applications, services, devices, and servers, made, used, sold, offered for sale, imported into the United States, and otherwise provided after September 21, 2004. AGIS reserves the right to amend this list of discovery progresses.

Samsung directly infringes each of the Asserted Claims by using, importing, testing, selling, offering for sale, and/or exporting from the United States the Accused Products in violation of 35 U.S.C. § 271(a).

Samsung indirectly infringes the Asserted Claims in violation of 35 U.S.C. § 271(b) by inducing third parties and/or customers, to directly infringe through its operation and use of the Accused Products. Samsung has knowingly induced this direct infringement by, *inter alia*, (i) selling, offering to sell, importing, exporting, or otherwise providing the Accused Products to third parties with the intent that the Accused Products will be operated and used in a manner that infringes the Asserted Claims; and (ii) marketing and advertising the Accused Products. Samsung's marketing and promotional materials for the Accused Products are found, for example, on Samsung's website, and in App stores of operating systems for which the Accused Products are made available. For example, Samsung's website offers customers downloadable User Manuals for the Accused Products to, among other things, use the accused services in the Accused Products. Samsung's website also offers instruction to, among other things, use the Accused Products to share location information with third parties. On information and belief, Samsung knows that its actions will result in infringement of the Asserted Claims, or that there is a high probability that its actions will result in infringement of the Asserted Claims but has taken deliberate steps to avoid learning these facts.

Samsung also contributorily infringes each of the Asserted Claims in violation of 35 U.S.C. § 271(c) by offering for sale, and otherwise providing the Accused Products which, when used, directly infringe the Asserted Claims. The Accused Products constitute a material part of the Asserted Claims.

On information and belief, the charted versions of the Accused Products are representative of all variants of the Accused Products, including but not limited to all variants of the Accused Products made, sold, offered for sale, or used on Android, iOS, Symbian, Blackberry, and Windows Mobile operating systems.

AGIS does not concede that any claims of the '829 Patent that are not listed below are not infringed by the Accused Products. Moreover, the citations to certain documents and other information below are intended to be exemplary and do not foreclose AGIS from citing or relying on additional documents, information, source code, and/or testimony. These contentions are preliminary in nature, and an analysis of Samsung's products, internal documentation, source code, and testimony from relevant witnesses may more fully and accurately describe the infringing features of its Accused Products. AGIS reserves the right to supplement, correct, modify, and/or amend these contentions once such additional information is received.

AGIS. Furthermore, AGIS reserves the right to supplement, correct, modify, and/or amend these contentions as progresses; in view of the Court's claim construction order(s); in view of any positions taken by Samsung including positions on claim construction,¹ invalidity, and/or non-infringement; and in connection with the preparation of reports.

The contents of every below claim cell on which another claim cell depends are expressly incorporated into the dependent cell, as if set forth in their entirety therein.

¹ The construction of claim terms herein is consistent with the constructions in *AGIS Software Dev. LLC v. Huawei*, No. 2:17-cv-00513-JRG, Dkt. No. 205 (Lead Case) (E.D. Tex.
