Description

NEWS:
Family Tracker was used to locate a missing child - see news report on: http://www.reuters.com/article/net-us-app-missing-idUSBRE8460GZ20120507
SUPPORT NOTICE*
We do help everyone who contacts us via our iphone@logsat.com email address, but unfortunately most users give bad ratings without ever contacting us for support. Please do contact us if you have any issues, we're always there to help!
****
Family Tracker allows you to track your wife, husband, children and fiancée. You can now find out where they are, at anytime, as long as they have their phones with them. Family Tracker is available for other platforms as well, so you can track (and be tracked by) other devices as well - check our website for more details.
Please note that starting with the new iOS4 and supported hardware, Family Tracker runs in the background at all times, and, unlike previous versions of Family Tracker, user intervention is **NOT** needed for you to track them. Family Tracker runs at all times, continuously updating the GPS location of the device. Even if the iPhone is rebooted, Family Tracker will automatically resume tracking and updating its position!
So how does this work?
Simple. Install Family Tracker on the iPhone/iPad you want to track. From then on, you can use either a web browser or via the Family Tracker app itself installed on your own iPhone/iPad to locate your family member.
If the device you wish to track does not support multitasking (for example, older iPhones 3G, iPads), you can still use Family Tracker to locate the family member. Using the web or your own iPhone, you will be able to "ping" the other iPhone. This is done by sending the other iPhone a (free) "Apple Push Notification" which will cause an alert to sound on your family member's iPhone, even if the phone in is stand-by, just as would happen if the iPhone receives an SMS. As soon as this alert is acknowledged, their GPS position will be recorded, and their location will be updated on a map. If you are using an iPhone yourself to track them, you will be sent a Push Notification to inform you that the family member has accepted your "ping". These notifications will be automatically re-
