus, Petitioner has priority of use of its CLOUDFORCE mark in commerce. In addition, the marks in question share identical word CLOUDFORCE, which is the dominant word in each mark. Further, the marks are used on related computer services and create similar commercial impressions.

Moreover, as Respondent is the junior-user of its CLOUDFORCE ONE mark by entering into the computer consulting market subsequent to Petitioner, it had "an affirmative duty to choose a mark so as to avoid all confusion as to the source of origin of its services." *Blumenfeld Development Corp. v. Carnival Cruise Lines, Inc.*, 669 F. Supp. 1297, 1321 (E.D. Pa. 1987) (citing *Johnson & Johnson v. Quality Pure Mfg., Inc.*, 484 F. Supp. 975, 980 (D.N.J. 1979)); *See also, Boston Athletic Ass'n v. Sullivan*, 867 F.2d 22, 29 (1st Cir. 1989) ("When one uses a mark similar to one already in use, there is generally an affirmative duty to avoid the likelihood of confusion."). Moreover, a junior user cannot avoid confusing similarity with a senior user's mark by merely adding nominal or descriptive words to a senior user's mark. *See e.g., Miller Becker Co. v. King of Clubs, Inc.*, 56 F.2d 883 (C.C.P.A. 1932) (holding ACE and ACE OF CLUBS both for soft drinks confusingly similar); *National Biscuit Co. v. Joseph W. Sheridan*, 44 F.2d 987 (C.C.P.A.

1930) (holding AMERICAN BEAUTY and AMERICAN BEAUTY ROSE confusingly similar both for bakery products).

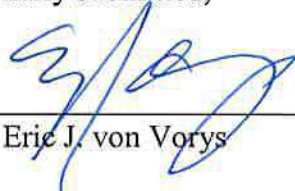

The overriding concern is not only to prevent buyer confusion as to the source of the services, but to protect the priority trademark holder from adverse commercial impact due to use of a similar mark by a newcomer. *See In re Shell Oil Co.*, 992 F.2d 1204, 1208 (Fed. Cir. 1993). The Board follows the established “rule of doubt.” That is, when the question of whether two marks are likely to cause consumer confusion is too close to call, then the “rule of doubt” says that as a tie-breaker, the Board resolves all doubt in favor of the senior user. *See, e.g., Lambert Pharmacal Co. v. Bolton Chem. Corp.*, 219 F. 325 (S.D.N.Y. 1915) (“In choosing an arbitrary trade-name, there was no reason whatever why [defendant] should have selected one which bore so much resemblance to the plaintiff’s; and in such cases any possible doubt of the likelihood of damage should be resolved in favor of the plaintiff.”). *See also, Specialty Brands, Inc. v. Coffee Bean Distribs.*, 748 F.2d 669 (Fed. Cir. 1984) (When balancing the interests in [an] established mark against the interests of a newcomer, we are compelled to resolve doubts on this point against the newcomer.”).

As demonstrated below and consistent with existing case law, there are no disputed material facts, the resolution of which are necessary for determining a likelihood of confusion by the Board. Accordingly, it is appropriate to resolve this matter by summary judgment. Thus, the Board should first grant Petitioner’s Motion for Summary Judgment and hold that as a matter of law, that Petitioner has priority trademark rights in its CLOUDFORCE mark. In as much as all of the relevant factors for assessing likelihood of confusion unquestionably weigh in Petitioner’s favor, there can be no doubt that likelihood of confusion exists. Consequently, the Board should second hold as a matter of law that Respondent’s mark CLOUDFORCE ONE is confusingly

similar to Petitioner's CLOUDFORCE mark. Given all the reasons stated above, Petitioner respectfully requests that the Board enter Summary Judgment in this proceeding against Respondent and cancel Registration No. 7,300,716.

Respectfully submitted,

December 4, 2024

AFFIDAVIT OF HEBA ELDIEN

I, Heba Eldien, declare the following based upon my personal knowledge:

1. I am a resident of Dumfries, Virginia, am over 18 years of age, and am competent to testify truthfully, accurately and with personal knowledge concerning the matters stated herein.

2. I am Vice President of Finance of Cloudforce LLC (“Cloudforce”), and have been with the company since February 2016 when it was called Metrolink Networks, LLC (“Metrolink Networks”).

3. Metrolink Networks has provided information technology (IT) cloud technology consulting services from the time I started in 2016 through October 2023, when it changed its name to Cloudforce, LLC, which has provided information technology (IT) cloud technology consulting services through the present.

4. In 2018, Metrolink Networks made the decision to rebrand its name. I was personally involved with every stage of the rebrand.

5. On August 2018 Metrolink Networks hired a marketing consultant to assist with the company rebrand.

6. On Nov 2018, Metrolink Networks registered CLOUDFORCE as its trade name with the Maryland State Department of Assessments and Taxation. Evidence of this is attached to my Affidavit at Exhibit A, which is a true and accurate copy of Metrolink Networks’ trade name certificate.

7. On November 1, 2019, the rebranding was completed and Metrolink Networks began providing its information technology (IT) cloud technology consulting services under the CLOUDFORCE mark.

8. On November 1, 2019, as part of the rebranding, Metrolink Networks' new website began offering Metrolink Networks' information technology (IT) cloud technology consulting services in commerce in connection with the CLOUDFORCE name.

9. On November 1, 2019, as part of the rebranding, everyone answering the phones and speaking with customers on the phone and in the field in person was instructed to refer to our business as CLOUDFORCE, and that has continued to this day.

10. On November 19, 2019, Metrolink Networks notified its customers in a marketing email blast that Metrolink Networks was rebranding its name as CLOUDFORCE and offering its information technology (IT) cloud technology consulting services on a new website. Evidence of this is attached to my Affidavit at Exhibit B, which is a true and accurate copy of the email message.

11. On November 19, 2019, Metrolink Networks notified the public of its rebranded CLOUDFORCE name and new website on social media, specifically Facebook and LinkedIn. Evidence of this is attached to my Affidavit at Exhibit C, which is a true and accurate copy of the social media posting on Facebook and LinkedIn.

12. On November 30, 2019, I sent out Metrolink Networks' invoices for information technology (IT) cloud technology consulting services performed during November 2019 to its customers. The invoice is branded CLOUDFORCE. Evidence of this use is attached to my Affidavit at Exhibit D, which is a true and accurate copy of one such invoice, which has been redacted to remove personal/confidential information.

13. On October 11, 2023, Metrolink Networks officially changed its entity name to Cloudforce LLC. Evidence of this is attached to my Affidavit at Exhibit E, which is a true and accurate copy of the Maryland State Department of Assessments and Taxation's acknowledgement of the name change.

14. Additional documents showing this public use of CLOUDFORCE to identify the source of my company's information technology (IT) cloud technology consulting services are attached at Exhibit F, specifically, screen shots of Metrolink Networks' website taken from the Internet Archive Wayback Machine dated August 14, 2020, showing the mark CLOUDFORCE in connection with information technology (IT) cloud technology consulting services. Exhibit F is a true and accurate copy of the Internet Archive Wayback Machine dated August 14, 2020.

I declare under penalty of perjury of the laws of the United States that the foregoing is true and correct pursuant to 28 U.S.C. § 1746.

This declaration was executed on November 26, 2024, in National Harbor, Maryland.

Dear Valued Colleague,

After 9 years of successfully tackling a variety of technology challenges as Metrolink Networks, we decided it was time to focus on what we do best: creating and managing systems for the Microsoft cloud. In an industry that's ever-evolving and ever-expanding, we recognized that specialization is key to providing the expertise that enables our clients to maintain a competitive advantage. Our staff live and breathe the cloud - and thoroughly enjoy helping our customers at every stage of the cloud adoption journey. So today we are delighted to announce that the Metrolink Networks team is now Cloudforce - the leading force in the Microsoft cloud!

ARTICLES OF AMENDMENT
for a Limited Liability Company

(1) Metrolink Networks, LLC

Insert full name of the Limited Liability Company (LLC).

(2) The Charter of the Limited Liability Company is hereby amended as follows:

The name is changed from "Metrolink Networks, LLC" to "Cloudforce LLC". The full name should now appear "Cloudforce LLC DBA Cloudforce".

UPDATE 10/11/23: As of today, October 11th, the previous owner of the name "Cloudforce LLC" has confirmed he has officially changed his company name to Skysync Technologies, LLC with Maryland Business Express, making the name Cloudforce LLC now available. We are now renewing our name request for Cloudforce LLC.

(3) Sarah Steil

I hereby consent to serve as Resident Agent
for the above-named Limited Liability Company.

Signature of Authorized Person(s)

Signature required only for new resident agents

INSTRUCTIONS: Limited Liability Company Articles of Amendment must be approved by the unanimous Consent of the members, signed by an authorized person, and filed with the Department of Assessments and Taxation at 301 W. Preston Street, 8th Floor, and Baltimore, Maryland 21201. The Articles do not have to recite the approval of the members. This form may be used, or a document may be created based on the above format.

The filing fee for this document is \$100 or \$150 for expedited processing. Create an account with Maryland Business Express using the following link to file fast online: <https://egov.maryland.gov/businessexpress>. Make checks payable to the State Department of Assessments and Taxation or SDAT for documents filed by mail or in drop boxes.

Systems Thinking.

We may be tech experts, but our process takes far more than technology into account. We start with your long-term business goals, focus next on the people using your systems, and only then turn our attention to your architecture and applications. It takes a little longer up-front, but saves time and headaches down the line - because even the most elegantly designed system is only as good as the people using it day to day.

EXPLORE OUR SMART PROCESS →

Areas of (Hyper)focus.

If you're looking for IT generalists, look elsewhere. We live and breathe Microsoft cloud solutions, and we know everything there is to know about them (seriously, quiz us). In an industry that's always evolving, we stay neck-to-neck with every new cloud service offering and technology evolution — not just because it's our job, but because it satisfies the deepest hunger for knowledge in our technophile hearts.

DATA SCIENCE AND ANALYTICS

Big Data is at the heart of what we do

Data is everywhere and increasing exponentially every minute of the day. The ability to analyze and interpret your data into actionable intelligence is critical in order to win in today's environment.

QUICK SNAPSHOT

Zachary Piper Solutions has significant experience designing, and managing highly-technical analytical programs that involve:

Data Ingestion

Computational Linguistics

Parsing

Algorithm Development

Data-science

Database Construction

Integration

Interpretation

Analysis & Predictive Analytics

Big Data Video Storage and Retrieval System

Zachary Piper Solutions was selected by a confidential customer for our expertise in building, storing and accessing (retrieval) massive full-motion video files across a variety of formats. Our expertise in this arena includes: software and hardware architecture, software engineering, applications development, configuration management, test, deployment, and final deployment of both a hardware and software solution at the field level.

DARPA

Cyber Genome Program: Zachary Piper Solutions provides algorithm development, leveraging novel machine learning and data visualization methodologies. Our work has resulted in a web application to help users make better sense of malware at scale. This technology has been selected for presentation at Black Hat 2014: <https://www.blackhat.com/us-14/arsenal.html#Bergamo>.

Department of Health and Human Services, Centers for Medicare and Medicaid

Zachary Piper Solutions supported the Centers for Medicare and Medicaid (CMS) in Baltimore, MD, partnering with a global leader in Business Intelligence software to provide technical architecture, design and implementation. CMS used SAS tools to create the PAYment by Geographic Area (PAYGAR) system, a custom Business Intelligence application for visualizing and exploring data with a geographic component. PAYGAR is a joint effort between the Consolidated Data Analysis Center (CDAC), a division of the Department of Health and Human Services Office of Inspector General (OIG), and CMS. The SAS Enterprise BI server is used at

Department of Commerce, US Census Bureau

Zachary Piper Solutions supports the US Census Bureau in Lanham, MD expanding their use of SAS data analytics and complex statistical programming, providing key personnel experienced in their highly technical server environment. The resources deployed are specialized in the SAS Enterprise Business Intelligence suite and Visual Analytics. The US Census Bureau's Management Information Systems (MIS) branch used SAS Enterprise Business Intelligence, to link databases directly, avoiding the need to manually pull data from disparate databases in order to create manual reports. The small change significantly increased efficiency and allowed direct access to information from a single portal. ZPS implemented standardized code generation provided by SAS for data integration (DI) allowing for code reviews significantly reducing contractor headcount due to the use of freeform coding. The resources deployed by Zachary Piper increased the efficiency of the Bureau to collect and enhance the value of their data, making SAS the benchmark tool in preparation for the 2020 census.

Social Security Administration

Zachary Piper Solutions supports the Social Security Administration in Baltimore, MD, deploying key personnel providing technical programming and analysis support.

Department of Health and Human Services, Centers for Medicare and Medicaid

Zachary Piper Solutions supported the Centers for Medicare and Medicaid (CMS) in Baltimore, MD, partnering with a global leader in Business Intelligence software to provide technical architecture, design and implementation. CMS used SAS tools to create the PAYment by Geographic Area (PAYGAR) system, a custom Business Intelligence application for visualizing and exploring data with a geographic component. PAYGAR is a joint effort between the Consolidated Data Analysis Center (CDAC), a division of the Department of Health and Human Services Office of Inspector General (OIG), and CMS. The SAS Enterprise BI server is used at CMS in three different environments: development, validation, and production. Following CMS lifecycle, the application was created in a development environment and then passed to the business owner (CDAC) for verification in [the] validation environment. The resources deployed by Zachary Piper enhanced the ability of CMS to execute its mission of implementing SAS analytics into their PAYGAR system, significantly reducing overhead cost and decreasing cycle time.

Capabilities Summary

ABOUT US

Zachary Piper Solutions is a national Cyber Security technology company that delivers innovative systems, solutions and services in support of mission-critical initiatives on behalf of the Intelligence Community, Department of Defense, Department of Homeland Security, Department of Justice, and Department of State. Customers count on Zachary Piper to deliver dynamic solutions to meet the needs of their national security related programs. Our mission-focused approach and strong relationships, built on trust and years of on-time and on-budget results are vital to the success of our clients.

"ZP became the most successful subcontractor in filling positions on the contract. They now have more workshare than any other. The quality of their people has been outstanding. In short, ZP has been my best subcontractor both in terms of responding to filling vacancies for very difficult to fill positions and in terms of the quality of their personnel. I highly recommend them."

- Joe Simpson, Program Manager at CACI

CORPORATE CAPABILITIES

Cyber/CND & Information Security

Zachary Piper has significant current and past performance designing, architecting, implementing and managing Information Security initiatives and programs across multiple government agencies on TS//SCI access level programs. Services include Cyber Threat Analysis, Event Monitoring, Remediation and Mitigation, Vulnerability Risk Assessment, Penetration Testing, Assurance and Certification, Compliance and Security Authorization/ Identity Management.

Systems Engineering

Zachary Piper delivers mission-critical Information Technology integration services on-time and on-budget within TS//SCI access level programs. Services include legacy systems migration and modernization, systems integration, COTS/GOTS integration, interface development, security patching, workflow engineering, network transition, migration management, enterprise architecture, design, implementation and network/systems performance management. Zachary Piper has significant current and past performance with Security Architecture inclusive of Identity Management (IDAM) integration with next generation APIs.

Software Engineering & Applications Development

Zachary Piper Solutions designs, develops, documents, tests, integrates and implements custom software modules and solutions for DoD ACAT level programs requiring TS//SCI level access. These solutions are focused on intelligence and information-security applications utilizing agile methodology leveraging SEI processes while complying with Cyper and RMF security controls. These services range from firmware development to web-based portal development for network operations centers. Our current and past performance spans real-time sensor control, mobile security applications, data integration and correlation, communications management, cross-domain solutions, data ingestion, automated navigation systems and decision support systems.

Data Science & Analytics

Zachary Piper Solutions has significant experience designing, architecting, implementing and managing highly-technical analytical programs that involve: data ingestion, computational linguistics, parsing, algorithm development, data-science, database construction, integration, interpretation, and analysis, including predictive analytics. Many of the solutions that we have implemented and support involve the Hadoop Ecosystem as well as statistical programming languages such as SAS. Our work on DARPA's Cyber Genome Project was selected for presentation at Black Hat 2014.

In-Service Engineering (ISEA)

Zachary Piper provides operations and maintenance support for mission-critical enterprise systems across multiple Federal Agencies including TS//SCI access and ISRA/IO DoD ACAT level programs. Our team of cross-functional experts works to deliver maximum performance, security and reliability across Service/Help Desks, Data Center Operations, Enterprise Networks, Network and Server Administration, Configuration Management, and Software Maintenance programs. Our turnkey solutions include facilities, systems, processes and personnel. We utilize management practices such as ITIL, CMMI and ISO in order to ensure successful operations as well as maximize productivity and uptime.

Information Security

Information Security Software Engineering Data Science IT Managed Services Network Disaster Recovery

INFORMATION SECURITY

Increasing sophistication and performance

Working in an Advanced Persistent Threat (APT) environment necessitates the need for increasing sophistication, efficiency, and performance in the form of Information Security

Zachary Piper Solutions has significant current and past performance designing, architecting, implementing and managing Information Security Initiatives and programs across multiple government agencies.

QUICK SNAPSHOT

ZPS engagements include

Architecting, Designing, Implementing, Managing and Maintaining Secure Enterprise IT Infrastructure

Architecting and Implementing Identity Access Management (IDAM) solutions across classified and unclassified networks

Security Patching across Microsoft and Red Hat Linux server clusters in a virtualized environment

New technology introduction and technology optimization across multiple SIEM and sensor environments

Implementing next generation communications networks across leading edge CISCO routing hardware

QUICK SNAPSHOT

ZPS engagements include

New technology introduction and technology optimization across multiple SIEM and sensor environments

Implementing next generation communications networks across leading edge CISCO routing hardware

Global Security Operations Center (SOC)

Zachary Piper Solutions provides comprehensive information security and assurance services across a large enterprise IT environment for a classified government agency. The scope of work, across a 24/7 program involves technical, engineering, management, operations, logistics and administrative support for cyber security programs. Deliverables include incorporation of industry "best practices" within the area of network security monitoring and intrusion detection; threat, vulnerability, security data correlation, and global situational awareness.

Classified Customers

Zachary Piper Solutions provides comprehensive information security and assurance services across a large enterprise IT environment for a classified government agency. The scope of work, across a 24/7 program involves technical, engineering, management, operations, logistics and administrative support for cyber security programs. Deliverables include Incorporation of industry "best practices" within the area of network security monitoring and intrusion detection; threat, vulnerability, security data correlation, and global situational awareness.

Darpa

Cyber Genome Program: Zachary Piper Solutions provides algorithm development, leveraging novel machine learning and data visualization methodologies. Our work has resulted in a web application to help users make better sense of malware at scale. This technology was been selected for presentation at Black Hat 2014: <https://www.blackhat.com/>

Splunk - Multiple Agencies

Zachary Piper Solutions has performed architecture, design and installation services for multiple government agencies, across a variety of Splunk products. Our employees are certified to the Splunk Architect level and we are a Splunk certified partner. Zachary Piper has received commendations for the complex problems that we continue solve in support of mission-critical initiatives.

Mark Information

Mark Literal Elements: X PHY-CY.X SECURITY GROUP

Standard Character Claim: No

Mark Drawing Type: 3 - AN ILLUSTRATION DRAWING WHICH INCLUDES WORD(S)/ LETTER(S) /NUMBER(S)

Description of Mark: The mark consists of a graphic logo comprised of a shield, the left half of a blocked X, and a design depicting the right half of an X. The shield is partially open on the right side, centered within is the left half of a blocked X, with the design for the right half of the X extending outward to the right past the open section of the shield. The design of the right side of the X consists of three V shaped segments tilted 90 degrees right, spaced evenly, increasing in size moving to the right. The ends of the segments are round circles. The company name, Phy-Cy.X, utilizes both letters and punctuation that includes a hyphen between the letters "y" and "C" and a period between the letters "y" and "X" to identify three separate words physical, cyber, and security. The wording "SECURITY GROUP" appears in small capital letters underneath.

Color(s) Claimed: Color is not claimed as a feature of the mark.

Disclaimer: No claim is made to the exclusive right to use "SECURITY GROUP" apart from the mark as shown.

Design Search Code(s): 24.01.03 - Shields or crests with letters, punctuation or inscriptions contained therein or superimposed thereon
 26.01.21 - Circles that are totally or partially shaded.
 26.01.31 - Circles - five or more; Five or more circles
 26.17.12 - Angles (geometric); Chevrons
 26.17.25 - Other lines, bands or bars

Phy-Cy.X Security Group, LLC is comprised of highly educated, certified and experienced physical and cyber security experts. Through their expansive corporate and armed forces experience and knowledge; Phy-Cy.X is unsurpassed in their development and support capabilities to posture and defend against global threat networks and nation state actors.

Tailored service offerings include:

Network Security and Support: Phy-Cy.X provides network security and support through five core areas: 1) Network Functionality, 2) Core Standardization, 3) Secure Availability, 4) Network Integrity, and 5) Data Confidentiality.

- 1) **Network Functionality:** This concept is focused on ensuring the network is fully functional in the most efficient and secure manner. Phy-Cy.X assists network design engineers/maintainers utilizing appropriate/applicable security practices to facilitate functionality and connectivity between devices and locations. Having a properly functioning network is essential to efficiency, business productivity, and budget management.
- 2) **Core Standardization:** This concept is focused on producing a standard approach to network design, implementation, and management given the environment which the network supports. Phy-Cy.X assists/supports the network design engineers/maintainers to develop standard operating practices when it comes to managing their networks. This is important for hardware and software changes/updates, configuration and account management, and end user actions. Standardization is accomplished through a combined effort of policies, processes and procedures along with technical implementation; and further, staff training in order to maintain standards and resolve basic issues as they arise. Having standardized network processes is essential to efficiency, business productivity, budget management and most important, risk management.
- 3) **Secure Availability:** This concept is focused on delivering availability that has security considerations built into the desired end state of the project. Several networks have high availability requirements where security is an after-thought, creating unacceptable risk that is unknown. Phy-Cy.X works to place security at the forefront of design and implementation which provides a secure high availability environment to be incorporated, whereby reducing overall risk to the network and the company as a whole.
- 4) **Network Integrity:** This concept is focused on having confidence that your network is functioning as designed without influence from external sources. Phy-Cy.X works to ensure that the network is not performing in an anomalous manner focusing on network connections, traffic flow, and account management to ensure negative processes or actions are not occurring unnoticed and action can be taken when identified. This is especially important for networks that are at risk from threat actors who look to leverage a network in a manner other than designed or for purposes of their own.

- 5) **Data Confidentiality:** This concept is straightforward and focused on ensuring data is secured on the network where no external influences or unauthorized access/manipulation of data can occur. This is true for both company internal data and customer data that resides on the network. Phy-Cy.X works to identify and prioritize data in order to implement the correct security measures to protect the data at the level desired/required. This is especially important when government regulation is involved and/or the company has internal requirements to ensure data confidentiality. Threat actors all over the world look to acquire sensitive data and every network is at risk.

Methodology/Approach: Phy-Cy.X begins with an initial site engagement which consists of management and network team conversations, identifying areas of concerns that exist and where priorities need to be placed as the process continues. Next, Phy-Cy.X conducts a discovery phase in order to understand the network environment, infrastructure utilized, current configurations, and active directory or other management tool makeup. From there Phy-Cy.X will work with the management and network team to develop the plan of action based on prioritization of needs and risk to the network or environment which the network supports. Once, the plan of action is developed, Phy-Cy.X will start with the highest priority item and work through accomplishment, while providing flexibility to shift efforts to a higher priority if/when the situation occurs. Phy-Cy.X performs these actions both on-site and in remote capacities throughout the duration of the contract timeline.

Emergent Services: Phy-Cy.X provides emergent services as needed when network degradation and/or outage occurs. As high availability is required, emergent services may be needed to successfully troubleshoot and remediate loss of network availability and functionality in a timely manner. Emergent services may consist of both remote and on-site activities. While these activities may be similar in nature, the actual issue that arises will dictate whether or not the emergent support can be delivered remotely. In some cases, both remote and on-site services may be required to resolve a particular issue. Phy-Cy.X will respond as soon as notification is received and emergent services will be provided at their first available opportunity.

Security Assessments: Phy-Cy.X provides both physical and cyber security assessments to ensure the client understands their current security posture and true threats they face. Phy-Cy.X performs both cooperative and non-cooperative assessments in order to implement a more secure environment through a defense in depth approach.

- 1) **Cooperative Assessments:** This service is focused on identifying security risks to both the physical environment and network design of the current posture that is in place, looking for any and all risks that can be identified and mitigated. Collaboration between the security and network management teams, and Phy-Cy.X is essential to success.
- 2) **Non-Cooperative Assessments:** This service is much like the cooperative assessment but conducted without and/or very minimal assistance from the security and network management teams. This approach is tailored to provide a realistic threat actor engagement against the client. Both physical and network security postures can be assessed during this event.

IT SERVICES

OFFERING COMPREHENSIVE MANAGED IT SERVICES AND MORE

At Exigere Networks, we are committed to designing and installing our clients' own network management systems for their businesses. We work together with our customers to provide reliable IT solutions tailored to their business needs.

Managed IT Services

Our team works closely with our clients to address their needs depending on their budget. We develop our effective solutions to ensure that your network management systems is operating efficiently, before you have an operational impact.

- Improve Your Operational Efficiency
- Reduce Your Capital and Operational Expenses
- Improve Customer Satisfaction
- Optimize Your Investments
- Generate Savings
- Increase Your Profitability

UNLIMITED REMOTE AND ON-SITE TECHNICAL SUPPORT

When experiencing technical support issues, our technicians are here to help you. You don't have to wait and suffer through our team will help you, help to solve an issue.

STRATEGIC IT PLANNING

As a part of our managed services, we also help you plan your future IT needs. Our team works with you to plan your future IT needs that you can rely on for your business.

24/7 REMOTE MONITORING

Having a 24/7 remote monitoring system in place is a critical element of your network. Our team will monitor your network 24/7 to help you identify and resolve issues before they become a problem for your business.

MANAGED BACKUP PLAN

Every business needs a disaster recovery plan to mitigate the risk of a system crash. Our team will help you develop a disaster recovery plan that is tailored to your business. Our team will help you develop a disaster recovery plan that is tailored to your business.

MANAGED SECURITY

We will help you identify system vulnerabilities and provide you with a comprehensive security assessment. Our team will help you identify system vulnerabilities and provide you with a comprehensive security assessment.

PATCHING AND UPDATING NETWORK SYSTEMS

We will protect your network system by patching your systems, updates, and other issues. We will help you protect your performance and ensure your security.

◆ Quality at the forefront

Kudox

Kudox Network has been in business since 2004 and has a history of providing quality service. Customer satisfaction is our #1 goal. Kudox Network technicians are highly educated and extensively trained and will give individual attention to projects.

Contact us

Starlink Internet Installation

Kudox Network technicians will install the satellite dish professionally and run the cable from the satellite dish to the WiFi Router location. We will test the connectivity and speed to ensure the Starlink system delivers the best quality connection. Kudox Network technicians can extend WiFi coverage by installing additional equipment.

Whether for new construction or business development, Kudox Network is equipped with the expertise to design and install a genuinely exceptional commercial network. Some of our key points of emphasis on structured cabling are:

- **Design** - All network architecture begins with a solid design process. Cables should be laid out in organized and logical patterns to avoid entanglements.
- **Horizontal and Backbone Cabling** - Backbone and horizontal cabling are both essential to commercial solutions. Horizontal cabling connects a business' telecommunications room to outlets and work areas across the building/floor. Backbone cabling connects equipment rooms with telecommunications rooms. It's easy to see that you can't have one without the other.
- **Telecommunications Closet and Server/Equipment Room** - Our expert team of installers will properly patch, set up, and label your telecommunications closet and server room/equipment to minimize any confusion. Proper labeling also makes troubleshooting and repairs easier.
- **Cable Termination** - Kudox will ensure that all cables are properly terminated and safe, and optimized for performance.
- **Wi-Fi/Wireless Networks** - With companies and individuals using more connected devices every day, wireless networks quickly become overwhelmed. Don't let your Wi-Fi become your company's bottleneck. Kudox Network will find ideal access point placement and design a cabling infrastructure that works.
- **Fiber Optic** - We are the experts in single and multi-mode fiber-optic network connections. Our installation services provide a connectivity backbone at affordable prices.
- **Security Camera Wiring** - We do IP and HD camera wiring, and we calculate the rating of the cable based on distance. IP camera wires use the same standard as your network, while HD uses video powered via cable.
- **TV/Monitors and Audio Video Wiring** - A strong signal begins with well-planned structured cabling. Depending on the size and scope of the A/V and TV installation for a commercial enterprise, having an organized plan will ensure everything works flawlessly.
- **Windows Treatment Wiring** - Most window treatment wiring is handled with low voltage, but it will need a clear path back to a central location to get power.
- **Alarm Systems Wiring** - One of the essential bits of structured cabling for any business is the alarm system. Ensuring that these wires are planned and installed thoughtfully will help ensure that the system will work for years to come and withstand system growth.

Commercial IT/Network/Wi-Fi Services

Kudox Network offers professional infrastructure solutions to fit the needs of businesses of all sizes. We are skilled in all aspects of business network solutions, including network design, implementation, service, and security. We are also skilled in network wiring solutions and phone systems, including Voice over Internet Protocol (VoIP) solutions.

Our cutting-edge network solutions for commercial information technology (IT) ensure that businesses have the necessary infrastructure for connectivity and communications. These solutions help ensure that all of the computers and devices on your business internet networks are on the network and can communicate properly, that your Wi-Fi connections are reliable, fast, and secure, and that your internet networking is customized to your business operations. We are skilled and knowledgeable about the challenges of commercial networks. From new construction to business development, we can handle it all.

Design and Implementation for Commercial IT Networks

At Kudox Network, we are skilled in the design and implementation of high-performing business networks. Whether you need a new commercial IT network or are looking to upgrade an existing business network, we can help you.

The foundation of our design and implementation for business IT is a network diagram. The diagram visually represents the computer or telecommunications network and how it interacts with the devices on the network. We first develop a logical network design which depicts information flow in the network. This includes mapping out the different aspects of the network and ways in that networked devices talk to each other. We also ensure that networks have the proper cabling structure for high performance. Furthermore, we ensure that the network has the proper number, type, and location of network devices needed for the fully functioning network – including routers, switches, and servers. We also ensure IP addressing structure uniquely identifies connecting network devices, such as computers, mobile phones, or smart devices.

Network security architecture and overall network security processes are also taken into account in our design and implementation.

Structured Wiring for Commercial IT

Commercial IT networks require installation and termination of the right wiring. Structured wiring ensures that the TV, internet, and phone signal can flow within your business. Kudox Network provides structured wiring services for business IT to ensure that your networks function properly.

Wireless Networks for Business

Wireless networks are used in commercial IT to provide internet connectivity for portable electronic devices such as laptops, mobile phones, tablets, printers, and smart devices in the internet of things or IoT.

Wi-Fi is a wireless networking technology powering wireless networks. Wi-Fi internet connectivity occurs through a wireless router. Wi-Fi allows devices such as computers (laptops and desktops), mobile devices (smartphones and wearables), and other equipment (printers and video cameras) to interface with the internet.

Commercial IT Network Security

Cybersecurity is an essential aspect of commercial IT networks. A 2019 study found that companies lost an average of \$4.7 million US dollars due to cybersecurity breaches. Investing in cybersecurity infrastructure can help avoid vulnerability to dangerous hacks.

Web filtering and firewalls are two ways Kudox Network helps protect businesses from internet viruses, network intrusions, and other malicious activity. These two cybersecurity technologies involve specific configuration settings and rules that protect the networks and data.

Regardless of your business's size, industry, or infrastructure, we can help you with your commercial IT cybersecurity needs.

Managed Network Service

Managed network services are networking applications, functions, and services that enterprises outsource to be remotely operated, monitored, and maintained by a managed service provider. Benefits of managed network service include improved reliability of the network and protection from cyber threats. Kudox Network's commercial IT services include a managed network service to manage the client's IT network devices. This involves setting static IP addresses, forwarding ports, expanding DHCP pools, and creating VPN.

External and Internal Vulnerability Security Scans

Cybersecurity has increasingly become a major anxiety concern for small and medium sized organizations, especially when legal compliance and government regulations are factored into the equation. Further, the practice of regular vulnerability security scans is increasingly becoming an end customer requirement and necessary for cyber insurance coverage.

To address the rising need for proactive data security management to combat this ever increasing risk, **Optimized IT** conducts extensive vulnerability security scans to ensure a secure and stable IT network infrastructure.

Optimized IT utilizes current security industrial tools to perform scans of both the external and internal network environments to identify potential areas of risk, while also confirming that IT security best practices are properly deployed and current.

Through a laptop and software provided by Optimized IT, an overnight internal and external security scan captures a point in time of a cross section of all devices actively connected to the IT network infrastructure, including:

- Anti-virus status
- Administration permissions
- Open ports
- Software vulnerability scanning for Microsoft and third party applications
- Network device firmware

Note: PCs not actively connected to the IT network at the time of the scan cannot be evaluated. We recommend advanced communications to your team to ensure all laptops and desktops are running on the network during the security scan.

4747 Lake Forest Drive, Suite 100
Cincinnati, OH 45242

📞 888.306.4200 ✉ info@optimizedit.net

Risk and Vulnerability Assessment Report

A written assessment of discovered risks will be presented within 2-3 weeks of the overnight security scan, including remediation and solution recommendations with proposed timeframes for implementation.

CRITICAL: These are considered "URGENT" and should be addressed immediately.

HIGH: These should be implemented within 30 days.

MEDIUM: These are considered medium to low risk and should be completed within 90 days.

LOW: These are optional recommendations to achieve additional level of IT best practice and should be implemented, as appropriate.

NetCare clients will have any remediation items addressed by Optimized IT under covered managed IT services. Any additional solution recommendations will be presented along with corresponding investments.

For organizations that are not currently clients or clients with devices excluded from their NetCare coverage, they will be presented with remediation and solution investments for their evaluation.

Investment options to conduct External and Internal Vulnerability Security Scans & Report:

An initial security scan will provide insight into the current state of their security from a high-level perspective and provide insight on current vulnerabilities. A one-time event is not a substitute for on-going quarterly scanning for continued risk assessments of IT network environments, but will provide an excellent starting baseline to identify any needed remediation. Quarterly security scans are recommended for continued vulnerability detection.

Single Site Network Scan & Report: **\$3500**

Multi-Site Network Scan & Report: **\$4500**

Scheduled Quarterly Scan & Report: **\$1500**

The internal and external security scan is limited to scanning no more than 16 external IP addresses and one internal network segment not exceed Class C (254 hosts) in size at a single site. If the scanning of additional external IP addresses, additional internal network segments, internal IP addresses across a VPN or other remote connection is desired, additional scans and costs may incur.

For additional information, contact the Optimized IT Networking team:

cloudCENTRX Infrastructure-as-a-Service (IaaS) provides custom private cloud environments, built specifically for your organization's dynamic needs. By utilizing cutting-edge technologies, cloudCENTRX offers an array of options, where workloads can be delivered on-premise, any private data center or at cloudCENTRX's audited and compliant facilities.

cloudCENTRX infrastructure is delivered as a managed services solution and bundled with a collection of enterprise delivery methods as well as sophisticated monitoring and security tools.

- Multi-tenant, private and hybrid deployments and orchestration
- Intrusion prevention, next generation firewalls, VPNs and anti-malware/virus scanning
- Rapid provisioning of network and security solutions
- Direct cross connects from 1G to 200G to any hyperscale provider

Cloud Environments:

On-Premises Cloud

Hybrid Cloud

Private Cloud

Maintaining infrastructure and applications on-premises is a critical requirement for many organizations and cloudCENTRX provides a full range of capabilities to support those needs. By leveraging our proprietary model, CapEx-as-a-Service™, cloudCENTRX delivers mission critical infrastructure, fully managed and delivered on premises. Managed Solutions include private cloud infrastructure, networking, wireless, unified communications, security, desktop and mobility.

PRICING

M-Theory group offers flexible pricing for cloudCENTRX Services. The price will depend on the number of services (multiple services offer a bundle discount) and the complexity of customization.

Powered by CapEx-as-a-Service™

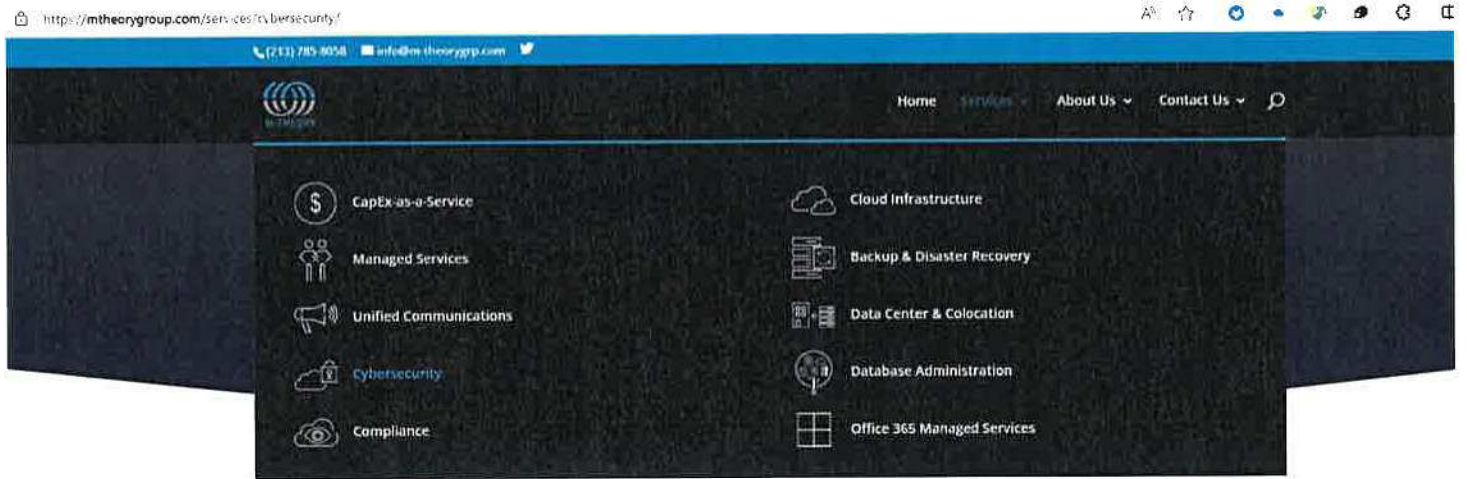

CapEx-as-a-Service™ (CaaS™) transforms Capital Expenditures (CapEx) of enterprise hardware and software to a managed Operating Expense (OpEx) by delivering people, processes, and technology through a managed services model. For more detailed information visit CapEx-as-a-Service™ page.

The cloudCENTRX objective is simple:

Cybersecurity for any business is not only about adding layers of security technology. It starts with understanding and managing a business's cybersecurity risks. M-Theory helps businesses understand how to best identify and protect vital data and technology assets, and how to detect, respond to and recover from a cybersecurity incident.

The cloudCENTRX solution is complex:

Upon identification of risks, design a Remedy Action Plan, execute the plan and provide ongoing maintenance of new policies around data governance.

About

Home / About

Our Company.

Bento Holdings provides information security & technology services for small business. TechBento supplies system administration and engineering for identity, devices, apps, infrastructure, network, and data security. We design and maintain information security controls that meet business objectives, are easily validated, and improve operational efficiency. Customers choose us because we are committed to operational excellence and fanatical about doing the right thing for our clients. Founded in 2011.

+ Vision.

+ Mission.

+ Value

Bento Security.

Bento Security are subscription services for ongoing and proactive c provides the system engineering & administration services to organi security programs. Effective as of January 2023, all of our customers have been established on tiers aligned with their objectives to protect systems and data. We invite you to read our Information Security Management Approaching Singularity white-paper that details our vision and reasons for this pivotal customer engagement.

Team Bento!

Hi! Our team responds on a best-effort basis to general inquiries. If you need support, we can route you there too!

Fiduciary Principles

Security in our core.

Your managed service provider or IT vendor can be the weakest link in your supply chain. We take security, and privacy, seriously. TechBento developed internal practices based on NIST (National Institute of Standards and Technology), ISO 27000k Standards, and FISMA framework for cybersecurity to safeguard ourselves and our clients. We work with FINRA, SEC and PCIDSS routinely. Ask for our VSAQ and Trust Your Tech.

On-demand managed services.

TechBento provides on-demand services billed for time spent. To guarantee client satisfaction, we supply detailed time reports and do not require long-term contracts. Companies accustomed to – or wanting – flat-fee services appreciate our approach because it is flexible, transparent, and avoids margin pressures that managed service providers face. *IT/IS not a subscription, but IT/IS a predictable and controllable expense.*

No Hardware or Software Re-Sale

TechBento is vendor agnostic: we do not resell cloud services, apps, computers, servers, or on-premise software. We help our customers acquire the right solutions without pressure on our bottom line. Our customers avoid premiums while we are motivated by offering the best technology options. Our customers trust our recommendations because they are organic and based on their needs.

Tailored services.

Bespoke, tailored, and custom simply means that information technology services adapt to business needs and wants. TechBento supplies talented solution consultants and architects ready to support your needs big & small. From the sole-proprietor wanting to make the right choices today for growth tomorrow, to established companies with complex IT needs, TechBento adapts to you.

Shared Responsibility Model

Shared support responsibility enables reduced downtime for employees and a lower total footprint for support costs and staff. TechBento supports the use of best-in-class hardware and software also ensure that employees have less need to call IT for support, and when they do, a refocused help desk can encourage them to learn and grow on their own. We empower our clients to do more and trust technology in the process.

Powerful Strategic Partnerships

We are a certified and accredited Amazon Consulting Partner, Microsoft Cloud Partner, and Apple Consulting Partner. Beyond that, have relationships with technology service companies to help our customers purchase hardware, provide boots-on-the-ground, and extend our services. TechBento's partnerships foster collaboration not co-dependence.

SERVICE DESK OPTIONS:

DEDICATED

SHARED

HYBRID

Dedicated team of service desk management and agents from our onshore operations center.

Shared team of service desk management and agents from our on-shore operations center supporting multiple client needs at once.

Dedidcted team during specified business hours then transitioning to a shared team during non-business hours.

Best option for larger clients, typically with 1000+ employees.

Best option for smaller clients with under 500 employees.

Best option for small to medium clients of 500-1000 employees.

\$\$\$

The most costly option for a client with a full team dedicated to support.

\$

The most cost-effective option for a client by sharing resources.

\$\$

A mid-level cost option for a hybrid based support model utilizing both dedicated and shared resources.

100% US-Based with Global Reach

Our goal is to resolve your issues on the first call.

We stand behind our service with transparency and personal integrity.

Choose only the services you need. Scale up or down anytime.

About Buck

Buck is an integrated HR, pensions, and employee benefits consulting, technology, and administration services firm. Founded more than 100 years ago as an actuarial consultancy committed to establishing sound retirement plans, we've evolved to serve HR departments and trustees across the health, wealth, and career spectrum. Our areas of focus range from health and wellbeing to retirement and investment to pension and benefits administration.

With the ultimate goal of securing the futures of our clients' employees and members, we develop tech-enabled programs that engage and drive individual and organizational growth. Committed to the needs of today's dynamic workforce, our people-first approach empowers the world's most forward thinking organizations to protect the physical and financial wellbeing of their employees and members and improve how their people work and live.

Innovative technology and proven customer support take the administration of your employee health benefit programs to the next level

Administration

Health and welfare administration

Healthy people drive healthy business. And engaged employees make better health-related decisions.

Whatever your needs, we design the right solution for you. From fully outsourced to co-sourced options, we have the expertise to manage your benefits and communicate those benefits to your people. Our experience covers active and retiree plans, voluntary benefits, eligibility management, enrollment, premium billing, dependent eligibility verification, and beneficiary management. Our solutions are highly configurable and personalized, providing flexibility and choice in meeting the needs of your business — and your people.

Here are just a few of the things you can expect when you outsource your health and welfare administration to Buck:

User-centric technology

Our highly configurable platform integrates the benefits and services you need with a highly personalized benefits experience available from our front-end user experience and delivered through a combination of website, mobile, and outbound communication.

Actionable analytics and reporting

Our on-demand and dynamic analytics provide full visibility into opportunities for your organization to reduce cost, improve member health, and manage health risk. Our advanced analytics provide real-time insights aligned with your objectives that deliver measurable return on investment.

In-house consulting

Seamless coordination across administration and consulting drives plan management and operational efficiencies. Our consulting team includes experienced actuaries, clinicians, pharmacists, and compliance experts who develop plan design strategies that improve employee health outcomes, increase productivity, educate employees, and reduce costs to help you achieve your long-term business goals.

Decision support tools

Our extensive analytics and recommendation engines give your employees access to a wealth of knowledge. We also provide plan comparisons, learning tools, and education on insurance needs.

Open enrollment communication

Open enrollment is an annual opportunity to help your people understand how the benefits you offer can help them make informed and cost-effective choices to manage their health and plan for health-related expenses. Our award-winning communicators make sure you're sharing details of your plans across channels to drive participation and maximize the effectiveness of your programs.

Change management communication

Successful change initiatives require a clearly articulated vision, a well-understood strategy, and buy-in among stakeholders. Effective change communication needs to look beyond just getting information out to stakeholders — it needs to look at what's happening across the whole organization, with a focus on leadership and governance. Our approach to change communications builds in tools and processes aimed at minimizing risk and maximizing the impact of your communication to ensure a successful outcome.

HIPAA operational reviews

Our operational review of your health plan focuses on its compliance with HIPAA privacy and security. This review, handled by compliance and security experts, provides a comprehensive overview of how your privacy standards are being upheld.

Compliance reviews

Our compliance reviews are part of the continual process of plan oversight and governance. Undergoing periodic compliance reviews may result in less costly correction penalties and a reduction in the time and expense of dealing with agency audits.

Compliance consulting

We keep your plans in compliance by assisting with day-to-day administration and documentation (e.g., drafting plan documents and amendments, summary plan descriptions, and other communications, administrative forms, and procedures) and advising on plan processes and governance (including fiduciary matters). In addition, we can provide practical guidance on resolving compliance questions and issues.

services software-as-a-service (SaaS) services featuring artificial intelligence software utilizing machine learning for organizing, compiling, managing and analyzing patient data for use in managing a patient's health care; providing temporary use of on-line non-downloadable software for health risk assessment and profiling for use in the field of preventative health; providing a website featuring technology that enables health care professionals and patients to communicate and consult via phone, online chat or videoconferencing and that enables health care professionals to access patient medical records and provide prescriptions and prescription renewals; application service provider, namely, hosting, managing, developing, analyzing, and maintaining applications, software, and web sites, of others in the fields of health care, benefits programs, employee productivity, risk management; computer software development; maintenance of computer software for others; technical support services, namely, providing troubleshooting of computer software problems; technical support services, namely, troubleshooting in the nature of diagnosing computer software problems; providing an interactive web site featuring technology that allows users to obtain information on health care services; scientific research and data analysis services in connection with health safety, epidemiology, health outcomes research and clinical trials; medical and health research services; product research and development in the field of medical device systems; software as a service (saas) services featuring software for tracking, reporting, and communicating information related to patient care, hospital administration, hospital operation, hospital department management, patient billing, and patient charging and coding; software as a service (saas) services featuring software for processing claims and collecting and analyzing data for health care finance and administrations services; providing online, non-downloadable software for processing claims and collecting and analyzing data for health care finance and administrations services; providing online, non-downloadable computer software for tracking, reporting, and communicating information related to patient care, hospital administration, hospital operation, hospital department management, patient billing, and patient charging and coding; providing online, non-downloadable software that enables payers to identify which clinical programs are effective and where they can improve physician performance and reduce fraud, waste and abuse; providing online, non-downloadable data analytics and reporting software that enables insurance payors to manage and optimize their provider networks; providing online, non-downloadable software that combines clinical rules with predictive models to drive down cost of care and improve member engagement, enabling users to better manage member populations through real-time member level analytics that identify clinical and non-clinical interventions opportunities; providing online, non-downloadable software that leverages healthcare data to identify individuals with unrecorded diagnoses and select the optimal provider intervention and to improve throughput and provide access to underlying data environment; providing temporary use of online non-downloadable cloud computing software that is used to accelerate healthcare-related decision making by reducing the development time of research analytics via automation tools and access to a large representative population; Planning, design and management of Information technology systems; computer system analysis, computer system design, monitoring of computer systems by remote access to ensure proper functioning; software development, installation, maintenance, programming, implementation, and updating; computer programming, computer software design; computer software consultancy; creating and maintaining web sites for others; testing of computer software; troubleshooting of computer software problems; Electronic storage of computerized medical data, claim data and databases for medical management purposes; Design of information technology infrastructure for others; Consultancy and information services relating to information technology architecture infrastructure; Infrastructure as a service (IAAS) services, namely, hosting servers for use by others; Computer security threat analysis for protecting data; Computer security consultancy in the field of scanning and penetration testing of computers and networks to assess information security vulnerability; Design and development of electronic data security systems; Maintenance of computer software relating to computer security and prevention of computer risks; Updating of computer software relating to computer security and prevention of computer risks; Computer security service, namely, restricting access to and by computer networks to and of undesired web sites, media and individuals and facilities; Computer security services, namely, enforcing, restricting and controlling access privileges of users of computing resources for cloud, mobile or network resources based on assigned credentials; Internet and data security consultancy; Computer network security consultancy; Computer technical support services, namely, 24/7 service desk or help desk services for IT infrastructure, operating systems, database systems, and web applications; Technical support services, namely, remote and on-site infrastructure management services for monitoring, administration and management of public and private cloud computing IT and application systems; server hosting; cloud hosting provider services; consulting services in the field of hosting computer software applications; Hosting the software, websites and other computer applications of others on a virtual private server; Internet-based application service provider, namely, hosting, managing, developing, analyzing, and maintaining the code, applications, and software for web sites of others; Consulting in the field of configuration management for computer hardware and software; Consulting services in the field of cloud computing; Providing virtual computer systems and virtual computer environments through cloud computing; Computer services, namely, remote and on-site management of the information technology (IT) cloud computing systems of others; Technical consulting services in the fields of data center architecture, public and private cloud computing solutions, and evaluation and implementation of internet technology and services; Cloud storage services for electronic data; providing temporary use of non-downloadable computer software for managing cloud infrastructure; IT integration services; Computer services, namely, integration of private and public cloud computing environments; Computer services, namely, integration of computer software into multiple systems and networks; Computer systems integration services; Computer services, namely, database development services, namely, configuration and customization of computer databases; Software development for others in the field of software configuration management; Computer programming services for others in the field of software configuration management; Computer network configuration services; Updating and maintaining cloud-based computer software through enhancements and patches; Maintenance and upgrading of computer software; computer network security consultancy, namely, conducting IT security audits; computer security

consultancy, namely, security audits of information systems, working environments and infrastructure, namely, desktops, servers, routers, networked devices, digital devices, mobile devices, databases and applications; Providing quality assurance services in the field of IT and software; Quality audits, namely, quality control for data centers; software as a service (SAAS) services featuring software for auditing and monitoring computer systems, computer system resources, user activity; Quality management services, namely, quality evaluation and analysis, quality assurance, and quality control, in the field of computer systems and software; Quality control for others; software as a services (SaaS) services featuring non-downloadable software for information technology (IT) management, IT infrastructure management, remote IT infrastructure management, IT asset management and inventory, IT process automation, IT device lifecycle management, IT security, IT reporting and forecasting, IT infrastructure fault and performance monitoring, and IT service desk and help desk functions; rental of data center facilities; Rental of web servers and co-location servers for containerized data centers of others; Computer co-location services, namely, providing facilities for the location of computer servers with the equipment of others; Technical support, namely, providing backup computer programs and facilities; Technical support, namely, providing computer facilities for the electronic storage of digital data; Electronic data back-up services; software as a service (SaaS) services featuring software for information technology (IT) management, IT infrastructure management, remote IT infrastructure management, IT asset management and inventory, IT process automation, IT device lifecycle management, IT security, IT reporting and forecasting, IT infrastructure fault and performance monitoring, and IT service desk and help desk functions; information technology security, namely, network and system risk assessment and performing quantitative modeling-based assessments of security controls to measure performance in mitigating attack effects; Security detection services, namely, computer security services and monitoring of computer systems for monitoring, log collection, threat detection, and threat hunting; computer security consultancy in the field of security strategy, architecture, solution recommendations, security strategy creation, product quality evaluation, vendor risk assessments, cloud security implementation, security forensics and incident response, data chain of custody gathering and protection; Software design and development consulting; software design and development; database design and development; website design and development for others; design and development of computer hardware; design and development of computer firmware; Technical data analysis services, namely, data automation and collection service using proprietary software to evaluate, analyze and collect service data; Off-site data backup; software as a service (SaaS) services featuring computer software for database automation and monitoring; information technology consulting services in the fields of data warehousing, data management, data monitoring, data optimization, data retention, data analytics, predictive analysis, machine learning, artificial intelligence, neural networks, workflow automation, natural language processing, intelligence analysis, and identity disambiguation; Monitoring of computer systems for detecting unauthorized access or data breach; Computer security services, namely, security intelligence in the nature of monitoring computer systems for security purposes for protecting data and information from unauthorized access; computer security services, namely, risk assessment in the field of security threat analysis for protecting computer networks from unauthorized access; Computer security consultancy, namely, scanning, auditing and monitoring computer systems and networks for vulnerabilities and other security risks; threat protection in the nature of computer virus protection services, monitoring of computer systems for detecting unauthorized access or data breach; Software as a service (SAAS) featuring software and software using artificial intelligence for use in the analysis and protection of the security of email and network communications and data, cybersecurity, email management virus protection, email archiving, email continuity, email security and phishing and domain spoofing scams and attacks; computer security consultancy in the field of vulnerability assessment, security control validation, exercise support, penetration testing, threat emulation, red teaming, managed detection and response, endpoint detection and response, network security monitoring, continuous monitoring, and email threat protection and response; computer consultancy services to detect and mitigate computer network security and compliance risks; technology advisory services related to computer security; Data security consultancy, namely, monitoring, analyzing, and evaluating cyber security equipment, systems, and processes of others; computer network security services and communications network security services in the nature of network intrusion protection, computer testing for vulnerability management and assessment, managing endpoint security on networks, data breach threat analysis, network threat analysis, computer incident response, network incident response, and forensics and penetrat testing; Computer security consultancy in the field of managing endpoint security on networks; Software as a Service (SAAS) service featuring software for health care data requirements compliance and risk mitigation, namely, for information privacy and data breach notification, and maintenance of historical records; Software as a service (SAAS) services featuring software for health care data requirements compliance, namely, for workflow automation, regulatory assurance in the nature of satisfying and documenting an organization's compliance with health care data requirements, and reporting capabilities in the nature of documenting an organization's compliance with the health care data requirements and related remediation actions; providing on-line non-downloadable software for collecting, analyzing, reporting, and providing provider feedback; providing on-line non-downloadable software featuring electronic learning modules for insurance providers; design and development of custom web portals; design and development of end user self-service computer hardware and software tools; providing on-line non-downloadable software for customer relationship management; computer security consultancy, namely, cyber risk management

Business Process Solutions

Helping Health Agencies Optimize

Helping Government Improve Operational Efficiencies

At National Government Services, we are transforming federal healthcare by creating more efficient processes, empowering technology, and amplifying change that's more certain for complex and critical missions. Our business process solutions reduce provider burden, ensure proper payments, and improve beneficiary engagement. All while securing the future of what's next for the evolution of federal health.

- Ensuring Proper Payments
- Reducing Provider Burden
- Streamlining Administration
- Enhancing Beneficiary Experience

Streamlining Federal Health Operations

Proper Payments Reducing Provider Burden Streamlining Administration Beneficiary Experience

Preventing fraud, waste and abuse are essential to the continued operation of our federal health agencies. We implement financial solutions that improve the speed and accuracy of provider reimbursements.

Bridging the Information Gap in Federal Health

As federal healthcare agencies migrate to digital operations, the expectations are to deliver now while not losing sight of the next customer journey. Building on a long-standing history of implementing dozens of large scale federal health programs, National Government Services provides solutions that accelerate system modernization. We help agencies navigate change and solve the most demanding challenges that impact healthcare recipients, providers and end users.

- ✓ Integrated Approach
- ✓ Customer Relationship Management
- ✓ Electronic Data Interchange

Modernizing the Federal Enterprise

Integrated Approach

Technical progress should never come at the cost of disrupting critical operations. We collaborate with our customers and stakeholders to build solutions that integrate the latest tools and technology into their existing systems. Our expert engineers have decades of federal health IT experience and fully understand how to improve federal health IT architecture.

- ✓ Integration of Multi-vendor Products
- ✓ Create Greater Efficiencies
- ✓ Reduce Risk and Control Cost

Customer Relationship Management

Electronic Data Interchange

Industry Fact

Beneficiary Experience

A Human-Centered Approach

Improved Outcomes Driven by Collaboration and Analytics

From early strategy development to final delivery, we are committed to collaborating with our communities to capture statistics and analytics to build better solutions. With the right mix of technology, best practices, and insights captured from a diverse range of contributors, we drive better decision-making and give our healthcare consumers and stakeholders more transparency.

- ✔ Informed Providers
- ✔ Optimize Claims Administration
- ✔ Improving Health Outcomes

A Better Beneficiary Experience

Informed Providers

Optimize Claims Administration

Improve Health Outcomes

The comprehensive enrollment, education, and regulation updates that we deliver to providers enable them to navigate an ever-changing federal health space and provide a better beneficiary experience. This means smoother operations, time saved, errors prevented, and better patient outcomes for our customers. Our provider outreach and education includes:

- ✔ Webinars - Public Health Topics and Regulatory Changes

ABOUT US

National Government Services, Inc., a subsidiary of Anthem, Inc., has a long history of supporting federal health agencies, including the CMS. Throughout the country, NGS has served as a Medicare contractor since the inception of the Medicare Program over 56 years ago. NGS associates are located throughout the country and are committed to Our Mission: *Improving Lives and Communities. Simplifying Healthcare. Expecting More.*

NGS Facts at a Glance

- Certified International Organization for Standardization—ISO 9001:2015.
- Appraised at Maturity Level 2 of the CMMI® with two divisions, e.g. NGD and CEDL, at Level 5.
- Served as a Medicare contractor since 1966.
- Served over 20 million people with fee-for-service Medicare in 20 states and five U.S. territories.
- Served 240 members of Congress.
- Administered the Medicare Part A (hospital insurance) contract, serving:
 - Over 14,000 Part A providers of service in the states of Connecticut, Illinois, Maine, Massachusetts, Minnesota, New Hampshire, New York, Rhode Island, Vermont and Wisconsin.
 - Nearly 4,300 FQHCs in 44 states, District of Columbia and five U.S. territories.
- Administered the Medicare HH+H contract for the states of Alaska, Arizona, California, Connecticut, Hawaii, Idaho, Maine, Massachusetts, Michigan, Minnesota, Nevada, New Hampshire, New Jersey, New York, Oregon, Rhode Island, Vermont, Washington, Wisconsin and the U.S. Territories of American Samoa, Guam, Northern Mariana Islands, Puerto Rico and U.S. Virgin Islands, serving over 6,000 HH+H providers of service.
- Administered the Medicare Part B (medical insurance) contract for the states of Connecticut, Illinois, Maine, Massachusetts, Minnesota, New Hampshire, New York, Rhode Island, Vermont and Wisconsin, serving over 457,000 Part B physicians and providers of service.
- Processed over 223 million Medicare claims and administered benefits of more than \$77 billion from the Medicare Trust Fund in 2021.
- Responded to over 1.5 million phone and IVR calls, 52,000 written inquiries, and 139 Congressional inquiries from the Medicare community in 2021.
- Developed and maintained internet-based self-service tools that allow Medicare providers to have millions of interactions to answer their educational and billing needs in 2021.
- Developed and maintained the NGD system 24 hours a day, 365 days a year. NGD interacts with all Medicare claims processing systems and other multiple government data sources which is capable of hosting 20,000 agents, thousands of web users and the ability to process over 100 million inquiries per year.

national government SERVICES

What We Do Work With Us Who We Are Insights

Federal Health Security Expertise

National Government Services safeguards the personal health information of more than 28 million beneficiaries. Our digital health solutions are built within a robust government security framework and backed by decades of experience working with sensitive data applications and systems. We leverage our expertise in security orchestration to deploy solutions that ensure stability for our nation's federal health programs.

- Secure Data Management
- Federal Compliance
- Threat Protection
- Advanced Monitoring

Securing Essential Federal Health Systems

Secure Data Management Federal Compliance **Threat Protection** Advanced Monitoring

In the face of constantly evolving cyber threats, successful federal health programs are those that both react to disruptions and proactively work to prevent them. Our digital health solutions incorporate proactive threat detection measures to ensure that agencies are always ahead in the fight against cyber attacks. Our solutions alert and respond to potential threats in real time. A high-efficiency automated incident response system reacts to potential threats and reduces response time to resolution.

- Endpoint Security
- Penetration Testing
- Enterprise Identity and Access Management
- Vulnerability/Threat Detection

Technology Experts, Enduring Partners™

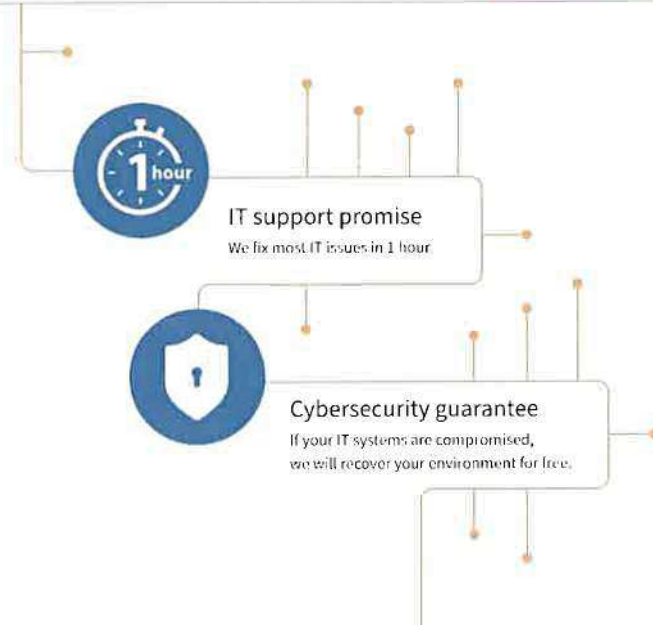

As Technology Experts, Enduring Partners™, we provide managed IT and cybersecurity services which proactively protect the business you have built and strengthen your IT ecosystem as you grow.

LEARN MORE

CONTACT US

At Xantrion, we:

- Perform all IT services in-house
- Provide a U.S. based team, available 24/7
- Are SSAE18 SOC 2 certified annually
- Build strong partnerships rooted in a deep understanding of your business
- Consistently deliver technology solutions that are grounded in real-world experience and tailored to your needs
- Provide unparalleled support for your existing IT ecosystem while proactively building a more resilient cybersecurity and IT infrastructure

IT services for small and medium businesses.

We leverage a flexible, customer-centric approach to create the building blocks of a more secure and resilient tech ecosystem.

Deploying VeloCloud

Is your WAN in need of an upgrade?

If you need to add branch WAN bandwidth at lower costs with no local IT staff, a VeloCloud Cloud-Delivered SD-WAN solution can help! Learn more in the analyst mock RFI white paper.

[SD-WAN RFI Template](#)

Flexible Deployment Options

Choose the deployment that's right for your business.

Cloud

Cloud gateways and cloud orchestration combined with on-premise edges simplify deployments and optimize access to cloud applications.

On-Premise

High performance edges deployed in enterprise data centers and branch offices combined with on-premise orchestration optimize private networks.

Appliance

The VeloCloud Edge is delivered as a zero-touch turnkey Enterprise class appliance deployed in branch offices, headquarters and data centers.

Software

The VeloCloud Edge is delivered as remotely downloadable software for use on commercial off the shelf (COTS) x86 hardware or on virtual machines.

VeloCloud Networks, Inc., the Cloud-Delivered SD-WAN™ company, Gartner Cool Vendor 2016 and a winner of Best Startup of Interop, simplifies branch WAN networking by automating deployment and improving performance over private, broadband Internet and LTE links for today's increasingly distributed enterprises. VeloCloud SD-WAN includes: a choice of public, private or hybrid cloud network for enterprise-grade connection to cloud and enterprise applications; branch office enterprise appliances and optional data center appliances; software-defined control and automation; and virtual services delivery. VeloCloud has received financing from investors including NEA, Venrock, March Capital Partners, Cisco Investments and The Fabric, and is headquartered in Mountain View, Calif. For more information, visit www.velocloud.com and follow the company on Twitter @VeloCloud.

SD-WAN

What is SD-WAN?

Introducing Cloudforce One: our new threat operations and research team

06/21/2022

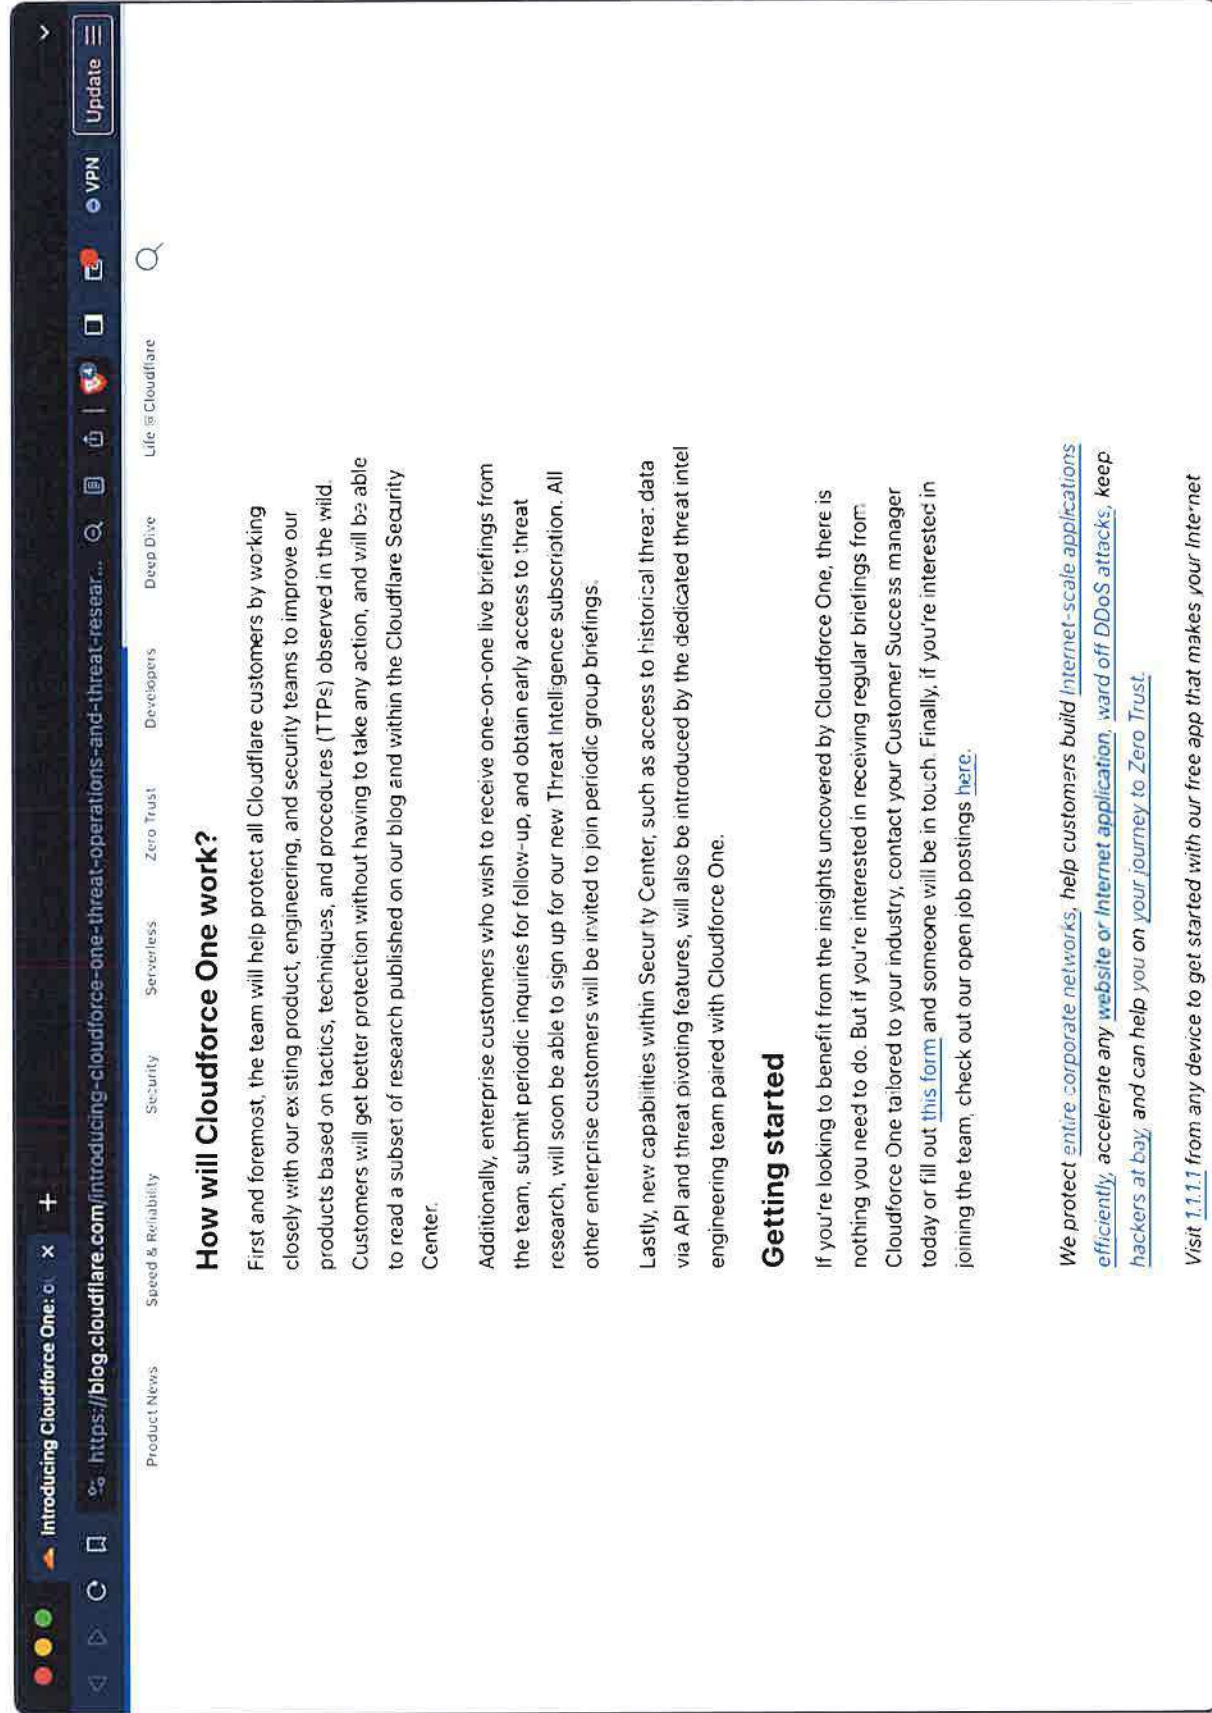

Blake Darché

2 min read

This post is also available in [簡體中文](#), [日本語](#), [Deutsch](#), [Français](#) and [Español](#).

Meet our new threat operations and research team: **Cloudforce One**. While this team will publish research, that's not its reason for being. Its primary objective: track and disrupt threat actors.

The security teams we speak with tell us the same thing: they're inundated with reports from threat intelligence and security product vendors that do little to improve their actual security. The stories are indeed interesting, but they want deeper insights into the techniques and actors targeting their industry—but even more than that, they want to be protected against; these threats with minimal to no involvement. That is the mission on which Cloudforce One will deliver.

How will Cloudforce One work?

First and foremost, the team will help protect all Cloudflare customers by working closely with our existing product, engineering, and security teams to improve our products based on tactics, techniques, and procedures (TTPs) observed in the wild. Customers will get better protection without having to take any action, and will be able to read a subset of research published on our blog and within the Cloudflare Security Center.

Additionally, enterprise customers who wish to receive one-on-one live briefings from the team, submit periodic inquiries for follow-up, and obtain early access to threat research, will soon be able to sign up for our new Threat Intelligence subscription. All other enterprise customers will be invited to join periodic group briefings.

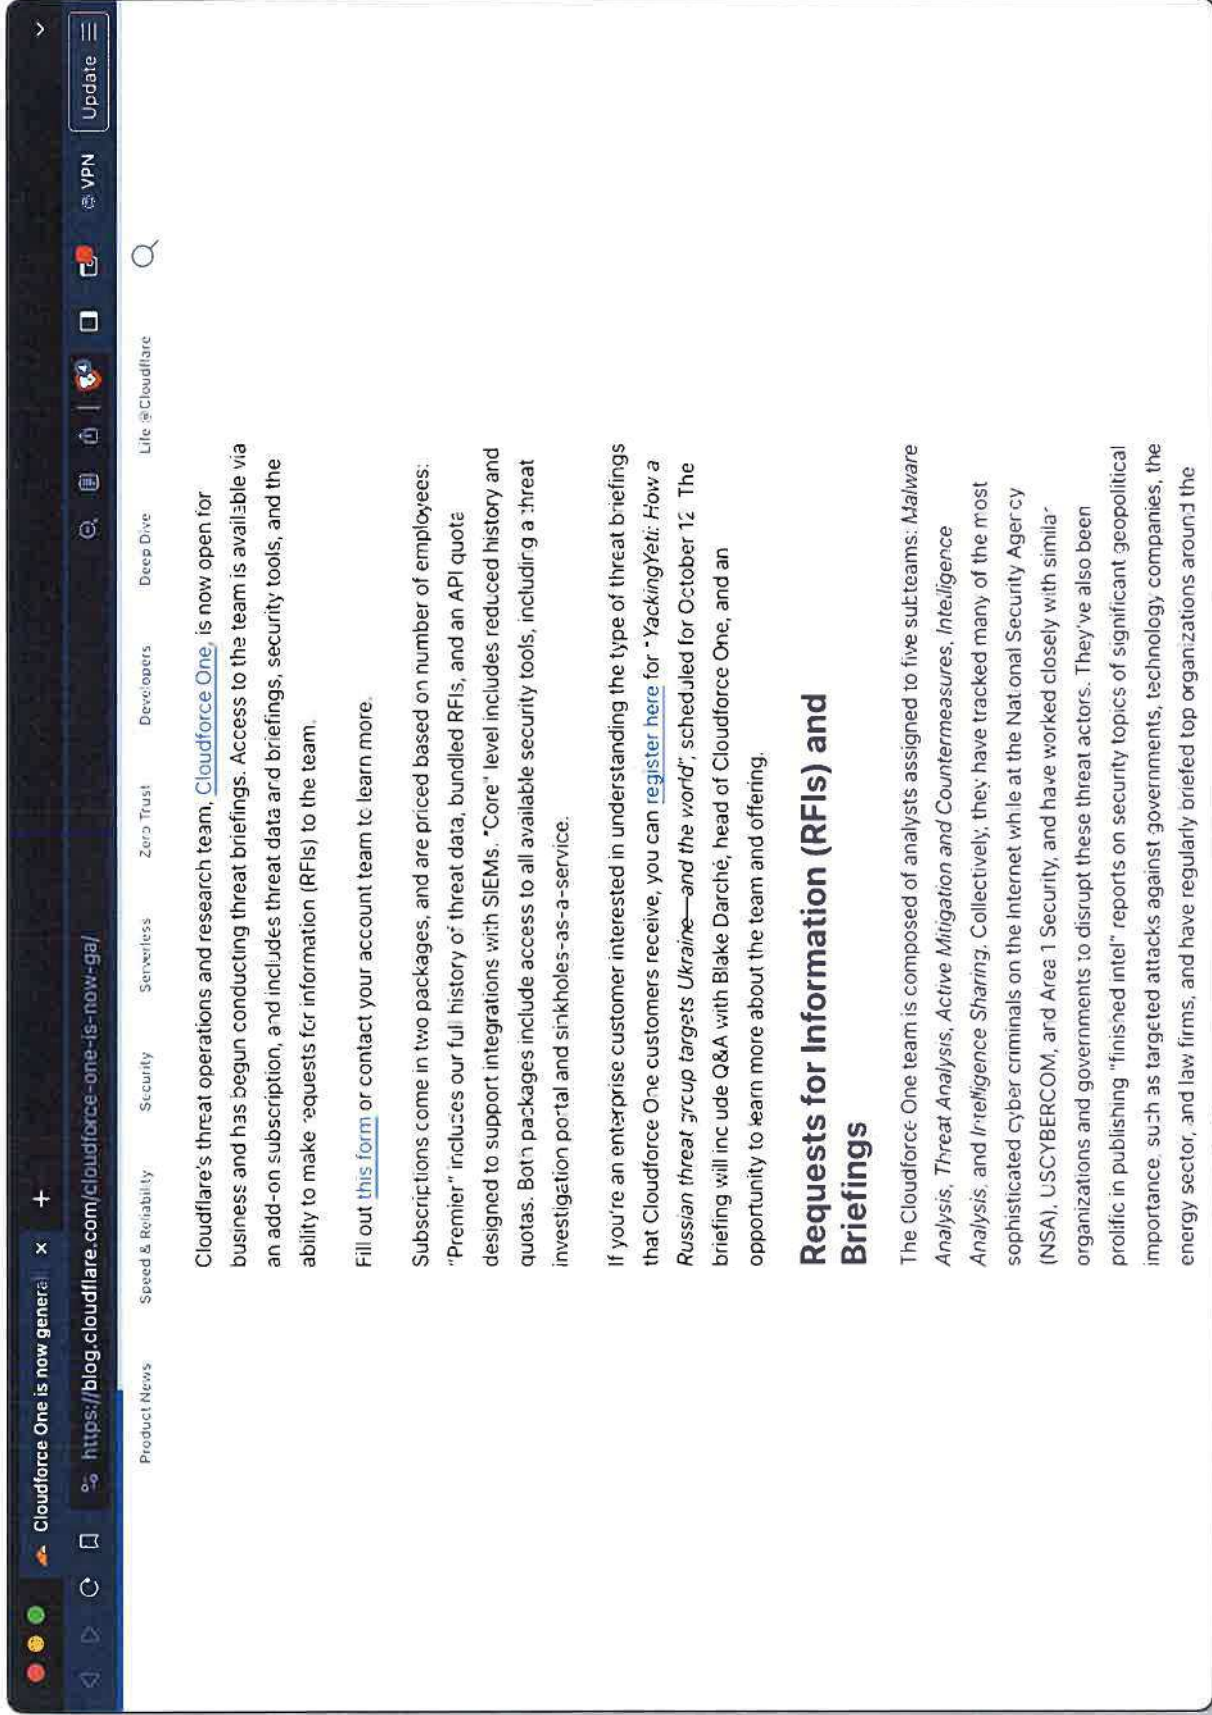

Lastly, new capabilities within Security Center, such as access to historical threat data via API and threat pivoting features, will also be introduced by the dedicated threat intel engineering team paired with Cloudforce One.

Getting started

If you're looking to benefit from the insights uncovered by Cloudforce One, there is nothing you need to do. But if you're interested in receiving regular briefings from Cloudforce One tailored to your industry, contact your Customer Success manager today or fill out [this form](#) and someone will be in touch. Finally, if you're interested in joining the team, check out our open job postings [here](#).

We protect [entire corporate networks](#), help customers build [internet-scale applications](#) efficiently, accelerate any [website or internet application](#), ward off [DDoS attacks](#), keep hackers at bay, and can help you on [your journey to Zero Trust](#).

Visit [1.1.1.1](#) from any device to get started with our free app that makes your internet

Trademark/Service Mark Statement of Use (15 U.S.C. Section 1051(d))

Correspondence Information

COURTNEY R. BLACKWELL

PRIMARY EMAIL FOR CORRESPONDENCE: courtney@bluewater.law

SECONDARY EMAIL ADDRESS(ES) (COURTESY COPIES): tom@bluewater.law

Requirement for Email and Electronic Filing: I understand that a valid email address must be maintained by the applicant owner/holder and the applicant owner's/holder's attorney, if appointed, and that all official trademark correspondence must be submitted via the Trademark Electronic Application System (TEAS).

A fee payment in the amount of \$100 will be submitted with the form, representing payment for the allegation of use for 1 class.

Declaration

- The signatory believes that the applicant is the owner of the mark sought to be registered.
For a trademark or service mark application, the mark is in use in commerce on or in connection with all the goods/services in the application or notice of allowance, or as subsequently modified.
For a collective trademark, collective service mark, collective membership mark application, the applicant is exercising legitimate control over the use of the mark in commerce by members on or in connection with all the goods/services/collective membership organization in the application or notice of allowance, or as subsequently modified.
For a certification mark application, the applicant is exercising legitimate control over the use of the mark in commerce by authorized users on or in connection with the all goods/services in the application or notice of allowance, or as subsequently modified, and the applicant is not engaged in the production or marketing of the goods/services to which the mark is applied, except to advertise or promote recognition of the certification program or of the goods/services that meet the certification standards of the applicant.
- The specimen(s) shows the mark as used on or in connection with the goods/services/collective membership organization in commerce.
- To the best of the signatory's knowledge and belief, no other persons, except, if applicable, authorized users, members, and/or concurrent users, have the right to use the mark in commerce, either in the identical form or in such near resemblance as to be likely, when used on or in connection with the goods/services/collective membership organization of such other persons, to cause confusion or mistake, or to deceive.
- To the best of the signatory's knowledge, information, and belief, formed after an inquiry reasonable under the circumstances, the allegations and other factual contentions made above have evidentiary support.
- The signatory being warned that willful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. § 1001, and that such willful false statements and the like may jeopardize the validity of the application or submission or any registration resulting therefrom, declares that all statements made of his/her own knowledge are true and all statements made on information and belief are believed to be true.

Silver Datacenter

INTRODUCTION

Cloudforce was founded as a full-service technology consulting group, consisting of seasoned engineers with a vast array of technical proficiencies. Today, we specialize in enterprise architecture, cloud computing, cyber-security, compliance, and big data.

COMPETENCIES

Cloud Computing: Cloudforce has successfully enabled our clients to seamlessly migrate systems and applications into a wide variety of cloud environments. By providing expertise in industry leading platforms such as Microsoft Azure, Amazon Web Services, and Google Cloud Platform, we offer flexible solutions for every application and customer.

Systems Engineering & Enterprise Architecture: With a focus on helping our clients achieve their organizational goals in the most efficient, effective, and collaborative means possible, our architects and engineers analyze and design holistic technology strategies which take into account the operations, information systems, resources, and security requirements of an organization as a whole.

Compliance: Possessing extensive first-hand experience in systems compliance, Cloudforce works with clients to ensure their systems and applications adhere to applicable standards such as NIST, HIPAA, PCI-DSS, FERPA, SOX, FedRAMP, and GDPR. We specialize in providing expertise to identify non-compliant areas, remediate these issues proactively, and ensure continuous compliance.

Big Data: Cloudforce possesses unique capabilities in the areas of data science, analytics, statistical modeling, visualization, and machine learning, allowing us to significantly enhance the value and usability of data in new and insightful ways. We design feature-rich systems that are also simple and intuitive, which empowers both technical and nontechnical stakeholders to make data-driven decisions in real time.

THE CLOUDFORCE MISSION

We leverage the power of the cloud to build awesome things and make lives better.

IT Consulting: Additionally, Cloudforce offers a broad set of IT consultative services, to include:

- Computer Systems Design
- Computer Facilities Management
- Disaster Recovery & Business Continuity
- Administrative & General Management Consulting
- Internet Publishing and Broadcasting
- Independent Verification & Validation
- Data Processing & Hosting
- Custom Application Development
- IT Project Management
- Computer & Professional Training

The Cloud.

We create, migrate, and maintain custom cloud solutions that make businesses run better.

No outsourcing. No jargon. No generalizing.
Just results.

Systems Thinking.

We may be tech experts, but our process takes far more than technology into account. We start with your long-term business goals, focus next on the people using your systems, and only then turn our attention to your architecture and applications. It takes a little longer up-front, but saves time and headaches down the line — because even the most elegantly designed system is only as good as the people using it day to day.

[EXPLORE OUR SMART PROCESS](#) —>

Areas of (Hyper)focus.

If you're looking for IT generalists, look elsewhere. We live and breathe Microsoft cloud solutions, and we know everything there is to know about them (seriously, quiz us). In an industry that's always evolving, we stay neck-to-neck with every new cloud service offering and technology evolution -- not just because it's our job, but because it satisfies the deepest hunger for knowledge in our technophile hearts.

[SEE WHAT WE DO](#) →

5 **Build**

4 **Migrate**

3 **Maintain**

2 **Optimize**

1 **Innovate**

We customize cloud-based systems to match our clients' structure, usage, and long-term business objectives, often uncovering new sticking points or areas for improvement and solving them along the way. Our systems are many things (nimble, scalable, cost-efficient, responsive), but they are never one-size-fits-all. By combining tried-and-true industry best practices with the latest in Microsoft's wide array of cloud services, we provide our clients with all the advantages of bleeding-edge tech, without sacrificing stability, security, or long-term support. Gain a competitive edge with technology that empowers your workforce to do more, faster.
