Why create a Tactical InterNet?

Tactical Systems
Systems & Information Technology Group

- U.S. Army experimentation has shown that placing the "right" *information technology* into *every* combat platform can im the synchronization of forces and improve battlefield decisio making, thereby increasing the lethality and effectiveness of combat team
  - More than double the force's effectiveness, at a small marginal
  - Where am I? Where are my buddies? Where is the enemy?
    - » Today's world presents many situations where this would make a c

- Provides the technical basis for the effective integration of planning, operations, and logistics
  - Servicing tomorrow's digital applications: situational awareness, planning / re-planning, execution monitoring and management, operational status reporting, command-and-control, supply status reporting, sensor data integration (from platform sensors, from off-platform sensors), training, layered applications (air defense, fire support, etc.)
  - Provides a "shared language" and shared communications pipe to the entire combat team

Why create a Tactical InterNet?
(continued)

PM AB...

- ■ To provide connectivity superior to that provided by current sy
  - ● "Talk" directly with elements that are not in your local network
    - » Anywhere to anywhere, versus line-of-sight, or just in your local com
  - ● Share information effectively and quickly across unit and organi:
    boundaries
    - » Within hierarchies
    - » Across common functions
  - ● Better service
    - » Quality of service
    - » Speed of service
    - » Message completion rate
    - » etc.
    - » Via dynamic selection of paths, better protocols, etc.
  - ● Better use of bandwidth
    - » For example: using multicast for shared information

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
