means for obtaining **location and status data associated with the recipient**

means for presenting a recipient symbol on the geographical map correspon the recipient PDA/cell phone,

wherein the forced message alert software application program on the recip transmitting the acknowledgment of receipt to said sender PDA/cell pho message alert from the sender PDA/cell phone;

means for controlling of the recipient PDA/cell phone upon transmitting said in cases where the force message alert is a text message, the text messag display of the recipient PDA/cell phone or causes, in cases where the for voice message being periodically repeated by the speakers of the recipient

10. A method of receiving, acknowledging and responding to a forced message alert from a PDA/cell phone, wherein the receipt, acknowledgment, and response to said forced message alert is handled by a software application program, said method comprising the steps of:

- receiving an electronically transmitted electronic message;
- identifying said electronic message as a forced message alert, wherein said forced message alert includes a forced message alert application software packet, which triggers the activation of an application program within the recipient PDA/cell phone;
- transmitting an automatic acknowledgment of receipt to the sender PDA/cell phone, which causes an application program to take control of the recipient PDA/cell phone and show the response list on the display recipient PDA/cell phone or to repeat audibly the content of the response list on the display recipient PDA/cell phone and show the required response list on the display recipient PDA/cell phone;
- transmitting a selected required response from the response list in order to allow the message to be displayed on the recipient's cell phone display, whether said selected response is a chosen option from the response list; causing the message alert software to release control of the recipient PDA/cell phone and stop showing the response list on the display recipient PDA/cell phone and or stop repeating the content of the response list on the display recipient PDA/cell phone;
- displaying the response received from the PDA cell phone that transmitted the response on the display of the recipient PDA/cell phone; and
- providing a list of the recipient PDA/cell phones have automatically acknowledged receipt of the forced alert message; and
- displaying a geographical map with georeferenced entities on the display of the sender PDA/cell phone; and
- obtaining location and **status data** associated with the recipient PDA/cellphone; and
- presenting a recipient symbol on the geographical map corresponding to a correct geographic location of the recipient PDA/cell phone.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
