#### Exhibit B05

#### United States Patent No. 7,630,724 ("Beyer")

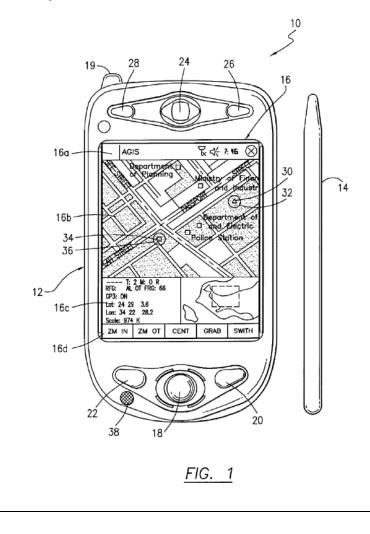

United States Patent No. 7,630,724, issued December 8, 2009 ("Beyer") discloses and/or renders obvious Claims 1-84 of U.S. Patent No. 9,467,838 alone and/or in combination with other references, as set forth in the chart below. Defendants incorporates in this chart all applicable qualifications, clarifications, and other statements made in Defendant's Invalidity Contentions. This invalidity claim chart is based on Defendant's present understanding of Claims 1-84, and AGIS's apparent construction of the claims, as set forth in AGIS's Infringement Contentions. Defendant is not adopting AGIS's apparent constructions, nor is Defendant admitting the accuracy of any particular construction. To the extent the Court finds that this reference does not expressly disclose certain limitations in the asserted claims, such limitations would have been inherent and/or obvious. By mapping claim language to this reference, Defendant does not imply or admit that the claim language satisfies 35 U.S.C. § 112. To the extent any cell lacks citations to the charted reference, this should not be taken as an admission that the reference does not disclose the corresponding limitation but rather indicates that Defendant does not presently intend to rely on the reference as disclosing the limitation based on Defendant's present understanding of the claim limitation.

U.S. Patent No. 9,467,838	Beyer
