Investigation No. 337-TA-_____

DECLARATION OF MALCOLM K. BEYER, JR. IN SUPPORT OF COMPLAINT

I, Malcolm K. Beyer, Jr., do hereby declare as follows:

1. I am the Chief Executive Officer of Advanced Ground Information Systems, Inc. (“AGIS, Inc.”) and AGIS Software Development LLC (“AGIS Software”).

2. I submit this declaration in support of the Complaint under Section 337 of the Tariff Act of 1930 filed by AGIS, Inc. and AGIS Software. The facts stated in this declaration have been assembled by knowledgeable and authorized AGIS, Inc. employees and officers, with my input and at my direction, and I am informed and believe that the facts stated herein are true.

I. AGIS, INC.

3. On June 30, 2004, I founded AGIS, Inc., a Florida corporation. Since then, AGIS, Inc. has maintained business locations in Jupiter, Florida; Austin, Texas; and Kansas City, Kansas. AGIS, Inc. employs approximately seventeen employees and contractors. AGIS, Inc.’s corporate headquarters is located at 92 Lighthouse Drive, Jupiter, Florida 33469.

4. AGIS, Inc. is a lead innovator, designer, developer, and distributor of location-sharing and messaging software products. AGIS, Inc. has invested significant labor and financial resources in the United States in connection with the research, design, development, engineering,

and testing of its location-sharing and message software products, which are protected by the Asserted Patents. AGIS, Inc.'s management, design, and engineering team has extensive experience in the commercial location-sharing and messaging software industry. AGIS, Inc. products have been used throughout the United States, including by U.S. Government entities.

5. In 2013, AGIS, Inc. began a corporate restructuring plan for business growth purposes. By 2017, AGIS, Inc.'s board of directors approved the restructuring plan, which resulted in the formation of a parent corporation, AGIS Holdings, Inc. ("AGIS Holdings"), a Florida corporation. AGIS Holdings consists of two subsidiaries: AGIS, Inc. and AGIS Software. Each is a separate corporate entity.

6. AGIS Software obtained the intellectual property of AGIS, Inc. and holds all rights, title, and interest in and to the Asserted AGIS Software Patents. AGIS, Inc. is authorized and licensed to use the Asserted Patents.

7. As a result of AGIS, Inc.'s investments, it has developed certain valuable know-how relating to the design, development, engineering, assembly, and testing of location-sharing software products and devices, and to the distribution and sale of such location-sharing software products and devices.

8. AGIS, Inc. has no foreign facilities or investments. All of AGIS, Inc.'s activities and investments take place in the United States.

II. AGIS, Inc.'s Domestic Industry Product

9. I am informed that this Complaint involves United States Patent Nos. 8,213,970; 9,467,838; 9,445,251; 9,749,829; and 9,820,123 (collectively, the "Asserted Patents"). I am further informed that the AGIS, Inc. LifeRing Products have been identified as Domestic Industry Products in this Complaint because they practice one or more of the claims of each of the Asserted

Patents (“LifeRing DI Products”). AGIS, Inc.’s LifeRing DI Products and related services are the sole products offered by AGIS, Inc. All of the activities and investments described below are directly related to the LifeRing DI Products.

10. Over the years, AGIS, Inc. has invested—and continues to invest—[REDACTED] dollars in the United States in labor, capital, plant, and equipment relating to the Domestic Industry Products. AGIS, Inc.’s [REDACTED] dollars in labor, capital, plant, and equipment have all been directed to research and development, testing, and product engineering related to the LifeRing DI Products.

11. The LifeRing DI Products provide cutting edge technology to various customers, including but not limited to military, federal law enforcement, and first responders through, for example, Common Operational Picture (COP).

12. The LifeRing DI Products provide a life-preserving line of constant communication throughout the command structure and interfaces with most military command and control systems. LifeRing DI Products can use many military handhelds, private and public cellular networks, and satellite communications either individually or in various combinations for encrypted communication.

13. The LifeRing DI Products are utilized by both U.S. and Foreign Agencies. Government Agencies use the LifeRing DI Products to provide COP and the ability to collaborate, command, Push To Talk communication (PTT), and exchange video. LifeRing DI Products can be used to interface with GPS tracking tags and to record and replay data collected during investigations. AGIS is continually updating the LifeRing DI Products to enable it to interface with other systems, special equipment, and databases.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
