United States Patent and Trademark Office (USPTO)
Office Action (Official Letter) About Applicant's Trademark Application

U.S. Application Serial No. 97397105

Mark: MOTIVE

Correspondence Address:

GERALD L. FELLOWS
GREENBERG TRAURIG, LLP
2200 ROSS AVENUE
SUITE 5200
DALLAS TX 75201
UNITED STATES

Applicant: MOTIVE HEALTH, INC.

Reference/Docket No. 143529030100

Correspondence Email Address: jerry.fellows@gtlaw.com

REQUEST FOR RECONSIDERATION AFTER FINAL ACTION DENIED

Issue date: July 3, 2024

Applicant's request for reconsideration is denied. *See* 37 C.F.R. §2.63(b)(3). The trademark examining attorney has carefully reviewed applicant's request and determined the request did not: (1) raise a new issue, (2) resolve all the outstanding issue(s), (3) provide any new or compelling evidence with regard to the outstanding issue(s), or (4) present analysis and arguments that were persuasive or shed new light on the outstanding issue(s). TMEP §§715.03(a)(ii)(B), 715.04(a).

Application History:

This Office action is in response to applicant's communication filed on August 23, 2023.

In a previous Office action(s) dated February 23, 2023, the trademark examining attorney refused registration of the applied-for mark based on the following: Trademark Act Section 2(d) for a likelihood of confusion with a registered mark. In addition, applicant was required to satisfy the following requirement(s): amend the identification of goods and/or services.

Based on applicant's previous response, the following requirement(s) have been satisfied: amended identification of goods provided. *See* TMEP §§713.02, 714.04.

Accordingly, the following requirement(s) and/or refusal(s) made final in the Office action dated December 5, 2023, are **maintained and continued**:

- Section 2(d) - Likelihood of Confusion Refusal

See TMEP §§715.03(a)(ii)(B), 715.04(a).

The examining attorney responds to applicant's arguments below:

Applicant's Arguments

Applicant argues that the nature of the goods and services are dissimilar. Specifically, applicant argues

that the evidence provided by the examining attorney does not show the services at issue being provided for the benefit others. The examining attorney has attached additional evidence from Cardinal Health, Medline, Mckesson, Stryker, Gotfried Medical, Luna Medical, Cascade Healthcare Solutions, Advantage Medical, and Byram Healthcare, which are entities that provide wearable garments for therapeutic purposes and also offer medical, health, and wellness information to others and healthcare providers.

Applicant argues that the nature of the goods and services provided are different. Specifically, applicant presents evidence from registrant's and applicant's website, to support the fact that the nature of the goods and services are different and that registrant does not provide any of applicant's goods. Determining likelihood of confusion is based on the description of the goods and/or services stated in the application and registration at issue, not on extrinsic evidence of actual use. *See In re Detroit Athletic Co.*, 903 F.3d 1297, 1307, 128 USPQ2d 1047, 1052 (Fed. Cir. 2018) (citing *In re i.am.symbolic, llc*, 866 F.3d 1315, 1325, 123 USPQ2d 1744, 1749 (Fed. Cir. 2017)). Furthermore, although registrant may not provide the applicant's goods, the evidence of record supports the fact that other entities provide the same goods and services at issue, under the same mark.

Applicant argues that the cited services are sold through completely different channels of trade. The examining attorney set forth in previous Office Actions that the services at issue for the services "Providing medical information services; providing health care information services by electronic means; providing medical, preventive, and wellness information to health care providers" in Class 44. The evidence previously attached and the evidence of record demonstrates that the goods and services not only travel in the same channels of trade, but often emanate from the same source.

Applicant argues that care would be exercised by purchasers of Applicant's Goods and the Cited Services. Specifically, applicant argues that the consumers are astute and careful in making decisions to purchase te goods and services and the goods and services are not purchased on impulse. Even if consumers of the compared goods and/or services could be considered sophisticated and discriminating, it is settled that "even sophisticated purchasers are not immune from source confusion, especially in cases such as the present one involving identical marks and related goods [and/or services]." *In re i.am.symbolic, llc*, 116 USPQ2d 1406, 1413 (TTAB 2015) (citing *In re Research & Trading Corp.*, 793 F.2d 1276, 1279, 230 USPQ 49, 50 (Fed. Cir. 1986)), *aff'd*, 866 F.3d 1315, 123 USPQ2d 1744 (Fed. Cir. 2017); *see also In re Shell Oil Co.*, 992 F.2d 1204, 1208, 26 USPQ2d 1687, 1690 (Fed. Cir. 1993). The identity of the marks and the relatedness of the goods and/or services "outweigh any presumed sophisticated purchasing decision." *In re i.am.symbolic, llc*, 116 USPQ2d at 1413 (citing *HRL Assocs., Inc. v. Weiss Assocs., Inc.*, 12 USPQ2d 1819, 1823 (TTAB 1989), *aff'd*, 902 F.2d 1546, 14 USPQ2d 1840 (Fed. Cir. 1990)); *see also Stone Lion Capital Partners, LP v. Lion Capital LLP*, 746 F.3d 1317, 1325, 110 USPQ2d 1157, 1163-64 (Fed. Cir. 2014).

If applicant has already filed an appeal with the Trademark Trial and Appeal Board, the Board will be notified to resume the appeal. *See* TMEP §715.04(a).

If applicant has not filed an appeal and time remains in the response period for the final Office action, applicant has the remainder of that time to (1) [file another request for reconsideration](#) that complies with and/or overcomes any outstanding final requirement(s) and/or refusal(s), and/or (2) [file a notice of appeal](#) to the Board. TMEP §715.03(a)(ii)(B).

IC 010 US 039 044 026

X-ray diagnostic apparatus; electric heating pads for medical purposes; apparatus for phototherapy, namely, electronic light therapy apparatus for the skin; apparatus for the electrical stimulation of groups of muscles for physical therapy purposes; apparatus for the treatment of deafness, namely, hearing aids; medical endoscopes; medical measuring instruments of human head bio-signal, namely, electroencephalographs; electroencephalographs; massaging apparatus for personal use; wearable biometric monitors being measuring devices for medical purpose; sex toys; surgical robots; gloves for use during medical operations; electrocardiograph monitors; medical clothing, namely, surgical scrub suits, tops, pants, and hats; blankets, electric, for medical purposes; dental instruments, namely, prophy angles; electro-stimulation apparatus for muscles and nerves for use in therapeutic treatment for physical therapy, rehabilitative and pain management; laryngeal masks.

IC 015 US 002 021 036

Goods/Services

Drum practice pads; drums and percussion instruments; accordions; tuning apparatus for musical instruments; musical instruments; electronic musical keyboards; tuners for musical instruments; electric and electronic musical instruments; electric musical instruments; electronic pianos; tuners for electronic musical instruments; piano keyboards; pianos.

IC 032 US 045 048 046

Mineral and aerated waters; lagers; beer; soda water; smoothies; syrups, powders, and concentrates for making beverages; drinking waters; malt extracts for making liquors; soft drinks.

IC 038 US 100 104 101

Telecommunications services provided by means of optical fiber networks; leasing of access time to local area networks; leasing of telecommunication apparatus in the nature of local area networking equipment; communications via a global computer network or the internet; data transmission via telecommunication services; datacasting; message sending and receiving services; internet service provider services, namely, provision of access to games via wireless internet; telecommunications, namely, transfer of data by

telecommunications, ISDN services; transmission of voice via a wired or wireless network; communication via interactive voice response [IVR], namely, call routing, call forwarding, call screening, call recording, telephone voice messaging, and electronic messaging services to deliver information to customers of others; electronic transmission of images; electronic transmission of user location information via satellite, digital transmission, or computer terminals; transmission of information by satellite; multimedia broadcasting via the Internet and other communications networks; internet service provider services, namely, providing access to social networks via the internet; video-on-demand broadcasting; teletext and interactive video broadcasting services; broadcasting of teleshopping programs.

IC 044 US 100 101

Medical and healthcare services relating to DNA, genetics and genetic testing; development of individual physical rehabilitation programs; advisory services relating to health; health massage; providing health information; aerial spreading of agricultural chemicals; pest control services for agriculture, horticulture or forestry; [medical services for the care of the skin;] health spa services for health and wellness of the body and spirit; physical rehabilitation; psychological diagnosis services; animal beautician services for dogs; telemedicine services; health farm services, namely, medical services provided at a health resort; medical health care consultancy services; medical consultancy for selecting appropriate medicines; **medical information services** provided via the Internet; landscape gardening; provision of medical information relating to behavioural modification.

Goods/Services

Scientific, optical, weighing, measuring, signaling, checking, inspecting, life-saving and teaching apparatus and instruments, namely, computers and microscopes; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling electricity, namely, electric current transformers, electrical power distribution units; apparatus for sound or image recording, transmission and reproduction; magnetic recording media, namely, blank magnetic disks; data and data information processing apparatus and equipment, namely, couplers; sound recording disks, namely, blank audio discs; digital recording media, namely, blank magnetic disks; data and data information processing apparatus and equipment; software, namely, downloadable software for processing digital images of the anatomy for diagnostic and treatment; downloadable computer programs for managing electronic data and databases, database administration, managing cloud applications, and self-automation of database-management activities; computers; software recorded on magnetic media or downloaded from a remote computer network for the analysis, storage and monitoring of medical data; downloadable computer software applications for providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; telecommunication equipment for use with mobile

networks, namely, telecommunication exchangers, telecommunications transmitters; personal digital assistant; electronic signal transmitters; connected bracelets being measuring instruments, namely, wearable activity trackers; connected scales being electronic scales; connected watches as measuring instruments, namely, smart watches; video cameras; electronic proximity sensors; downloadable mobile applications for providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; digital applications, namely, downloadable mobile applications for assisting with patient diagnosis, providing surveillance of patient health data, and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; software incorporating algorithms, namely, downloadable computer software for assisting with patient diagnosis, providing surveillance of patient health data, and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; artificial intelligence software, namely, downloadable computer software using artificial intelligence for assisting with patient diagnosis, providing surveillance of patient health data, and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; downloadable computer software platforms in the form of information sharing software for providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; connected self-measurement instruments being scales; encoded electronic chip cards connected to an information system containing programming used for assisting with patient diagnosis, providing surveillance of patient health data, and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; downloadable applications for mobile devices for assisting with patient diagnosis, providing surveillance of patient health data, and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; spectacles; contact lenses; smart glasses; in-ear headphones; downloadable telemedicine applications for mobile devices; downloadable augmented reality software for assisting with patient diagnosis, providing surveillance of patient health data, and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; downloadable virtual reality computer programs for assisting with patient diagnosis, providing surveillance of patient health data, and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; analysis systems based on artificial intelligence, namely, downloadable computer software using artificial intelligence for assisting with patient diagnosis, providing surveillance of patient health data,

and providing prevention and treatment information in the fields of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; medical image analysis systems based on artificial intelligence, namely, downloadable computer software using artificial intelligence for medical imaging; virtual reality headsets.

IC 010 US 026 039 044

Medical, surgical, dental and veterinary apparatus, instruments and equipment for the prevention and treatment of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; artificial limbs, organs being artificial hearts, eyes and teeth; orthopedic articles, namely, orthopedic braces, orthopedic belts; surgical instruments for use in orthopedic surgery; medical, surgical and orthopedic implants made of artificial materials; suture materials; compression stockings, tights and socks; stockings, tights and socks for varicose veins; bandages for compression dressing; medical apparatus, instruments and equipment for introducing pharmaceutical preparations into the human body, particularly for prolonged, controlled or immediate release of active substances; infusion devices for administering drugs and syringes for medical use; medical measuring instruments, in particular instruments able to directly transmit data to a database, in particular instruments to measure fevers, heart rate monitors; apparatus, instruments and equipment derived from robotics for medical use, namely, surgical robots; nanobots for medical use in the nature of surgical robots; apparatus, instruments and equipment derived from bionics for medical use for the prevention and treatment of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; medical devices, namely, connected materials for medical use in the nature of suture materials; medical devices, namely, smart materials for medical use in the nature of implants consisting primarily of artificial materials and also including biological materials; medical diagnostic apparatus for allergy tests; blood testing apparatus; medical devices intended for ingestion, namely, endoscopy camera for medical purposes; endoscopic equipment for medical purposes in the nature of video capsules; medical apparatus for measuring biochemical changes in blood; blood biomarker devices in the nature of blood testing apparatus; medical endoscopy apparatus, namely, medical instruments for use in endoscopy procedures; inhalers for medical purposes, sold empty; blood pressure monitors; physiological monitoring and measuring apparatus for medical use, namely, for measuring and monitoring blood pressure, lung capacity for use in the field of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; telemetry apparatus for medical use; acupuncture instruments; hearing aids; automatic analyzers for medical use, namely, hematology analyzers for medical diagnostic uses; medical imaging apparatus; massage apparatus.

IC 042 US 100 101

Scientific and technological services as well as research and design services relating thereto, namely, scientific research, technological research, and new product design services in the fields of pharmaceuticals and bio-chemicals for the prevention and treatment of cardiovascular, immune-inflammatory,

neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; industrial analysis and research services, namely, industrial research in the fields of pharmaceuticals and bio-chemicals for the prevention and treatment of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; scientific research services for medical research purposes; design and development of computer hardware and software; research, design and development of new products for others, namely, medical tools for monitoring, diagnosis, prediction, analysis; medical and scientific research, namely, conducting clinical trials for others; scientific laboratory services; evaluation, scientific and technical project studies in the nature of technical research in the field of pharmaceutical studies; providing virtual computer systems through cloud computing; rental of computer software for medical research and collaboration; updating of computer software; programming for computers; research and development of new products for third parties; electronic data storage; hosting platforms on the Internet, hosting of web sites; temporary provision of non-downloadable software applications accessible via an Internet site, namely, providing temporary use of a web-based software application for medical research and collaboration; web site design services on the Internet, especially collaborative platforms; engineering design services relating to robotics; development of software directed at patients.

IC 044 US 100 101

Medical services; veterinary services; hygienic and beauty care for human beings or animals; advice with respect to health, namely, advisory services relating to health; consultation with respect to pharmacy, namely, pharmaceutical consultation; health services, namely, healthcare; telemedicine services; therapeutic services, namely, physical therapy; medical diagnosis of cardiovascular, immune-inflammatory, neurodegenerative, respiratory, oncological, metabolic and osteoporosis diseases and disorders; home health care services; individualized medical prescription services, namely, preparation of prescriptions by pharmacists; online medical prescription services, namely, preparation of prescriptions by pharmacists; providing support in the monitoring of patients receiving medical treatment, namely, remote monitoring of medical data for medical diagnosis and treatment; consultancy in relation to medical treatment in the home; consultancy regarding self-medication; **medical information services** for patients; remote medical examination services; advice concerning personal well-being in the nature of advisory services relating to health; medical monitoring of patients including provided remotely for medical diagnosis and treatment purposes.

Goods/Services

Magnetic resonance imaging spectrometers for medical purposes; drape sheets of absorbent cellulose wadding for use during surgery; drapes for anesthesia; drapes for use in surgery; chest percussors for medical purposes; padding for medical purposes; suction tubes for medical purposes; constriction rings for the maintenance of penis stiffness in men with erectile dysfunction; aerosol dispensers for medical purposes; acupuncture apparatus; acupuncture equipment; acupuncture devices, namely, electric or non-electric acupuncture devices; acupuncture instruments; acupuncture needles; acoustic amplifiers, namely, acoustic amplifiers as hearing aids for partially deaf persons; acoustic amplifiers for partially deaf persons; amalgam carriers; amputation devices for surgical purposes; anal plugs for medical purposes; analyzers for regular body signals for medical purposes; analyzers for determining blood groups for medical purposes; anesthesia respiration apparatus; cannulae for anaesthetics with receptacles; anaesthetic masks; anesthetic inhalers, namely, anesthetic inhalers that are sold empty; supportive anatomical bandages; customized bandages for wound care; adapted bags for medical instruments; angiographic vascular introducer for placing catheters; angioplasty catheters; probes connected to micro-processors for medical diagnostic purposes; anoscopes; pads, namely, pouches in the form of pads for preventing pressure sores on patient bodies; anti-pressure sore mattresses; annuloplasty rings; anus prolapse bands; apparatus for autologous blood therapy for medical purposes; apparatus for setting urethral catheters; apparatus for acupressure therapy; apparatus for the analysis of bacteria in biological samples for medical purposes; anastomosis devices; apparatus for the manufacture of artificial teeth; apparatus for the manufacture of dental prostheses; apparatus for the use of laser beams for medical purposes; apparatus for the application of laser radiation for surgical purposes; apparatus for the application of laser radiation for medical purposes; apparatus for acne treatment; apparatus for the treatment of respiratory problems; apparatus for the treatment of leg ulcers; apparatus for the treatment of pressure sores; apparatus for the treatment of cancer; apparatus for the treatment of pulmonary diseases; apparatus for the treatment of lymphoedema; apparatus for the treatment of prostate diseases; apparatus for blood analysis; apparatus for chromatography for medical use; apparatus for chromatography for medical purposes; apparatus for the diagnosis of neurological diseases;

apparatus for the diagnosis of inflammatory diseases; apparatus for the diagnosis of cardiovascular diseases; apparatus for the diagnosis of cerebral vascular disease; apparatus for endoscopy; apparatus for the collection of body fluid samples; apparatus for the extraction of medical samples; apparatus for artificial anesthesia; apparatus for artificial respiration; apparatus for the artificial insemination of animals; apparatus for artificial resuscitation; apparatus for the alleviation of respiratory distress; apparatus for the relief of lung diseases; apparatus for the alleviation of lung disorders; apparatus for medical rehabilitation; apparatus for non-invasive surgery; apparatus for the reconstruction of teeth; apparatus for the stimulation of acupuncture points; apparatus for the therapeutic toning of the body; apparatus for the examination of metabolic diseases; apparatus for venipuncture; apparatus for electrical muscle stimulation for medical purposes; apparatus for therapeutic purposes for performing rinses; apparatus and installations for the production of x-rays for medical purposes; apparatus and instruments for radioisotopic therapy; apparatus and instruments for use in foot surgery; apparatus for analyzing alcohol in breath fluids for medical purposes; apparatus for analyzing alcohol in body fluids for medical purposes; apparatus for analyzing images for medical purposes; apparatus for adjusting artificial teeth; apparatus for fitting artificial teeth; apparatus for fitting dental prostheses; apparatus for the insertion of urethral catheters; physical exercise apparatus for medical purposes; apparatus for measuring pulmonary function; apparatus for muscle training for medical purposes; apparatus for the turning of patients; apparatus for analyzing brain wave frequencies; apparatus for the treatment of deafness; apparatus for the treatment of cellulitis; apparatus for the determination of blood flow; apparatus for the purification of blood in surgical procedures; apparatus for performing diagnostic tests for medical purposes; apparatus for electrical stimulation of muscle groups for medical purposes; apparatus for the production of oxygen for medical purposes; apparatus for producing ultrasonic waves for medical use; apparatus for fulguration of the heart; apparatus for obtaining autologous blood; apparatus for the manufacture of artificial teeth; apparatus for physical rehabilitation for medical purposes; apparatus for laser light treatment for medical purposes; apparatus for measuring arterial blood flow in the eye; apparatus for microdermabrasion; apparatus for nerve localization; apparatus for the reconstruction of bones; apparatus for therapeutic muscle toning; apparatus for the therapeutic stimulation of the muscles; apparatus for therapeutic stimulation of the body; apparatus for the thermal treatment of cancer; apparatus for monitoring signs of life; apparatus for administering intravenous solutions; apparatus for preventing pressure sores; apparatus for use in the implementation of diagnostic tests for detecting the abnormal prion protein; apparatus for use in toning the muscles for medical rehabilitation; apparatus for use by dentists; apparatus for use in angiography; apparatus for use in orthodontics; apparatus for the prevention of leg ulcer; apparatus for heat treatment of cancer; ligating clip applicators for medical use; applicators in the form of sponges for medical purposes; bracelets for medical purposes; braces, namely, braces assurgical rails; armboards, namely, armboards as surgical splints; hemostats; dental articulators; medicinal bottle stoppers; doctor's suitcases, filled with medical instruments; medical apparatus and instruments relating to neurovegetative reactivity; medical treatment chairs for patients; medical and surgical laparoscopes; asymmetrical bars for physical

exercises adapted for medical purposes; respiratory apparatus for artificial respiration; respiratory gas analyzers for medical diagnostics; respirators for artificial respiration; respirators for medical purposes; respiratory helmets for artificial respiration; respiratory masks for artificial respiration; respiratory masks for medical purposes; respiratory protective masks made of nonwoven material for surgical applications; respiratory masks for surgical applications; respiratory masks for artificial respiration; respiratory protective masks for medical applications; respiratory therapy equipment; respiratory monitors for medical purposes; respiratory monitoring devices; respiratory monitoring devices for medical purposes; audiometer; breast milk storage bottles; inflatable garments for medical purposes; inflatable pillows for medical purposes; inflatable compression devices for extremities for medical purposes; inflatable mattresses for medical purposes; inflatable mattresses for orthopedic purposes; inflators for balloon catheters; inflatable instruments for balloon catheters; inflation syringes for medical or surgical purposes; collection bags for body excretions; ophthalmic appliances; eye baths; eye implants; eye implants made of artificial materials; eye pressure measuring devices for medical purposes; eye droppers for medical purposes; eye pads for surgical purposes; eye shields for surgical purposes; eye protection for medical purposes; exhalation valves for artificial respiration; external fixators in the form of splints; autoclaves for medical purposes; autologous blood processing apparatus; autologous blood processing instruments; automatic analyzers for medical diagnostics; automatic blood sampling instruments for medical purposes; automatic blood collecting devices for medical purposes; automatic blood separation devices for medical purposes; automatic blood separation instruments for medical purposes; automatic blood collection devices for medical purposes; automatic devices for blood separation for medical purposes; automatic vaccination equipment; automatic instruments for blood sampling for medical purposes; automatic instruments for blood separation for medical purposes; automatic medical dosage apparatus for injections for humans; automatic medical dosage apparatus for injections for animals; automatic spirometers for medical purposes; automated analytical instruments for foreign bodies in body fluids for medical purposes; automated analytical instruments for body fluids for medical purposes; autotransfusion devices; baby bottles; baby bottle nipples; baby pacifiers; hoists for assisting invalids out of baths; baths for the sick, for medical purposes; balloon inflators for dilatation balloon catheters; balloon catheters; balloon catheters for angioplasty; balloons for use in arthroscopy; bandages with support for surgical purposes; supporting bandages for veterinary purposes; bandages for orthopedic purposes; elastic bandaging material ; supporting bandaging material; substitutes for ligaments; bars for medical and therapeutic purposes; respiratory devices for newborns to prevent asphyxiation; respirators for patients; cup holders for laboratory samples for medical purposes; basins for medical purposes; pelvic clamps; pelvic rests; humidifiers for medical treatments; humidifiers for medical purposes; humidifiers for use with respiratory therapy apparatus; humidification apparatus for medical purposes; humidifying machines for medical purposes; containers for surgical instruments; containers for surgical instruments for medical purposes; containers for medical waste; containers for medical waste products; containers for transporting samples containing living human cells for medical purposes; containers for the administration of

medicaments; lithotomy leg holders; greaves, namely, splints; leg traction units for medical purposes; teething necklaces for pain relief during teething; teething rings for babies; teething rings incorporating baby rattles; teething rings to facilitate teething; teething rings for pain relief during teething; mouthguards for medical purposes; lighting apparatus for medical purposes; exposed x-ray films for medical purposes; pacifiers for newborns; cutlery for medical purposes; beds for surgical purposes; beds for special beds for medical purposes; bedpans; bags for surgical use for collecting urine; ostomy bags; bags for the endoscopic retrieval of tissue for medical purposes; bags for stoma patients; bags for collecting body fluids for medical purposes; imaging diagnostic apparatus for nuclear medicine; biocompatible coated stents; biodegradable implants for medical purposes; biodegradable implants for bone fixation; biodegradable prostheses for medical purposes; biological bone implants; biopsy needles; biopsy forceps; biotherapeutic facial masks; blood collection devices for medical purposes; blood sampling tubes for surgical purposes; blood collection tubes for medical purposes; blood analyzers for medical purposes; blood pressure monitors; blood pressure testing apparatus; blood filters for medical purposes; blood filters for extracorporeal use for medical purposes; haemostats; coagulometers; blood lancets; blood pumps; haemostatic devices for medical purposes; bloodstopping apparatus for medical purposes; blood-staining devices for medical purposes; blood-staining instruments for medical purposes; hemostatic instruments for medical purposes; blood transfusion apparatus; blood transfusion sets; blood testing apparatus for medical purposes; blood warmers for medical purposes; haemocytometers; blood centrifuging tubules for medical purposes; blood glucose meters; blood glucose testing apparatus; blood glucose monitoring apparatus; bits for surgical drills; drills for surgical purposes; drills for dental applications; drilling stencils for surgical purposes; surgical stencils; drilling templates for dental application; tanning lamps for medical purposes; trusses; chest drainage devices for removing fluids from the pleural cavity of patients; nipple shields for medical purposes; breast implants; breast prostheses; breast pumps for breastfeeding mothers; chest supports for medical purposes; nipple caps for personal use for medical purposes; incubators for medical purposes; incubators for babies; stirrups for use with medical examination tables; buccal tubes; mastectomy brassieres; bypasses for surgical purposes; cerclage wires; chemiluminescent light sources for endoscopy; chemiluminescent lamps for endoscopic examinations; chemically activated heating pads for medical purposes; chemically activated cold compresses for medical purposes; chemically activated cooling gel compresses for medical purposes; chemically activated heat gel compresses for medical purposes; chemically activated heat compresses for medical purposes; chiropractic instruments; surgery sutures; apparatus for use in surgery in the drainage of incisions; surgical apparatus for wound drainage; surgical apparatus and instruments; surgical apparatus and instruments for medical purposes; surgical apparatus and instruments for veterinary use; surgical apparatus and instruments for dentistry; surgical respiratory masks; surgical drills; surgical threads; surgical thread knives; surgical skin staplers; surgical implants made of artificial materials; surgical instruments; surgical instruments for orthopaedic surgery; surgical caps; surgical staplers; surgical clips; surgical blades; surgical bone scrapers; surgical lamps; surgical masks with high filtering effect; surgical knives; surgical

needles; surgical sutures; surgical suture and wound closure materials and products; surgical nets; surgical nets, mainly consisting of artificial material; surgical perforators; surgical tweezers; forceps for repositioning; surgical retractors; surgical masks; surgical saws; surgical scissors; surgical splints; surgical tubes for wound drainage; surgical cutting tools; surgical shoe covers; surgical sponges; suture materials; surgical probes; surgical mirrors; surgical headlights; surgical and wound care equipment; surgical wound closers; surgical forceps; chromatographs for medical purposes; chromatography plates for medical purposes; chromatographic columns for medical purposes; chromatogram analyzers for medical purposes; chromatography apparatus for medical use; chromatography apparatus for medical purposes; chromatography apparatus for medical use; chromatography apparatus for medical purposes; chromatography instruments for medical purposes; chromatography columns for analytical chromatography for medical purposes; chromatography columns for medical purposes; chromatographic apparatus for medical use; chromatographic devices for medical purposes; chromatographic apparatus for medical use; chromatographic apparatus for medical purposes; chromatographic instruments for medical purposes; chromatographic medicine apparatus; co2 insufflators for endoscopic diagnosis; co2 insufflators for endoscopic therapy; co2 insufflators for urological diagnosis; co2 insufflators for urological therapy; co2 irrigators for endoscopic diagnosis; co2 irrigators for endoscopic therapy; co2 irrigators for urological diagnosis; co2 irrigators for urological therapy; cochlear implants; computer-controlled training devices for therapeutic purposes for medical purposes; computer-controlled exercise devices for therapeutic purposes for medical purposes; computed tomography equipment for medical purposes; women's stockings for surgical purposes; permanent magnets for medical purposes; permanent magnets for therapeutic purposes; blankets for medical purposes; defibrillators; defibrillator monitors; stretchable tapes for introduction into blood vessels for the treatment of stenosis; stretchable tapes for introduction into the bile duct for the treatment of stenosis; stretchable tapes for introduction into the esophagus for the treatment of stenosis; stretchable tapes for insertion into tubular organs of the body for the treatment of stenosis; surgical bougies; dental articulators; dental drills; dental drill bits; dental colour guides; dental needles; dental probes; diabetic socks; diagnostic, testing and monitoring equipment for medical purposes; diagnostic apparatus for pregnancy tests; diagnostic instruments for ophthalmology; diagnostic catheters for electrophysiology; diagnostic test sets for the detection of haemoglobin in faeces; diagnostic apparatus for detecting abnormal prion proteins; diagnostic imaging apparatus for medical purposes; diagnostic control apparatus for use in immunoassay procedures for medical purposes; diagnostic medical examination equipment for use in immunoassay procedures; diagnostic test apparatus for use in immunoassay for medical purposes; diagnostic test equipment for use in immunoassay procedures for medical purposes; dialysis machines; dialysis machines for medical purposes; dialysis machines for veterinary purposes; dialysis membranes; diaphragms for contraception; diaphyseal plugs; diathermic handles for medical purposes; digital electronic sphygmomanometers; digital hearing aids; digital thermometers for medical purposes; dilatation balloon catheter for vascular plastic surgery; dilatation catheters; distractors as medical apparatus; dosing pumps for administration of medicinal products in a measured quantity for

medical purpose; drainage bags for wounds; drainage tubes for medical purposes; pressurized suits for medical use pressure bandages for anatomical support; pressure garments for medical treatment; post-operative pressure garments; pressure-relieving pads and cushions for medical purposes; pressure micro sensor catheters; pressure monitors for medical purposes; flow-controlled centrifugal filters for medical purposes; fluoroscopy apparatus for medical purposes; transparent face shields for medical personnel; nozzles for dental syringes; real-time filters as parts of x-ray monitors for medical purposes; real-time filters as parts of x-ray cameras for medical purposes; stainless steel cutlery for surgical use; autologous blood processing apparatus for medical purposes; autologous blood processing instruments for medical purposes; insufflators for medical purposes; introducers for implanting anti-embolic filters; introducers for implanting vena-cava filters; mats for medical air-bubble massage baths; insoles for orthopedic shoes; insoles for footwear for orthopedic purposes; insole-shells for orthopedic purposes]; orthopedic insoles; insoles for orthopedic footwear; insoles for corrective treatment of conditions of the lower limbs; insoles for corrective treatment of conditions of the feet; enuresis alarms for medical purposes; inserts for respiratory masks for surgical purposes; inserts for respiratory masks for medical purposes; screw-in tools for surgical purposes; disposable nozzles for dental syringes; disposable gloves for surgical purposes; disposable gloves for veterinary purposes; disposable lancets for finger puncture; disposable microtome blades for medical purposes; disposable needles for subcutaneous syringes; disposable teats; disposable prophylaxis angles for medical purposes; disposable protective gloves for medical purposes; disposable specula; disposable syringes; ice bags for the treatment of injuries; ice bags for medical purposes; ice bag pillows for medical purposes; elastic bandages; elastic bandages for supporting purposes; elastic bandages incorporating copper; elastic bandages incorporating copper compounds; elastic elbow rests for medical purposes; elastic ankle braces for medical purposes; elastic wrist rests for medical purposes; elastic compression bandages for surgical purposes; elastic compression bandages for medical purposes; tubular elastic bandages for supporting joints; tubular elastic bandages for supporting limbs; elastic stockings for medical purposes; elastic support bandages for surgical purposes; elastic supports for the knee; elastomeric materials for medical purposes; electrically heated garments for medical purposes; electrically heated pillows for medical purposes; electrically heated pads for medical use; electrically heated socks for medical purposes; electrically operated massagers; electric breathing apparatus for artificial respiration; electric blankets for medical purposes; electric drills for surgical purposes; electric foot warmers for medical purposes; electric stapling guns for surgical purposes; electric blankets for medical purposes; electric heating pads for medical purposes; electrical aids for hearing; electric hearing aids; electrical instruments for medical purposes for the diagnosis of blood; electric cauteries for surgical purposes; electric bone surgery equipment; electric air compressors for surgical purposes; electrical massagers for household use; electric massagers for personal use; electric oral care devices for use by dentists for medical purposes; electric nerve stimulators; electrical low-frequency apparatus for therapeutic purposes, namely, for muscle stimulation for medical purposes; electrically heated pillows for medical purposes; electric scalpels for surgical purposes; electrical oral irrigators for medical purposes; electrical utensils for

use by dentists in the care of teeth; electric dental care apparatus for use by dentists for medical purposes; electrical atomizers for medical purposes; electric acupuncture instruments; glass electrodes for medical purposes; electrodes for electrophysiology; electrodes for cardiology; electrodes for external defibrillators; electrodes for cardiac defibrillators; electrodes for heart pacemakers; electrodes for medical apparatus; electrodes for medical purposes; electrodes for recording electrophysiological parameters; electrodes for recording biological parameters; electrodes for recording biological parameters for medical purposes; electroencephalographs; power filters for medical purposes; electrocardiographs; electrocardiography monitoring apparatus; electrocardiography apparatus; electrocardiography instruments; electrocardiographic apparatus; electrocardiographic recording apparatus as medical equipment; electrocardiographic equipment; electrocardiogram detectors with video display; electrocardiographs; electrocardiographs for veterinary purposes; electrocardiography devices; electromagnetic high-frequency apparatus for therapeutic purposes; electromagnetic medical equipment; electromedical diagnostic apparatus; electromechanical equipment; electromedical devices for firming treatments; electromedical instruments for weight reduction treatments; electronic acupuncture equipment; electronic analyzers for medical purposes; electronic recording apparatus for blood oxygen saturation for medical purposes; electronic blood pressure recording apparatus for medical purposes; electronic blood pressure monitors for medical purposes; electronic endoscopes for surgical purposes; electronic endoscopes for medical purposes; electronic heart rate monitors for medical purposes; electronic heart rate recorders for medical purposes; electronic heartbeat recorders for medical purposes; electronic heart signal monitors for medical purposes; electronic hearing aids; electronic carbon dioxide recorders for medical purposes; electronic carbon dioxide monitors for medical purposes; electronic muscle stimulators for medical purposes; electronic nerve stimulators for medical purposes; electronic stimulators for medical purposes; electronic temperature recording devices for medical purposes; electronic temperature monitoring devices for medical purposes; electronic thermometers for medical purposes; electronic drop counters for medical purposes; electronic monitors for blood oxygen saturation for medical purposes; electrophoresis apparatus; elbow braces for medical purposes; elbow guards for epicondylitis; contraceptive devices; contraceptive apparatus; endodontic instruments; endoprostheses; endoscopes; endoscopes for surgical purposes; endoscopes for diagnostic purposes; endoscopes for medical purposes; endoscopes for therapeutic purposes; endoscopy cameras; endoscopy cameras for medical purposes; endoscopic apparatus; endoscopic equipment; endoscopic occlusion balloons; endotracheal tubes; end pieces for crutches; enterostomy bags for postoperative use; processors for photo-sensitive films for medical purposes; processors for x-ray films for medical purposes; processors for x-ray plates for medical purposes; epidural analgesia apparatus for surgical purposes; epidural analgesia apparatus for medical purposes; detecting instruments for medical purposes; detecting instruments for veterinary purposes; external defibrillators; extracorporeal blood filters for medical purposes; filaments for medical purposes; excrement bags for medical purposes; color pyrometers for medical purposes; dental color guides for medical purposes; fiber-optic viewers for medical purposes; fiber-optic imaging devices for medical purposes; fiber-optic

devices for medical purposes; fiber-optic temperature probes for medical-diagnostic purposes; heel pads for orthopedic use; orthopedic supports for heels; solid state lasers for medical purposes; moisture exchangers for medical purposes for transmitting the heat of exhaled breath to the inhaled breath; fibroscopes for medical purposes; clinical thermometers; filters for blood and blood components for medical purposes; filters for temporary use in veins; filters for ultraviolet radiation for medical purposes; filters for preventing embolism; filters for use in veins; diagnostic fingerstalls for medical purposes; finger guards for medical purposes; finger splints; fistula needles; bottles for intravenous feeding; bottles for parenteral feeding; feeding bottle teats; bottles for feeding babies; flexible endoscopes for medical purposes; liquid chromatography injectors for medical purposes; liquid chromatography instruments for medical purposes; liquid chromatographic columns for medical purposes; fluid collection containers for medical purposes; fetal pulse monitors; photometric analyzers for medical purposes; photometric instruments for medical purposes; milling cutters for dentists; caulking guns for surgical purposes; guides for surgical purposes; guide wires for balloon dilatation catheters; guide wires for use with balloon dilatation catheters; fulguration electrodes for the heart; supportive foot bandages; orthotic inserts for footwear; foot orthoses; biliary drainage catheters; galvanic tapes for medical purposes; galvanic therapy equipment for medical purposes; gamma cameras for medical purposes; gas analyzers for medical analysis purposes; gas chromatography apparatus for medical purposes; gas detectors for medical purposes; gas laser equipment for medical treatments; gastroscopes; uterine syringes; birthing chairs; denture parts; obstretic apparatus for cattle; obstetric beds; obstetric apparatus; obstetrics tables; forceps; vascular punches; vascular access ports for medical purposes; contoured inflatable pads for patients; contoured cushions for patients' use on chairs adapted for medical purposes; shaped padding for supporting body parts [medical purposes]; walking aids; walking aids for medical purposes; walking frames for disabled persons; brain pacemaker; aural prostheses; hearing protectors; ear plugs for medical purposes; bandages for joints; suspensory bandages for joints; endoprotheses for joints; acetabular prostheses; joint prostheses; padded cushions for medical purposes; padded neck supports for surgical purposes; padded neck supports in form of pillows for surgical purposes; devices, namely oral irrigators for use by dentists when rinsing the gum; apparatus for autologous blood therapy for medical purposes; apparatus for blood analysis for medical purposes; devices for blood monitoring for medical purposes; apparatus for blood tests for medical purposes; apparatus for vaccination; appliances for artificial sleep; apparatus for acupuncture; apparatus for chromatography for medical purposes; apparatus for echocardiographic imaging; apparatus for electrocardiography; endoscopic apparatus; equipment for foot massage; devices for measuring urine pressure for medical purposes; devices for cardiac defibrillation; apparatus for physiotherapy; apparatus for radioisotope imaging; apparatus for tumor diagnostics; devices for heat therapy; apparatus for reproducing dental images for medical purposes; apparatus for ileostomy patients for medical purposes; apparatus for colostomy patients for medical purposes; apparatus for physical exercise for medical purposes; apparatus for physical therapy for therapeutic purposes; medical diagnostic equipment; orthopedic appliances; equipment for physical therapy; apparatus for veterinary purposes; apparatus for analyzing

gases for medical purposes; apparatus for analyzing substances for medical purposes; apparatus for inflating balloon catheters; sound excluding apparatus for medical purposes; devices for the insertion of artificial teeth; arthroscopy irrigation instruments; devices for rinsing body cavities; apparatus for practicing athletic mobility for medical rehabilitation purposes; apparatus for destroying subcutaneous needles specifically for medical purposes; blood glucose meters; devices for enteral feeding; apparatus for maintaining physical fitness for medical purposes; apparatus for generating electromagnetic fields for use in medical treatments; apparatus for generating electromagnetic fields for use in medical diagnostics; apparatus for generating magnetic fields for medical treatments; apparatus for generating magnetic fields for use in medical diagnostics; sources of ultrasonic fields for use in medical treatment; sources of ultrasonic fields for use in medical diagnosis; devices for the detection of dental diseases; devices for measuring the heart rate; cystometric instruments; devices for measuring intra-cranial pressure; apparatus for nerve stimulation; apparatus for the examination of dental diseases; devices for preventing unintentional peep drops as parts of respiratory devices for maintaining pressure; facial masks for surgical purposes; facial masks for surgical purposes for protection against bacteria; facial masks for surgical purposes for protection against toxic substances; face masks for medical purposes; face masks for medical purposes for protection against bacteria; face masks for medical purposes for protection against toxic substances; facial saunas for medical purposes; face shields for surgical purposes; face shields for medical purposes; protective face masks for medical purposes; protective face masks for dental purposes; tissue expanders for use in surgery; weights for physical exercises adapted for medical purposes; weight training apparatus for medical purposes; gypsum bandages for orthopedic purposes; casting splints; goniometers for surgical purposes; goniometers for orthopedic purposes; rubber gloves for surgical purposes; rubber gloves for medical purposes; elastic stockings for medical purposes; elastic stockings for surgical purposes; belts, electric, for medical purposes; orthopaedic belts; belts for surgical purposes; belts for medical purposes; belts for orthopedic purposes; belts for attaching medical monitors to patients; gynecological dilators; gynecological instruments for the examination of reproductive organs of women; hair prostheses; hair protection hoods for doctors; suspensory adhesive bandages; adhesive drapes for surgical use; hooks for limb replacements; hooks for spondylolysis; hooks being fracture fixation devices; cervical collars; elizabethan collars for veterinary purposes; retentive belts for use by ileostomy patients; retentive belts for use by colostomy patients; hematimeters; hematology analyzers; hammers for surgical purposes; hammers for medical or surgical purposes; hammers for medical purposes; hemodialysis apparatus; haemoglobinometers; haemoperfusion cartridges; haemostatic appliances; haemostatic instruments; haemocytometers; hand-operated hand sprayers for medical purposes; hand-operated stapling guns for surgical use; hand-operated sprayers for medical purposes; hand-operated atomizers for medical purposes; wrist rests for medical purposes; gloves for medical examinations; gloves for medical purposes; gloves for veterinary purposes; gloves for dental purposes; gloves for use in operations; gloves for use in hospitals; hand-held mirrors for dental examinations; hand exercisers for therapeutic purposes; urine drainage bags; urinals in the form of vessels; urinals for medical purposes in the form of vessels; urethral dilators; urethral

catheters; urethral probes; urethral probe syringes; urethral syringes; urethral stents as surgical aids; hard elastic sutures; dermabraders; skin temperature indicators for medical purposes; invalids' hoists; stapling apparatus for surgical purposes; staplers for surgical purposes; staplers for medical purposes; staples for surgical purposes; staples for medical purposes; hot-air vibratory devices for medical purposes; electric blankets for medical purposes; electric heating pads, for medical purposes; medical heating pads for medical purposes; heating pads, not electric, for medical purposes; heating pads for medical purposes; heating pads for therapeutic purposes; heparin control apparatus for surgical procedures; removable orthopedic insoles; heart rate monitors; heart rate calculators for medical purposes; cardiac vascular prostheses for surgical prostheses; cardiac catheters; cardio-pulmonary diagnostic instrumentation; cardio-pulmonary perfusion apparatus; heart monitors; heartbeat monitoring devices; heart pacemakers; leads for pacemakers; heart probes; cardiac stimulators; heart monitors to be worn during exercise; cardiovascular catheters; feeding aids and pacifiers for medical purposes; adult sexual stimulation aids; contraceptive devices; auxiliary bars for lifting patients; high-frequency generators for medical treatment; high-frequency coagulation instruments for medical purposes; high-frequency coagulation instruments for dental purposes; high-frequency cutting instruments for medical purposes; high-frequency cutting instruments for dental purposes; hearing aids; hearing apparatus for the deaf; hearing aids for the deaf, namely, acoustic aids; ear trumpets; hip joint prostheses; hip joint prostheses for personal use; corsets for medical purposes; hip implants; corn knives for medical purpose; hybrid beds in the form of water beds with soft bedding for medical purposes; hydrophilic guide wires for tracing catheters; hygienic masks for medical purposes; immunological analyzers for medical purposes; ileostomy bags for postoperative use; immunity absorption columns for diagnostic purposes for medical purposes; immunity absorption columns for therapeutic purposes for medical purposes; implant abutments for medical purposes; implant abutments for dental purposes; implant bridges for dental purposes; orthopedic implants; prostheses implants; implants of artificial materials; implants for ligaments [prostheses]; implants for bone surgery in the form of prostheses; implants for osteosynthesis; implants for dental surgery in the form of prostheses; implants for use in bone transplants in the form of prostheses; implants for use in facial surgery in the form of prostheses; implants for use in oral surgery in the form of prostheses; implants for use in dentistry in the form of prostheses; implants for use in tendons in the form of prostheses; implantation materials for use in surgery in the form of prostheses; implantation materials for use in dental surgery in the form of prostheses; implant models for medical purposes; implantable defibrillators; implantable urethral stents; implantable heart pulse generators; implantable cardiac pacemakers; implantable heart stimulators; implantable artificial body replacement parts; implantable leads for cardiac phase control; implantable prostheses for medical purposes; implantable pacemaker cable; implantable subcutaneous drug delivery devices; implantable urological prostheses; impulse measuring instruments for medical purposes; infrared apparatus for surgical purposes; infrared apparatus for curative purposes; infrared apparatus for medical purposes; infrared lamps for medical purposes; infrared radiators for surgical purposes; infrared radiators for medical purposes; infrared radiators for therapeutic purposes; infrared thermometers for

medical purposes; infusion apparatus for therapeutic purposes; syringes for injection; infusion pumps for medical purposes; infusion pumps for the administration of medicaments; infusion columns for medical purposes; inhalers for medical purposes; inhalers for the evaporation of aromatherapeutic substances for medical purposes; inhalers for the evaporation of paramedical substances; inhalers for administering medicaments; inhalers for medical purposes; inhalers for medical purposes that are sold empty; inhalers for therapeutic purposes; injection devices without needles for medical purposes; injection sleeves for medical purposes; injection instruments for pharmaceuticals; hypodermic needles; injection needles for medical purposes; syringes for injections; injection syringes for medical purposes; incontinence bed pads for babies; incontinence pads for beds; incontinence pads for toddlers; incubators for medical purposes; incubators for babies; inner lumens for balloon catheters; instruments for autologous blood therapy for medical purposes; instruments for rubber band ligation of haemorrhoids; instruments for the manufacture of artificial teeth; visible light treatment instruments for medical purposes; instruments for intraluminal sclerosation of varicose veins; lithotomical instruments; massage apparatus; heat therapy instruments for medical purposes; prosthetic implant instruments for medical purposes; medical instrument tables; balloon angioplasty inflation instruments; instruments for attaching catheters to the skin; instruments for applying dental fillings; instruments for the insertion of urethral catheters; instruments for the insertion of artificial teeth; instruments for the insertion of dental prostheses; instruments for use in gastrointestinal surgery; instruments for use in prosthetic dentistry; interdental immobilization instruments; arthroscopy irrigation instruments; instruments for anchoring catheters in the skin; instruments for making artificial teeth; instruments for treating snake bites; autologous blood processing instruments for medical purposes; instruments for extracting human body fluids for medical purposes; instruments for heart stimulation; insufflation needles; intercardiac catheters; interpupillary meter; douche bags; intra-aortal balloons; intracorneal implants; intramedullary plugs; intraocular implants; intraocular lenses for surgical implantation; intraocular lens; intraocular lens biometric devices; intravascular blood gas monitors; intravenous bags for surgical purposes; intravenous bags for medical purposes; intravenous infusion pumps for medical purposes; intravenous catheter sets; intravenous administration instruments for medical purposes; incision foils for surgical purposes; irrigation bags for medical purposes; irrigators for medical purposes; insulation bags for medical purposes; calibration catheters; cannulae; capillary drainage tubes; capillary test tubes for medical purposes; capillary tubes for blood for medical purposes; capillary tubes for the distribution of reagents for medical purposes; capillary tubes for samples for medical purposes; cardiographic instruments; cardiovascular angioscopes; cardiovascular guide wires; cardiovascular catheters; cardiovascular needles; cardiovascular pumps; cardiovascular monitors; castrating apparatus for veterinary purposes; castrating pincers; catgut for medical purposes; catgut in the form of suture material; catheters; catheters for surgical purposes; catheters for urological use; catheters for use in embolectomy; catheters for medical purposes; catheters for urological purposes; catheter devices for gastroenterological purposes; catheters incorporating filters; catheter sets; surgical catgut; cauters for medical purposes; laryngeal masks for medical purposes; ophthalmometers;

keratoscopes; nuclear resonance spectrometers for medical purposes; nuclear magnetic resonance systems for medical examinations; orthodontic appliances; orthodontic brackets in the form of braces for use in straightening teeth; children pacifier; cushions for medical purposes; pillows for medical purposes for supporting small children during bathing; pillows for medical purposes for supporting small children to be examined; pillow for medical purposes to support the face; pillows for orthopedic purposes; pillows for therapeutic purposes; soporific pillows filled with down; pillows for preventing snoring; pads in the form of pouches for preventing pressure sores on patient bodies; gowns for surgical purposes; braces for surgical purposes; braces for joint fixation; adhesive tape cutter for medical purposes; adhesive flanges for ostomy bags; adhesive suture; adhesive suture for medical purposes; infant pacifiers; clamps for use with ostomy bags; enema devices; enema syringes; supportive knee bandages; knee supports for medical purposes; knee prostheses; knee braces for medical purposes; knee guards in the nature of supports except as sports articles; bite splints; ankle braces for medical purposes; ankle supports for medical purposes; bone detectors for measuring the mineral content of bones for medical purposes; bone prostheses; bone substitutes for surgical purposes; bone substitute materials; bone implants; bone implants made of artificial materials; bone chisel for medical purposes; bone plates for medical purposes; bone prostheses; bone retractors; bone scraper for medical purposes; bone screws for medical purposes; bone forceps for medical purposes; cartilage replacement material; coagulation devices; dental dams; cases for doctors and surgeons filled with medical instruments to be in Class 10; carbon dioxide indicators for medical purposes; carbon dioxide detectors for medical purposes; carbon arc lamps for therapeutic purposes; colorimetric comparators for medical purposes; colostomy bag; colostomy bags for postoperative use; colposcopes; compresses for supporting the body for medical purposes; compression bandages; elastic or supporting compression bandages; compression garments for medical purposes; compression screws in the form of orthopedic surgical implants; compression screws in the form of orthopedic surgical instruments; compression socks for medical or therapeutic purposes; compression panty hoses for medical purposes; compression hosiery for medical purposes; compression devices for limbs; surgery compressors; compressors for medical treatment; compressor modules as parts of fans for medical purposes; condoms; condoms for health purposes; condoms for medical purposes; condoms for prophylactic use; spermicidal condoms; condoms with spermicidal properties; contraceptive apparatus; apparatus for use in the control of incontinence heads for hip prostheses; soporific pillows for insomnia; dressing forceps for surgical purposes; body fat monitors; body massagers; body support bandages; therapeutic body toning devices; physiotherapy apparatus for medical purposes; body warming devices for medical purposes; corsets for curative purposes; cosmetic silicone implants; costotomes; stockings for varicose veins for medical purposes; beds specially made for use by burn patients; invalid lifts; tweezers for use by nurses; ambulance stretchers; hospital gurneys; draw-sheets for sick beds; crutches; crutch frames; crutch cushion covers; cryoprobes for medical purposes; cold packs for medical purposes; artificial joints; artificial eyes; artificial tapes for medical purposes; artificial breast implants; artificial surgical implants; artificial facial parts; artificial limbs; artificial skin; artificial skin for surgical

purposes; artificial hearts; artificial heart valves; artificial heart-lung machines; artificial heart-lung oxygen apparatus; artificial hip joints; artificial implants for medical purposes; artificial internal organs; artificial jaws; artificial bones; artificial bones of ceramics; artificial bone parts for implantation into natural bones; artificial bones for implantation; artificial cartilage; artificial cartilage of synthetic material; artificial body parts; artificial lenses for surgical implantation; artificial lenses for implantation into the eye; artificial materials for filling cavities in bones; artificial skin replacing membranes; artificial kidneys; artificial organs and implants; artificial orthopedic implants; artificial penises in the form of adult sexual stimulation aids; artificial vessel replacement; artificial skull parts; artificial sponges for medical purposes; artificial bone material; artificial tympanic membranes; artificial vaginas as sexual aids for adults; artificial teeth; artificial tooth parts; curettes; laboratory equipment for the incubation of liquids for medical purposes; laboratory equipment for mixing liquids for medical purposes; laboratory equipment for administering liquids for medical purposes; laboratory equipment for the transfer of liquids for medical purposes; laboratory equipment for the dilution of liquids for medical purposes; support mattresses for medical purposes; sheets for medical purposes; lamps for medical curative purposes; lamps for medical purposes; lamps for the production of polarized light for medical purposes; lamps for use with medical devices; lamps for use with dental instruments; length gauges for medical purposes; lancets; lancing devices for surgical purposes; noise protection means in the form of deformable ear plugs; laryngoscopes; laser equipment for medical purposes; laser processing instruments for medical purposes; lasers for medical purposes; lasers for ophthalmic purposes; lasers for veterinary purposes; lasers for dental purposes; laser apparatus suitable for generating pulsed laser beams for medical purposes; laser apparatus for medical purposes; laser apparatus for dental purposes; laser pointers for medical purposes; optical fiber lasers for medical purposes; laser cutting tools for medical purposes; laser scalpels for medical purposes; laser beam instruments for medical purposes; lasers for use in surgery; latex gloves for surgical purposes; latex gloves for medical purposes; latex gloves for veterinary purposes; latex gloves for dental purposes; latex examination gloves for medical purposes; treadmills for use in physiotherapeutic exercises; wheels for pets as mobility aids; lice combs; empty droppers for administering drugs; abdominal belts; abdominal corsets; leads for use with implantable cardiac stimulators; cardioversion leads; defibrillation leads; leads for pacemakers; lumbar belts; light filters for medical purposes; light sources for electronic endoscopes for medical purposes; light sources for medical purposes; light therapy devices for medical purposes; love balls as sexual aids for adults; ligating clips for medical purposes; linear accelerators for medical purposes in radiotherapy; lip retractors; lithotripters; spoon for administering medicine; air pillows for medical purposes; air pillows for babies for medical purposes; air pillows for children for medical purposes; air cushions for medical purposes; air mattresses for babies for medical purposes; air mattresses for children for medical purposes; air mattresses for medical purposes; lung function test equipment for medical purposes; lymphedema sleeves; lymphedema tights; magnets for therapeutic purposes; magnetic field generators for medical purposes; magnetic treatment apparatus for medical purposes; magnetic resonance apparatus; magnetic resonance imaging apparatus for medical

purposes; magnetic resonance tomography apparatus; magnetic resonance tomography scanner; manometers for medical purposes; manometer lines for medical purposes; Intramedullary pins; masks for cardiopulmonary resuscitation; masks for medical personnel; massage beds for medical purposes; massage apparatus; massage apparatus, electric or non-electric; massage apparatus for medical purposes; massage apparatus for personal use; esthetic massage apparatus; massage gloves; massage chairs; massage chairs with built-in massage apparatus; materials for bandaging; childbirth mattresses; mattresses for medical purposes; mattresses for hospital patient trolleys; anti-pressure sore mattresses; incontinence mattress protection covers; templates for orthopedic purposes; maxillo-mandibular splints for use in maxillofacial surgery; mechanical flaps for implantation into human hearts; trays for holding medical instruments; trays for holding surgical instruments; trays for holding veterinary instruments; medical apparatus for the treatment of hyperhidrosis; medical apparatus for the detection of carbon dioxide in the respiratory tract; medical apparatus for urethral catheterization; medical apparatus for laparoscopy; medical apparatus for renal dialysis; medical apparatus for the drainage of incisions; medical apparatus for wound drainage; medical apparatus for genetic testing; medical apparatus for neurographic purposes; medical apparatus for urological use; medical apparatus for measuring the oxygen content of the blood; medical apparatus for checking blood glucose content; medical apparatus for training breathing techniques; medical apparatus for displaying tomographic data; medical apparatus for diagnosis of suspected heart attacks; medical apparatus for introducing pharmaceutical preparations into the human body; medical apparatus for facilitating the inhalation of pharmaceutical preparations; medical apparatus for checking the gas exchange parameters of the lungs; medical apparatus for the relief of pain; medical apparatus for strengthening pelvic floor muscles; medical apparatus for supporting breathing; medical apparatus for use in cardiac surgery; medical dressings for applying fluids to the skin excluding dressing material; medical humidification apparatus; vessels for histological purposes for medical purposes; medical treatment furniture; medical procedure chairs; medical clothing; medical radiators; medical bags for the storage of urine samples; medical bags for holding medical instruments; medical bags for collecting urine samples; medical imaging apparatus; chromatographic apparatus for medical use; medical blankets for cooling patients; medical blankets for warming patients; medical diagnostic apparatus; diagnostic apparatus for medical purposes; medical drainage bags for use in nephrostomy; medical drainage bags for collecting abscesses; medical drainage bags for collecting bile; medical pressure chambers; ice bags for medical purposes; medical ice bag holders; medical electrodes; medical guide wires; medical guide wires, and parts and fittings therefor; medical gas insufflators; medical vessel dilators; medical equipment; rubber medical equipment for preventive treatment; medical devices made of natural rubber for preventive treatment; medical devices of synthetic rubber for preventive treatment; medical equipment for dental hygienists; medical equipment for dosimetry in the field of radiotherapy; medical equipment for interstitial thermotherapy of biological tissue; medical equipment for moxibustion therapy; physical exercise apparatus for medical purposes; medical equipment incorporating lasers; medical equipment for cutting tissue; medical equipment for the treatment of embolism; medical

apparatus for improving the skin by laser; medical devices for use as hearing aids; medical devices for use in endoscopy; medical gloves; medical skin abraders; medical heating units with body contact applicators; medical heating units with body contact applicators for controlling the temperature of body wounds; medical heaters for controlling the temperature of body wounds; medical aids, namely, intravascular implants consisting of artificial materials; medical aids for stoma care; medical hearing aids; medical horn-like instruments for treating the kidneys; medical implants; medical implants made of artificial materials; medical infusion pumps; medical inhalers; medical injection syringes; medical instruments for dilatation tracheometry; medical instruments for animal bodies; medical instruments for use in relation to hearing performance; medical instruments for removing warts by icing; medical instruments for closing wounds; medical instruments for infectious disease testing; medical instruments for use on the human body; medical instruments for use on animal bodies; medical instruments for use in the human body; medical instruments for recording cardiac activity; medical instruments for recording physiological data; medical instruments for the control of drug abuse; medical instruments for monitoring therapeutic drugs; medical instruments for use on the human body; medical instruments for use in animal carcasses; medical instruments for use in the human body; medical instruments for use in animal bodies; medical instruments for reproducing physiological data; medical catheters; catheters for medical use; medical gowns; medical brackets; medical compression tights; medical compression stockings; physical exercise articles for physical training for medical purposes; medical cooling units with body contact applicators; medical cooling units with body contact applicators for controlling the temperature of body wounds; medical cooling devices for controlling the temperature of body wounds; medical sheets of textile nonwoven material; medical lancets; medical laser; medical latex gloves; medical fans; medical masks; medical knives; medical furniture and bedding; equipment for moving patients; medical operating lamps; medical sample cups; medical prostheses; medical pulse pressure transducer; medical pumps; medical x-ray apparatus; medical scissors; medical tubing; medical tubing for irrigation purposes; medical tubing for use in vascular procedures; medical tubing for the administration of medicaments; medical cutting equipment; medical screw connections; medical probes; spatulas for medical use; medical saliva pads for diagnostic purposes; medical syringes; medical syringe needles; medical spittoons; medical stents; medical stethoscopes; medical stockings with decreasing compression; medical hosiery; medical supports for the body; medical support tights; medical support stockings; medical suspensories for athletes; medical test equipment; medical tests for domestic diabetic control; medical therapy apparatus; medical tables for examination or treatment purposes; medical ultrasonic diagnostic apparatus; medical ultrasonic diagnostic equipment; medical ultrasonic diagnostic instruments; medical ultrasonic equipment; medical and surgical cutters for cutting human and animal tissues and organs; medical and surgical catheters; medical and surgical knives for cutting human and animal tissues and organs; abdominal pads for medical use; medical examination gloves; medical examination sheets; medical examination lamps; medical urinals in the form of vessels; hydrostatic water beds for medical purposes; medical chairs protecting the spine; spoons for administering medicine; membranes for filtration for

medical purposes; membrane test plates for use in medical diagnostics; membrane test panels for use in medical research; menstrual cups; knives for surgical purposes; knives for medical purposes; surgical knife blades; cutlery for surgical purposes; measuring instruments for body fluids for medical purposes; measuring instruments for medical purposes; measuring instruments for measuring blood glucose; measuring devices for checking the blood pressure; measuring spoon for administering medicinal products; corsetry for surgical purposes; breast pumps; mineral detectors for measuring the mineral content of bones on the living object for medical purposes; furniture for endoscopic examinations; monitors for electrocardiographs for use as medical devices; moxibustion apparatus; mri diagnostic apparatus; oral irrigators for medical purposes; mouth showers for use in dentistry for dental purposes; mouth guards for medical purposes; protective mouth masks for medical purposes; protective mouth masks for veterinary purposes; mouth masks for dental purposes; umbilical belts; commode chairs; detectors for medical applications; needle holders for surgical purposes; surgical needles; needles for surgical purposes; pins of precious metals for dental purposes; pins of precious metal for dental purposes; needles for surgical purposes; needles for injections; needles for medical purposes; needles for dental purposes; needles for medical use; nail clippers for medical purposes; suture material; suture materials for surgical transplants; suture materials for medical-surgical purposes; suture materials for medical purposes; suture materials for surgical purposes; anaesthetic apparatus; anaesthesia screens; anaesthetic masks; anaesthesia monitoring apparatus; nasal dilators; nasal douches for medical purposes; inserts for the nose for medical purposes; protective nose masks for medical purposes; protective nose masks for veterinary purposes; protective nose masks for dental purposes; nephelometric analyzers for medical diagnosis; nerve muscle stimulators; mesh nerve connecting tubes for medical purposes; mesh nerve connecting tubes for veterinary purposes; neurosurgical adapters; non-chemical contraceptives; non-elastic bandages for supporting purposes; non-electric acupuncture instruments; non-electric massage apparatus; non-selective electrodes as chemically sensitive probes for medical purposes; lithotripter; emergency pelvic clamps; nuclear medicine tomographic scanners; femoral nails; ear inserts for medical purposes; hearing protection devices; hearing protection devices for the prevention of accidents; earmoulds being parts of hearing aids; ear adaptors for hearing aids; ear plugs as ear protection devices; ear cleaning equipment for medical purposes; ear plugs for protection against noise; ear plugs for sleeping; oncological irradiation apparatus for medical purposes; oncological irradiation instruments for medical purposes; surgical clothing; surgical instruments for use in spinal surgery; surgical gloves; gowns for surgical use; surgical knives; operating tables; surgical drapes; ophthalmic equipment; ophthalmic microsurgical knives; ophthalmometer; ophthalmoscopes; optical instruments for medical endoscopy; optical scanners for medical purposes; optical temperature measuring instruments for medical inspection purposes; optical tomography apparatus for medical diagnostic purposes; optomedical examination instruments; optometrical instruments; organic trace concentrators for medical diagnostic purposes; orthoses; orthotic insoles for footwear; orthotic insoles; orthodontic appliances; orthodontic instruments; orthopedic appliances; orthopedic apparatus for club feet; orthopedic articles; orthopedic strappings; orthopedic bandages; orthopedic

insoles for shoes; orthopedic insoles for footwear; orthopedic insoles; orthopedic insoles with foot arch support; orthopedic fixation devices; orthopedic foot pads; orthopedic joint bandages; orthopedic joint implants; orthopedic joint implant prostheses; orthopedic hip prostheses; orthopedic implants; orthopedic implants made of silicone; orthopedic clamps; orthopedic knee bandages; orthopedic compression supports; orthopedic sheets for use in orthopedic surgery; orthopedic femoral prostheses; orthopedic pads; orthopedic prostheses; orthopedic splints; orthopedic shoes; orthopedic footwear; orthopedic soles; orthopedic hosiery; orthopedic support bandages; orthopedic supports; orthopedic supports for heels; orthopedic supports for feet; orthopedic tools; ostomy instruments; otological implants; otological prostheses; otological prosthetic devices; otoscopes; oxygenators for medical purposes; ozonators for medical purposes; ozone generators for ozone therapy; ozonizers for medical purposes; ozone monitoring devices for ozone therapy for medical purposes; patient treatment tables; patients stretchers; patient monitoring equipment; patient monitoring sensors and alarm devices; patient examination shirts; patient examination tables; peep activators as part of a respirator for maintaining pressure; pelvimeter; penis sheaths; penis enlargement devices as sexual aids for adults; perfusion tubes for medical purposes; periodontal irrigators for use in dental treatment; periurethral prostheses; percutaneous insertion kits; percutaneous renal access sets; pessaries; pharmaceutical instruments; physical analyzers for medical purposes; physiological apparatus for medical purposes; physiological measuring apparatus for medical purposes; physiological monitoring devices for medical purposes; physiotherapy and rehabilitation equipment; balling guns for medical purposes; tweezers for surgical purposes; tweezers for medical use; medical pipettes; pipettes for the eyes for medical purposes; pipettes for medical purposes; pipette instruments for surgical purposes; pipette instruments for medical purposes; platinum cauteries for surgical purposes; plates for bone anastomosis; plates in the form of orthopedic surgical implants; plates in the form of orthopedic surgical instruments; pneumatically operated medical instruments; orthopedic pads for slippers; orthopedic pads for shoes; paddings for orthopedic casts; polymerization apparatus for dental purposes; polypectomy snares; polyurethane foam pads for support purposes; position indicating apparatus for collimators for dental x-ray apparatus; position indicator for collimators for surgical purposes; position indicator for collimators for medical purposes; collimating position indicators for veterinary use; precision sensors for medical purposes; sampling devices for medical purposes; contoured cushions for patients' use in beds adapted for medical purposes; programmable hearing aids; programming devices for frequency-programmable pacemakers; proctoscopes; prophylaxis stockings; stockings for prophylactic purposes; prophylaxis angles for medical purposes; prostheses for medical purposes; orthopedic prostheses; high-strength porcelain prostheses for attachment to the dentine structure; high-strength porcelain prostheses for attachment to the tooth enamel structure; prostheses for surgical treatments; prostheses for medical treatments; prostheses for dental purposes; prostheses in the form of a full-crown renewal; prostheses in the form of inlays for medical purposes; prostheses in the form of partial crown renewals for medical purposes; prosthesis shafts for medical purposes; prostheses and artificial implants for medical purposes; prostheses for implantation in the jawbone; prosthetic bandages for limbs; prosthetic

ligaments; prosthetic joint parts for the attachment of limb prostheses to the body; prosthetic devices for dental purposes; prosthetic tissue for parietal purposes; prosthetic tissue for vascular purposes; prosthetic tissue for visceral purposes; prosthetic tools made of silicone; prosthetic hip joint implants; prosthetic sheaths for limbs; prosthetic implants; prosthetic implants made of silicone; prosthetic stockings for limbs; prosthetic stump shrinkers for limbs; test probe assemblies for medical purposes; test probes for medical purposes; pulse rate monitors; pulse generators for cardiology; pulse meters for medical purposes; pulse oximeter; pulse counters for medical devices; pumps for surgical purposes; pumps for medical purposes; pumps for medical purposes for drug delivery from containers; pumps for medical purposes for the extraction of liquids; pumps for medical purposes for the administration of medicaments from containers; pumps for veterinary purposes; pumps for the extraction of steam for medical purposes; pumps for the extraction of gases for medical purposes; medical pumps for use in liquid chromatography; pupillometer for measuring pupillary distance ; pupillometer for measuring the pupil reactivity against stimuli; quartz lamps for medical purposes; mercury arc lamps for therapeutic purposes; mercury thermometers for medical purposes; rachiotome for medical purposes; radioisotope apparatus for medical purposes; radiocardiographic apparatus for medical purposes; radiology tables; radiological apparatus for medical purposes; radio-oncological irradiation apparatus for medical purposes; radio-oncological irradiation instruments for medical purposes; radioscopy apparatus for medical purposes; raspatories for medical purposes; smoking apparatus for medical purposes; reflex hammers for diagnostic purposes; refractometer for medical purposes; refractometers for veterinary purposes; zippers adapted for use as temporary wound closures; electro-stimulation apparatus for therapeutic treatments; rectal dilators; rectal instruments; retinoscopes; retractors in the form of medical devices; blood sampling tubes for medical purposes; pipes for surgical applications; pipes for medical applications; pipes for veterinary applications; pipes for dental applications; rollators for use as walking aid; x-ray analyzers for medical purposes; x-ray apparatus for medical purposes; x-ray apparatus for veterinary purposes; x-ray apparatus for dental purposes; x-ray images for medical purposes; x-ray ct scanner; x-ray diagnostic apparatus; x-ray film holders for surgical purposes; x-ray film holders for medical purposes; x-ray film holders for veterinary purposes; x-ray film holders for dental purposes; x-ray film holders for surgical purposes; x-ray film holders for medical purposes; x-ray film holders for veterinary purposes; x-ray film holders for dental purposes; x-ray film holder for use in the mouth; x-ray film frames for surgical purposes; x-ray film frames for medical purposes; x-ray film frames for veterinary purposes; x-ray film frames for dental purposes; x-ray machines for dentistry and medical purposes; x-ray tubes for medical purposes; x-ray scanner for medical purposes; radiology screens; x-ray spectroscopy apparatus for medical purposes; radium tubes for medical purposes; x-ray structure analysis instruments for medical purposes; dental excavator; horsehair gloves for massages; involution belts for medical purposes; back supports for medical purposes; retaining belts for restraining patients on stretchers; rowing machines for physical exercise for medical purposes; saws for surgical purposes; resuscitators; oxygen electrodes for medical purposes; medical apparatus for extracting oxygen from the atmosphere; oxygen inhalers for medical purposes;

oxygen concentration analyzers for medical purposes; oxygen concentrating monitors for medical purposes; oxygen concentrators for medical applications; oxygen masks for medical purposes; oxygen sensors for medical purposes; oxygen monitors for medical purposes; suction apparatus for medical purposes; suction apparatus for dental purposes; suction bags for medical purposes; suction bag holder for medical purposes; suction drainage sets for medical purposes; feeding bottle teats; feeding bottles; feeding bottles for babies; suction bottles for medical purposes; feeding bottle valves; suction cups for medical purposes; baby pacifiers; suction tubes for medical purposes; columns for affinity chromatography [for medical purposes]; columns for liquid affinity chromatography for medical purposes; columns for sample preparation for medical purposes; scales for medical purposes; scanners for medical purposes; sharp curettes; foam rollers for massage purposes; discs for grinding for dental application; scissors in the form of surgical instruments; scissors for surgical purposes; splints; splint bandages for the production of plasterboards; splint bandages for the production of splints; splints for surgical purposes; splints for medical use; splints for the human body; splints for medical purposes; splints for orthopedic purposes; splint material for surgical purposes; splints for application to the human body; screens for medical instruments; supporting tubular bandages; tubes for surgical purposes; tubes for enteral nutrition; tubes for intravenous feeding; tubes for peritoneal dialysis; tubing for use with cannulas; tubes for catheters; tubes for medical purposes; tubes for veterinary purposes; abrasive wheels for dental purposes; mucus extractors for medical purposes; slings in the form of supporting bandages; slings for patient lifting hoists; slings for medical purposes; slings for supporting injured limbs; feeding cups for medical purposes; dummies in the form of teats for babies; dummy chains; pacifier for babies; pacifiers for toddlers; pacifier for newborns; pacifiers for infants; corsets for therapeutic purposes; cabinets for medical instruments; screw fasteners for bones; screws for bones; screws for bone fixation; pacemaker; cupping glasses; cupping glasses for moxibustion therapy; push syringes for medical purposes; shoe insoles for orthopedic use; supports feet for medical purposes; shoulder for medical purposes; shoulder rests for medical purposes; aprons for surgeons; protective bandages after laryngeal operations; protective clothing for surgical purposes; protective **clothing for medical** purposes; protective gloves for use by surgeons during operations; protective gloves for medical personnel; protective gloves for medical examinations; protective gloves for medical purposes; protective gloves for veterinary purposes; protective gloves for dental personnel; protective bonnets for the hair of veterinarians; protective bonnets for the hair of dentists; protective covers for baby feeding bottles; protective covers for parts of intraortic balloons; protective structures against radiation for medical purposes; protective masks for surgeons for use in surgery; protective masks for medical staff; protective masks for persons working in the dentistry; corneal shields; protective shields for protection during exposure to x-rays for medical purposes; protective visors for surgical purposes; protective visors for medical purposes; protective visors for veterinary use; protective visors for dental use; protective guards for catheters; x-ray protective devices for medical purposes; sponge material for surgical purposes; pregnancy support belts; vibration generating devices for massage; tendon replacement; eye testing apparatus; orthopedic arch supports; arch supports for orthopedic shoes; arch supports for

orthopedic boots; arch supports for flat feet; sensor apparatus for medical diagnostic purposes; sensor apparatus for medical use in monitoring the vital functions of patients; armchairs especially made for surgical purposes; armchairs for medical or dental purposes; armchair for medical purposes; armchair for dental purposes; sex aids; sex dolls; sex toys; dissecting tables; shunts for use in blood circulation; safety belts for securing patients on ambulance stretchers; safety restraint devices for patients; sigmoidoscopes; silicone gel sheeting for the treatment of scars; silicone cords in combination with a needle for use in retracting arteries during operations; silicone cords in combination with a needle for use in retracting veins during operations; pads for seats for wheelchairs for medical purposes; scalpels; scalpels emitting electromagnetic radiation; scalpel handles; scalpel blades; skiascopes; orthopedic soles of leather; orthopedic soles for shoes; orthopedic soles for footwear; solariums for medical purposes; probes for medical purposes; probes for use with integrated circuits for medical diagnoses; spatula for medical purposes; spittoons for medical purposes; saliva vials for medical diagnosis; spectrophotometers for dental purposes; spectrophotometers for dental purposes for the determination of the shades of dental prostheses; spectrophotometer for the detection of color blindness; spectrum analyzers for medical diagnoses; specula; specula for otoscopes; dispenser for dressing material for medical purposes; special containers for medical waste; special containers for the disposal of syringes; special beds for medical care; special beds for burn patients; fitted bags for use by doctors; fitted bags for use by surgeons; cases fitted for surgical instruments; cases fitted for surgical tools; cases fitted for medical instruments; cases fitted for medical tools; special furniture for surgical purposes; special furniture for medical treatments; special furniture for medical purposes; special furniture for dental purposes; chairs especially made for medical use; specially adapted containers for the disposal of medical instruments, syringes and other contaminated medical waste; special waste containers for medical waste; sphincterotomes; medical mirror; mirror for surgeons; mirrors for medical examinations; spinal implants made of artificial materials; medical spirometers; spirometer for the examination of the pulmonary function; spongiosa screws in the form of orthopedic surgical implants; spongiosa screws in the form of orthopedic surgical instruments; sports equipment for medical rehabilitation purposes; sports equipment for medical rehabilitation purposes; speech aids for therapy purposes; aerosol dispensers in the form of spray bottles for medical purposes; syringes for medical purposes; syringes for medical purposes and for injections; syringes for dental purposes; syringes in the form of pens; sprayers for medical purposes; spittoons for medical purposes; irrigation devices for arthroscopy; irrigation instruments for arthroscopy; trace material analyzers for medical diagnostic purposes; loop ostomy rods; stands for medical instruments; rigid endoscopes; rigid endoscopes for medical purposes; nurses' trolleys adapted to contain drugs for dispensing to patients; static electrotherapy apparatus; bed pans; lithotomy forceps; stent; stepper for use in physiotherapy; sterile surgical garments; sterile tissues for surgery; sterilized sheets for use on patients during surgery; stethoscopes; control devices for cardiac arrhythmia; boots for medical purposes; breast shields; voice simulating prostheses; ostomy bag; stoma protectors; ostomy seals; shockwave apparatus for medical purposes; radiation protection textiles for use in therapeutic treatments; radiation protection textiles

for use in therapeutic treatments of animals; radiation therapy equipment; radiation therapy instruments for medical purposes; stretching apparatus for medical purposes; litter for veterinary purposes; electrotherapy instruments for slimming treatments; instruments for firming treatments; stockings for therapeutic purposes; hosiery for the treatment of varicose veins; chairs for dental treatment; chairs for dental purposes; blunt curettes for surgical purposes; support bandages for medical purposes; support garments for medical use; tennis elbow supports; supporting adhesive tape for medical purposes; supporting bandage material; support mattresses for the prevention of pressure sores; support stockings for surgical purposes; supporting sock for avoiding deep vein thrombosis; support tights for surgical purposes; support racks for use in sports for medical purposes; subcutaneous analysis instruments for medical purposes; disposable subcutaneous syringes for surgical purposes; subcutaneous injection syringes for medical purposes; subcutaneous injection syringes for medical purposes; subcutaneous valves made of artificial materials for implantation; subcutaneous needles for infusion therapy; subcutaneous needles for renal dialysis; subcutaneous needles for wound drainage; subcutaneous needles for injections; subcutaneous syringes for administering injection substances; subcutaneous valves as implants; hypodermic needles; hypodermic syringes; suspensory bandages; synthetic bandages for support purposes; synthetic padded bandages for support purposes; tablets for medical purposes; cups for the administration of drugs; particle analyzers for medical purposes; parts of dental prostheses; telemetry apparatus for medical applications; telemetry apparatus for medical purposes; temperature-sensitive test equipment for medical purposes; temperature-sensitive test instruments for medical purposes; temperature-sensitive test apparatus for medical purposes; temperature-sensitive test instruments for medical purposes; temperature labels for medical purposes; temperature control apparatus for medical purposes; temperature measuring devices for medical purposes; temperature scanners for medical purposes; temperature sensors for medical purposes; temperature monitoring devices for medical purposes; temporary wound closure in the form of zippers; tenaculums; test electrodes for medical purposes; test equipment for medical purposes; test clips for medical purposes; test probes for medical purposes; therapeutic apparatus with massage equipment; therapeutic garments for humans; therapeutic garments for animals; therapeutic devices with electromagnetic waves; therapeutic hot air appliances; therapeutic instruments for ophthalmology; therapeutic hosiery; therapeutic support bandages; thermal electrocompresses for medical purposes; thermo-electric compresses for medical purposes; thermographic instruments for medical purposes; thermal packs for first aid purposes; thermometers for medical purposes; thoroscopes; thoracic vents; compression stockings; deep heat massage equipment; veterinary instruments and apparatus; tables for the treatment of patients; tables for surgery; tables for medical examinations; tables for medical procedures; tomographs for medical purposes; tomographic instruments for medical purposes; tonometer; tracheal tubes; tracheotomy tubes; wheeled stretchers; portable instruments for medical purposes for monitoring the oxygen content in gas mixtures; portable nebulizers for medical purposes; suspensory bandages for joints; stretchers for patient transport; stretchers for patients; training devices for stimulation for medical purposes; training machines for medical rehabilitation purposes; training shoes in the form of orthopedic footwear;

training boots for medical rehabilitation purposes; transfusion bottles for medical purposes; transcutaneous electrical muscle stimulators for medical purposes; transcutaneous electrical nerve stimulators for medical purposes; transcutaneous electrical nerve stimulation electrodes for medical purposes; transcutaneous electrical nerve stimulation instruments for medical purposes; transplants for surgical purposes; transplantation prostheses for surgery; portable urination aids for women for medical purposes; dental tray covers; separation instruments for medical use; separation cartridges for chromatography for medical purposes in the form of laboratory medicine; medical separation columns for gas chromatography; cutting discs for dental application; separating discs for dental purposes; stair climbing machines for medical and therapeutic purposes; trocars; trocar canulas; dropper for medical purposes; dropper bottles for medical purposes; dropper bottles for administering medication; dropping pipettes for medical purposes; operating theatre sheets; cloths for delimiting the operating area; gymnastic apparatus for medical rehabilitation purposes; gymnastic apparatus for therapeutic purposes; overpressure oxygen chambers for medical purposes; tourniquet monitors; monitoring devices for measuring the amount of carbon dioxide in patients; crutch handle covers; exercise apparatus for medical rehabilitation purposes; exercisers in the form of expanders for medical therapy; exercise equipment for the respiratory system for medical purposes; exercise equipment for medical rehabilitation; exercise apparatus for medical rehabilitation purposes; ultrasonic aspirators for washing soft tissue parts; ultrasonic aspirators for separating soft tissue parts; ultrasonic blood flow meter; ultrasonic diagnostic apparatus for surgical purposes; ultrasonic diagnostic devices for medical purposes; ultrasonic diagnostic devices for veterinary purposes; ultrasonic diagnostic apparatus for dental purposes; ultrasonic diagnostic instruments for medical purposes; ultrasonic diagnostic instruments for therapeutic use; ultrasonic devices for medical examination of the body; ultrasonic devices for medical diagnostic purposes; ultrasonic devices for diagnosis for medical purposes; ultrasonic eye axis length meters; ultrasonic cleaning instruments for surgical purposes; ultrasonic cleaning instruments for medical purposes; ultrasonic cleaning instruments for veterinary purposes; ultrasonic sensors for medical purposes; ultrasonic probes for medical purposes; ultrasound therapy apparatus; ultraviolet filters for medical purposes; ultraviolet lamps for medical purposes; ultraviolet emitters for therapeutic purposes; reverse osmosis membranes for medical purposes; maternity belts; unfilled oxygen inhalers for medical purposes; rubber sheets for incontinents; incontinence sheets; incontinence sheets for women; abdominal belt; abdominal pads; abdominal pads for surgical purposes; abdominal pads for medical purposes; supportive splinting for medical purposes; examination finger cots; medical examination gloves; medical examination couches; examination couches for dental purposes; diagnostic probes for medical diagnostic purposes; examination chairs for hospitals; examination chairs for medical purposes; examination chairs for dental purposes; examination tables for hospitals; surgical examination drapes; divided air mattresses for therapeutic purposes with low air loss; ureteral stents as surgical aids; urinals for medical purposes; urine bags for medical purposes; urinary drainage bag for medical purposes; urine bottles for medical purposes; urinary flow meters for medical purposes; urine test glasses for medical purposes; urine testing apparatus for medical diagnostic purposes; urological

apparatus and instruments; urological imaging systems; urological instruments; urological catheters; uterine dilators; uv lamps for medical purposes; vaginal dilators; vaginal syringes; vaginotonographs; vacuum probes for medical purposes; venous catheter for human use; valves for the treatment of hydrocephalus; valves for medical infusion instruments; dressings for medical or surgical purposes; bandage clips for elastic bandages; evaporator for liquid anesthetics; nebulizing devices for respiratory therapy; nebulizer for medical purposes; non-spill medicine spoons for infants; veterinary apparatus and instruments; veterinary obstetric aids for use in the delivery of live animals; vibrators as sexual aids for adults; vibrators for beds for medical purposes; vibrators for heating dental impression materials; vibro massage apparatus; four-legged walking sticks for medical purposes; non-woven respiratory masks for medical applications; rubber devices for preventing the transmission of diseases; natural rubber cones for contraception; synthetic rubber devices for contraception; devices for positioning patients; backbone fixation devices for the correction of back defects; spine fixation devices for the correction of spine deformities; heat packs to relieve pressure on the ear; heat packs for the relief of muscle pain; heat packs for the relief of earaches; heat treatment apparatus; heat beds for medical treatments; electric thermal compresses for surgical purposes; heat lamps for medical purposes; warming massage pads; warmer for medical purposes; heat exchange bacteria filters for medical purposes; heat exchange virus filters for medical purposes; heat therapy apparatus for medical purposes; thermotherapy systems for medical purposes; heat therapy instruments for medical purposes; heat wrap massage apparatus; water treatment apparatus for medical purposes; bases for waterbeds, adapted for medical purposes; water beds for medical purposes; water bags for medical purposes; water pillows for medical purposes; hydrocephalus valves; water treatment apparatus for medical purposes; alternating pressure mattresses for medical use; alternating pressure pads for medical purposes; alternating pressure supports for medical purposes; orthopedic soft insoles ; tools for medical diagnostics; resuscitation equipment; resuscitation instruments for high-risk births; spine plates in the form of medical apparatus; brushes for cleaning body cavities; wound suction apparatus; retractors; surgical clips; dental impression tray; dental broaches; dental apparatus and instruments; dental apparatus for paralleling; dental articulators; dental x-ray film hangers; dental x-ray apparatus; dental x-ray mouth props; dental mirrors; dental examination chairs; dentists' armchairs; dental chairs; dental bridges; dental prostheses; gum massaging instruments; dental extraction forceps; dental implants; dental caps; dental clips for securing pre-existing dentures; dental crowns; dental apparatus and equipment; dental apparatus for milling; dental curing lamps; dental intraoral cameras; dental modeling instruments; dental x-ray film duplicators; dental syringes; dental tools; dental onlays; tooth polishers for use by dentists; dentures; dental prostheses in the form of inlays; orthodontic appliances; teeth-regulating bracing devices; teeth aligners; protective caps for teeth; dental probes, not for personal use; dental braces; tartar removal equipment; pins for artificial teeth; tooth support pins; dental technicians equipment; teething soothers; dental root posts; interdental brushes for use in dental treatment; interstitial stimulators for use in dental treatment; forceps for medical use; forceps for surgical purposes; forceps for repositioning; forceps for medical purposes; forceps for veterinary purposes;

forceps for dental purposes; orthopedic toe inserts for footwear; orthopedic toe regulator; orthopedic toe separators; orthopedic toe props; orthopedic toe relief pads; time programmable intravenous perfusion pumps; cell culture equipment for medical purposes; cell counters for medical purposes; central venous catheters; centro-medullary nails; centro-medullary nails for thighs; centro-medullary nails for shins; hand-operated sprayers for medical purposes; atomizers for medical purposes; cervical dilators; cervical balloon catheters; cervical pillow for medical purposes; cervical portio adapters; tongue depressors for medical purposes; tongue cleaning equipment; tongue depressors; tongue blade holders; straitjackets; cytofluorometric equipment; cytology brushes.

We are Gottfried Medical, Inc.

Since our inception over 40 years ago, our business has been

the design and manufacturing of medical devices. We specialize in made-to-measure compression garments for the entire patient. The majority of these products aid in controlling numerous venous insufficiency and lymphedema, as well as garments specially designed to suppress and control hypertrophic scarring, resulting (most often) from serious burn injury.

In addition to the products we design and produce, Gottfried Medical provides training on how to measure, fill-out order forms and transfer the measurements in preparation of an order.

Gottfried Medical works closely with physicians, surgeons, physical and occupational therapists, hospitals and clinics, prosthetic and orthotic suppliers and home health equipment dealers. These relationships have led to the joint development of other specialized products.

Custom Compression Garments & Managing Lymphedema

Discover the benefits of custom compression garments for lymphedema, aiding in the circulation of lymph and reducing swollen veins.

Venous Insufficiency

Lymphedema

Burns, Surgical Complications

Scar Management & Ensil Fabric

Gradient Pressure

Custom compression garments designed for lymphedema assist weak or damaged lymphatic vessels with the circulation of lymph. Also, they help reduce and control swollen and bulging lymphatics and lymph nodes associated with this condition. These garments are designed to exert gradient pressure, mimicking the action of the lymphatic vessels as they move lymph toward the heart. Gradient pressure is highest at the distal end reducing in gradient to the proximal end

Benefits to the Patient

Gottfried brand custom compression garments for lymphedema are manufactured for an anatomically exact fit. Because they are custom made they can increase compliance as a result of options and extras that ease donning, doffing and reducing the discomfort associated with normal wear. Numerous options are available and special requirements are easily accommodated.

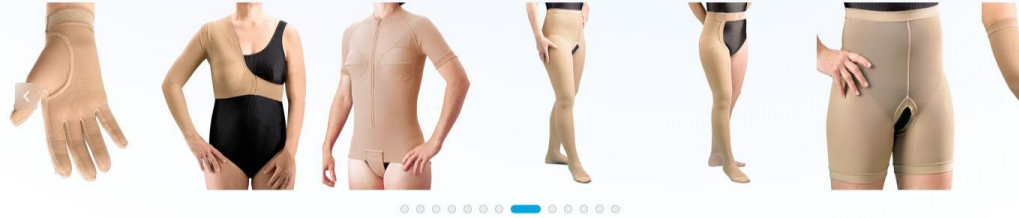

Why a Prescription is Required

Custom compression garments for lymphedema from Gottfried Medical are designed to provide significantly higher compression than is found in common OTC retail products. As a result, they are not available without a prescription.

Custom Compression Garments for Lymphedema

Gottfried Medical custom compression therapy garment types intended for the treatment of lymphedema are shown below. Every patient is unique and every custom compression therapy garment we make is just as special. Fulfilling your patient's individual requirements is exactly what we do at Gottfried Medical, Inc.

Medical Grade Silicone Sheet

from Gottfried Medical, Inc.

Transform your scarring with Ensil® fabric, a revolutionary medical grade silicone sheet integrated with a 2-way stretch textile, offering proven results in preventing and improving hypertrophic and keloid scarring.

[Venous Insufficiency](#)

[Burns, Surgical Complications](#)

[Scar Management & Ensil Fabric](#)

ENSIL Fabric Policy Change

Effective October 16, 2023, replacement garment orders will no longer receive credit for the cost of the Ensil lining. The Ensil lining in the replacement garments will be charged at the full current price.

How to Avoid Being Charged for Ensil Fabric a Second Time

Do not initially order your first garment with Ensil Fabric. After fit is confirmed or adjustments so indicated, mark the location for the Ensil, then return the garment for the Ensil to be added to the replacement garment.

Have a question? [Contact Gottfried Medical](#) before proceeding. Never hesitate to contact us with questions of any kind. We will do our best to guide you through the process and advise you in ways to avoid unnecessary charges.

Ensil remains a wonderful benefit and tool in managing scarring. The sharp cost increase we have experienced in the manufacturing of Ensil has led us to a policy change. We value your business and will continue to do our best to serve you in a manner to earn and keep your trust.

Manage hypertrophic and keloid scarring with Ensil® silicone fabric

Ensil® silicone fabric is a soft, yet durable, medical grade silicone sheet bonded to a 2-way stretch textile. Silicone (in this form) has been shown to prevent and/or improve hypertrophic and keloid scarring resulting from burns, trauma or surgical procedures.

Ensil fabric requires no special or additional care and does not affect the prescribed compression. It is non-invasive and economical, compared to other similar silicone products.

Ensil fabric may be used on any area of the body and without additional tape or other bandaging when used over joints and contractures.

Benefits to the Patient

- ✓ Softening and flattening of scar
- ✓ Reduced discomfort
- ✓ Reduced redness
- ✓ Increased moisture retention
- ✓ Relief of itching in managed area

Luna Medical, Inc. is a durable medical equipment company established in 1996 to meet the needs of patients suffering from chronic, extremity circulation disorders. We are solely dedicated to providing compression therapy products for patients diagnosed with Lymphedema and Chronic Venous Insufficiency. Our main billing office and corporate headquarters are located in Chicago, Illinois. Luna Medical is an authorized provider of lymphedema medical products nationwide.

We work with lymphedema treatment programs throughout the United States. We understand that therapists and patients are having a difficult time locating local providers for all the products we provide. Patients and therapists have stressed many concerns including: lymphedema products that do not fit properly (i.e. fitters at local providers do not have enough experience), misinformed about coverage issues (i.e. told there is no coverage when there is), provider is out-of-network* with the insurance (i.e. greatly reduced insurance benefits), charged up front for products when they have insurance coverage (i.e. patient should be charged any coinsurance/deductible after the claim pays), provided standard size products when custom-made products are necessary and most importantly, returns and alterations are not being handled in a fashionable manner.

We have national contracts with insurance companies, including:

National Plans

Illinois Plans

Anthem (CA, CO, CT, GA, IN, KY, ME, MO, NH, NV, OH, VA, WI and EMPIRE NY)

BlueCross BlueShield
Federal Employee Program.

BlueCross BlueShield Illinois

BlueCross BlueShield Illinois

VA Illinois

Cigna

Humana

Tricare

MultiPlan

Self-Funded
Hospital Healthcare Networks

Self-Funded Hospital Healthcare Networks

We are also contracted with many other insurance companies and insurance networks, giving patients access to coverage for their lymphedema medical products.

Our comprehensive services include:

- Consultation with Certified Fitters
- Verification of Benefits
- Prepare & Obtain Prescriptions from Referring Physicians
- Obtain Insurance Authorizations
- Order Medical Products
- Handle All Returns, Alterations, & Replacements
- File Claims to the Insurance

We understand the fears and concerns patients encounter prior, during and after treatment for lymphedema. We provide educational material for the treatment and management of venous and lymphatic insufficiencies. We are here to answer questions about lymphedema medical products that are clinically efficacious for patients on a case by case basis.

Please feel free to call for assistance to walk you through your first referral. If we at Luna Medical can be of any assistance, please call toll free at 1-800-380-4339 or email us at info@lunamedical.com.

Solutions for Home Health Agencies

Our mission is to improve health outcomes and affordability of care for people living with chronic conditions.

We are focused on delivering the products and services that matter when caring for patients in the home. Byram Healthcare's Home Health Program provides products and specialized programs that control cost, while improving outcomes and increasing patient and staff satisfaction.

With our extensive insurance portfolio, we are uniquely positioned to provide medical supplies for the traditional Medicare PDGM and managed care patient on service with your agency.

Beyond a broad product selection, we also provide clinical tools and educational support which you can find on our [Wound](#), [Ostomy](#), [Urology](#), [Incontinence](#), and [Diabetes](#) therapies.

The Byram Difference - Convenience, Affordability and Choice™

Contact Us

The specialized team within our Home Health Customer Service Center of Excellence provides flexible ordering options and can be reached at 1-800-248-4546

Refer a Patient

Our Wound, Ostomy, Urology and Incontinence Care Careline is staffed by WOCN nurses.

Extending Care from Hospital to Home with Byram's Home Health Program

A Partner of Choice for Your Patients at Home

As experts in post-acute medical supply management, Byram Healthcare offers the home health agency a better clinical and financial experience for Medicare and non-Medicare home health and hospice patients. We offer easy access to critical medical supplies for patients receiving care in the home.

- Continuity throughout post-acute care settings
- Reduce supply leakage at hospital discharge
- Access to Chronic Care at Home™ Programs

Byram Healthcare and Apria are a part of the Owens & Minor Patient Direct Division

Hospital/IDN

Home Health

Chronic Care at Home

Byram Healthcare is the leading provider of medical supplies for patients with chronic diseases nationwide. We have a comprehensive product line which includes all major brands in Diabetes, Ostomy, Wound Care, Urology, Incontinence, and Enteral products. Apria Healthcare LLC (Apria) provides home respiratory services and medical equipment including oxygen therapy, noninvasive ventilation, sleep apnea devices, negative pressure wound therapy, and home medical equipment.

Home Health Center of Excellence

A Dedicated Customer Service Team for Home Health Agencies

- One specialized team for your agency and clinicians
- Supply management expertise for Medicare PDGM and other bundled payors
- Insurance Billing Expertise
- Seamless Transitions of Care
- Various ordering options, including E-ordering solutions & EMR Integration Options

Regardless of how Byram obtains an order from a home health agency, our dedicated Home Health Center of Excellence team offers exceptional service and partnership

Medical Supply Management for Your Agency and Patients Under a Medicare PDGM Episode

The True Cost of Medical Supplies

By prioritizing clinician and patient satisfaction and outcomes, Byram's Home Health Program incorporates key components that lead to a streamlined and efficient service, ultimately reducing the indirect cost of a medical supply program.

Byram's Impact on Indirect Hidden Costs

- Reduce excessive use of closet stock

Byram's Impact on Indirect Hidden Costs

- Eliminate agency paying for supplies billable to insurance
- Avoid wasted skilled nursing visit
- Reduction in over utilization of supplies
- Lower patient co-pays as an in-network provider
- Prevent re-hospitalization
- No charge backs on third party orders

5 ways to improve medical supply management, Reduce Costs, and Improve Outcomes

Learn how Byram's Home Health Program can benefit your agency clinically, financially, and operationally, by reading this publication by the [Remington Report](#).

[DOWNLOAD THE REPORT!](#)

Cost Containment Programs

We offer expertise on controlling costs, while ensuring the products offered support positive clinical outcomes, both critical to episode management under PDGM. Our program reduces inventory costs, promotes nursing efficiencies and decreases operating expenses. Tap/Hover over each section for more information.

Formulary Management	Supply Utilization Management	Clinician Replenishment Program
Proactive Management drives accountability and compliance	Control over supply usage, can yield up to 10-15% savings per month	Manage on-hand supplies to reduce the management of a supply closet

Insurance Capabilities that Support Home Health Patients

Your agency could stop paying for medical supplies that are billable to patients' insurance. With our direct insurance contracts, Byram provides in-network access to 85% of U.S. covered lives. We remove the complexities associated with medical supply coverage for your non-Medicare patients and improve the agency's bottom line.

The check marks below indicate medical supplies that may be billed separately by Byram to the patients insurance while they are on-service with a home health agency.*

	Medicaid	Private Insurance	Managed Medicare	Managed Medicaid
Wound Dressings	✓	✓	✓	✓

Urology	✓	✓	✓	✓
Ostomy	✓	✓	✓	✓

*Coverage is determined by the plan and Byram follows the plan guidelines for dispensing supplies.

Caring Touch at Home™ Ostomy Transitions Program

Support for patients after discharge is reassuring, and provides financial savings to the agency as Byram bills their insurance, including Medicare B, upon discharge

- Seamless transition upon discharge
- Patient Engagement
- Clinical support and education
- Access to a breadth of ostomy products
- Patient insurance billing experts

Learn Why Byram Healthcare is the Nationally Preferred Provider for Home Health Agencies

Provider of Choice for Home Health & Hospice Agencies

Byram Healthcare

Byram makes it easy to get home health and hospice supplies

- In-network provider for over 85% of U.S. covered lives
- Preferred provider with many plans, means lower co-pays
- Specially trained customer service representatives verify and coordinate benefits

At Byram Our Priority is to Ensure all Your Patients' Supply Needs Are Met

[Product description](#) [Ordering information](#)

Therapeutic Breast and Chest Support

Cardinal Health offers a family of therapeutic breast and chest supports that provide post-operative compression after breast and thoracic surgeries. Two styles are available — bra and vest — in a range of sizes. Both styles provide firm but comfortable compression and support, minimize stress on the incision and hold the dressing in place without tape, bindings or splints while allowing ventilation of the surgical site.

- Lightweight cotton/spandex knit fabric provides a smooth, snug and breathable fit that looks natural under clothing while enhancing patient confidence.
- VELCRO™ closures in the front and on the straps quickly adjust for a customized fit and permit easy access for dressing changes and inspection of the surgical site.
- The bra style includes detachable VELCRO™ loops that attach to the bottom band for easy placement of the wound drain bulb(s).
- The vest style includes an elastic back band that stretches for comfort.
- Machine washable.

Cardinal Health PPE Solutions

Quality head-to-toe PPE solutions allow you to have peace of mind to confidently focus on the task at hand.

T.E.D.™ Anti-Embolism Stockings

Clinically-proven pressure pattern

T.E.D.™ anti-embolism stockings are clinically proven to reduce DVT¹ and to promote increased blood flow velocity^{2,3,4} in the legs. T.E.D.™ anti-embolism stockings have also been shown to prevent the damaging effects of venous distension that occurs during surgery.⁵

T.E.D. anti-embolism stockings apply the clinically-proven graduated pressure pattern of 18mmHg at the ankle, 14mmHg at the calf, 8mmHg at the popliteal, 10mmHg at the lower thigh and 8mmHg at the upper thigh.^{1,4} It is important to measure the patient's leg size to assure that the appropriate pressure pattern is applied.

Overview »

- A-V Impulse™ Foot Compression System ▾
- PlasmaFlow™ Portable Compression
- Resources for preventing VTE ▾

T.E.D.™ for acute care

T.E.D.™ anti-embolism stockings have been clinically proven to reduce the risk of developing deep vein thrombosis (DVT) in physician reviewed, published studies on hospitalized patients and to promote increased blood flow velocity in the legs.

T.E.D.™ for continuing care

T.E.D.™ stockings are clinically proven to reduce the risk of DVT, which can extend up to six weeks after hospitalization.

Features

- McKesson Hinged Knee Brace
- Equipped with bilateral hinges that provide added support and stability
- Designed for mild MCL and/or LCL sprains, mild arthritis, post arthroscopic meniscectomy, and mild global instabilities
- Ideal for everyday activities and can be used in saltwater or fresh water
- Removable hinges fully encased in inner pockets for safe use in contact sports
- Dual-axis, polycentric hinges on both sides of the knee to provide greater medial/lateral support than a traditional knee sleeve
- Posterior strap adjustment allows for one-time adjustment and proper positioning of hinges
- Wraparound design and strap tabs provide easier application and adjustable fit
- Delivers compression to the soft tissue of the knee for comfort and support
- Features compressive neoprene support essential for recovery and stability
- Open patella allows post-surgical use and adds breathability for patient comfort
- Open-popliteal style provides added breathability and helps eliminate bunching when knee is bent
- Fits right or left knee
- Hand wash with cold water and mild soap
- Individually packaged for retail use
- Not Made with Natural Rubber Latex
- Packaged: 1 Each
- WARNING: Neoprene supports should not be worn by individuals with known susceptibility to dermatitis or allergies to neoprene by-products.

Clinical education

FocusRN is Stryker's clinical education program, accessible through an online portal. This resource provides clinical education and tools to help you fulfill your education requirements and advance your knowledge to improve patient care.

Joint Replacement - Mako in the OR

A collection of educational content designed for OR staff using the Mako System. Watch videos and interact with modules to learn OR layouts, roles and responsibilities, Mako instrumentation, Mako System set-up and more for all three applications.

Surgical Technologies

This site provides nurses and operating room staff with meaningful learning experiences that ultimately keep our caregivers safe and improve patient outcomes.

Emergency Care

In-hospital care

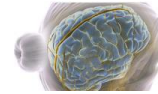

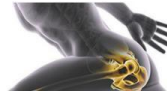

On-demand webinars, online and in-person training and additional resources created specifically for hospital clinicians.

Pre-hospital care

On-demand webinars, online and in-person training and additional resources created specifically for EMS and first responders.

Surgeons, residents and fellows

ENT

This site provides surgeons, residents, and fellows with training opportunities to further their knowledge of Stryker's ENT product portfolio and procedures.

Interventional Spine

Joint Replacement

This site provides Joint Replacement surgeons, residents, and fellows with training opportunities to further their knowledge of Stryker's hip and knee product portfolio.

Neurosurgical

This site provides residents, fellows and practicing physicians with best in-class educational courses to advance surgical techniques in order to learn the safe and effective use of Neurosurgical devices.

Neurovascular

Stroke Knowledge Initiatives for Learning and Leadership (SKILL) is a series of innovative, tailored ischemic and hemorrhagic stroke education programs that support our customers' need to address patient management challenges with the ultimate shared goal of improving lives. SKILL features an e-lab, NeuroElite fellows program, training center initiatives and global centers of excellence.

Spine

Surgical Technologies

This site provides surgeons with educational programs incorporating the latest and most relevant clinical insights and procedural innovation.

Surgical Visualization

This site provides multidisciplinary healthcare professionals a peer-to-peer learning experience focused on the advancement of Fluorescence Guided Surgery. Content and surgical experience utilizing Stryker's advanced visualization technology is shared by global thought-leaders.

Trauma & Extremities

This site provides Trauma, Upper Extremities and Foot & Ankle surgeons, residents, and fellows with training opportunities to further their knowledge of Stryker's Trauma & Extremities product portfolio.

General public

The happiness impact

Stryker's first externally available leadership course, The Happiness Impact, is a 60-90 minute course focusing on changing mindsets, boosting happiness and engagement at work and at home.

Community and workplace

On-demand webinars, online training and additional resources around CPR and AED preparedness.

Training Calendar

Stryker's new Education and training calendar is now available. Learn about upcoming courses and events.

DETAILS

Strassburg Sock

- For those who are on their feet for long periods of time, who are common runners, or those suffering from plantar fasciitis and Achilles tendontitis
- Ultra-stretch on the elastic band on the foot and lower leg

- Helps address all the corrective issues on the feet and lower legs
- The Strassburg sock addresses problems cold therapy, anti-inflammatories, and steroid shots can only ease
- Holds the foot in a dorsiflexed position (pointed upward) during sleep or rest
- Allows the Achilles tendon and plantar fascia to heal in a slightly stretched position
- Reduces the likelihood of reinjury when activity is resumed
- Helps to increase flexibility and encourage healing

Sizing:

Measure circumference under calf

- Regular 12" to 16"
- Large 16" to 21"

- **Bacitracin ointment:** Suitable for those allergic to neomycin or polymyxin B.
- **Silver sulfadiazine cream:** Effective against a broader range of bacteria, but may stain clothes.

The Final Word:

Triple antibiotic ointment can be a valuable addition to your first-aid kit, but it's crucial to **use it wisely**. Remember, it's not a replacement for proper wound care and seeking medical attention when needed. By understanding its uses and limitations, you can ensure this ointment serves its purpose effectively.

First Aid Smarts: Using Triple Antibiotic Ointment Safely and Effectively

Posted by Kevin Lambing - Home Care Consultant on Feb 28th 2024

First Aid Smarts: Using Triple Antibiotic Ointment Safely and Effectively

The largest organ in the human body is our skin. It covers your entire body as a barrier between the inside and outside world.

First Aid Smarts: Using Triple Antibiotic Ointment Safely and Effectively

The largest organ in the human body is our skin. It covers your entire body as a barrier between the inside and outside world.

Working in senior care, I have seen some really bad skin conditions that can lead to more serious health issues for the patient.

Using proper topicals can help keep minor skin issues from turning into major issues. That is why I like a good triple antibiotic ointment.

Triple antibiotic ointment is a common household item and topical medication to prevent infections in minor skin wounds like cuts, scrapes, and burns. It's readily available over-the-counter and generally considered safe for most people. However, there's more to this ointment than meets the eye.

What's in the Mix?

As the name suggests, triple antibiotic ointment combines three antibiotics:

- **Bacitracin:** This antibiotic fights against a broad range of gram-positive bacteria, commonly found on the skin.
- **Neomycin:** Similar to bacitracin, neomycin targets a wide spectrum of gram-positive and some gram-negative bacteria.
- **Polymyxin B:** This one tackles gram-negative bacteria, another type commonly linked to infections.

By combining these three antibiotics, the ointment offers broader protection against potential bacterial infections in minor wounds.

When to Use and When to Not Use

While triple antibiotic ointment is a handy first-aid item, it's not a cure-all. Here's when it's appropriate to use it.

- **Minor cuts, scrapes, and burns:** Apply a thin layer to clean and dry wounds to help prevent infection.

- **Prevention or infection after minor procedures:** Like shaving nicks or minor insect bites.

However, there are instances where it's **not** recommended:

- **Deep wounds, puncture wounds, or animal bites:** These require medical attention and may need stronger antibiotics.
- **Large areas of skin:** Using it on extensive areas can increase the risk of side effects.
- **Allergy to any ingredients:** Check the label for ingredients and consult a doctor if unsure.
- **Signs of worsening infection:** If the redness, swelling, or pain worsens, seek medical help.

Remember:

- **Clean the wound** thoroughly with soap and water before applying the ointment.
- **Follow the instructions** on the label for proper application and dosage.
- **Don't overuse** the ointment, as it can contribute to antibiotic resistance.
- **Consult a doctor** if the wound worsens or doesn't improve after a few days of use.

Alternatives to Consider:

While triple antibiotic ointment is a popular choice, other options exist, including:

- **Bacitracin ointment:** Suitable for those allergic to neomycin or polymyxin B.
- **Silver sulfadiazine cream:** Effective against a broader range of bacteria, but may stain clothes.

The Final Word:

Triple antibiotic ointment can be a valuable addition to your first-aid kit, but it's crucial to **use it wisely**. Remember, it's not a replacement for proper wound care and seeking medical attention when needed. By understanding its uses and limitations, you can ensure the ointment serves its purpose effectively.

United States Patent and Trademark Office (USPTO)

USPTO OFFICIAL NOTICE

Office Action (Official Letter) has issued
on July 3, 2024 for
U.S. Trademark Application Serial No. 97397105

A USPTO examining attorney has reviewed your trademark application and issued an Office action. You must respond to this Office action to avoid your application abandoning. Follow the steps below.

- (1) **[Read the Office action](#)**. This email is NOT the Office action.
- (2) **Respond to the Office action by the deadline** using the Trademark Electronic Application System (TEAS) or the Electronic System for Trademark Trials and Appeals (ESTTA), as appropriate. Your response and/or appeal must be received by the USPTO on or before 11:59 p.m. **Eastern Time** of the last day of the response deadline. Otherwise, your application will be **[abandoned](#)**. See the Office action itself regarding how to respond.
- (3) **Direct general questions** about using USPTO electronic forms, the USPTO [website](#), the application process, the status of your application, and whether there are outstanding deadlines to the [Trademark Assistance Center \(TAC\)](#).

After reading the Office action, address any question(s) regarding the specific content to the USPTO examining attorney identified in the Office action.

GENERAL GUIDANCE

- **[Check the status of your application periodically](#)** in the [Trademark Status & Document Retrieval \(TSDR\)](#) database to avoid missing critical deadlines.
- **[Update your correspondence email address](#)** to ensure you receive important USPTO notices about your application.
- **[Beware of trademark-related scams](#)**. Protect yourself from people and companies that may try to take financial advantage of you. Private companies may call you and pretend to be the USPTO or may send you communications that resemble official USPTO documents to trick you. We will never request your credit card number or social security number over the phone. Verify the correspondence originated from us by using your serial number in our database, [TSDR](#), to confirm that it appears under the “Documents” tab, or contact the [Trademark Assistance Center](#).

- **[Hiring a U.S.-licensed attorney.](#)** If you do not have an attorney and are not required to have one under the trademark rules, we encourage you to hire a U.S.-licensed attorney specializing in trademark law to help guide you through the registration process. The USPTO examining attorney is not your attorney and cannot give you legal advice, but rather works for and represents the USPTO in trademark matters.
