Apple's Invalidation Contentions Under Patent Rule 3-3
 Exhibit B-14

INVALIDITY OF U.S. PATENT NO. 9,408,055 (the "055 patent")

by

FORCE XXI BATTLE COMMAND, BRIGADE AND BELOW ("FBCB2")

As explained in the cover pleading to Apple's invalidity contentions, Plaintiff has not and cannot demonstrate that the '055 patent is entitled to a priority date earlier than October 31, 2014, the effective filing date of Appl. No. 14/027,410. On information and belief, the FBCB2 system (including at least FBCB2 software versions 3.2, 3.3, and 3.4 and hardware made by Litton and Paravant) was in public use and/or available to the public no later than March 21, 2003, and was made available by the U.S. Army. The FBCB2 system, as set forth in this chart, anticipates the asserted claims of the '055 patent at least under pre-AIA 35 U.S.C. §§ 102(a) and (g)(2) (and AIA 35 U.S.C. §§ 102(a)(1)), and/or renders the asserted claims obvious under 35 U.S.C. § 103 either alone, in combination with the general knowledge of one of ordinary skill in the art, and/or in combination with references identified in Apple's invalidity contentions, including as set forth in this chart. On information and belief, the FBCB2 system is described at least in the following documents and other materials cited in this chart:

Apple reserves the right to further supplement its contentions and evidence concerning the FBCB2 system as discovery proceeds, including by submission of additional materials or other evidence describing the operation of the system.
