Attorney Docket No. 41197.278581

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A non-transitory computer storage medium storing computer-useable instructions that, when used by ~~one or more~~ a first computing device[[s]], cause the ~~one or more~~ first computing device[[s]] to perform operations ~~for remotely presenting various types of content, the operations~~ comprising:

obtaining a synchronization code associated with the first computing device, wherein the associated synchronization code is stored on a remote server device;

providing the synchronization code to a second computing device in communication with the remote server device, wherein the provided synchronization code causes the remote server device to store an association between the first computing device and the second computing device;

~~initializing a connection with a remote server device to facilitate an association with a remote computing device;~~

receiving, from the remote server device, a first message that includes at least one command in a first format, ~~wherein~~ the first message [[is]]being received based at least in part on the stored association and on a second message including at least one command in a second format having been sent from the associated second remote computing device;

~~employing~~ selecting a first media player application from a plurality of media player applications based at least in part on the first format of the first

Attorney Docket No. 41197.278581

message, the first media player application being selected~~operable~~ to [[load]]play a first piece of content referenced in the received first message; and

controlling a presentation of how the selected first media player application
plays the referenced first piece of content~~loaded in the employed first media player~~
~~application~~ based on a first command of the at least one command in the first format having been included in the received first message ~~for recognition by the first media player application.~~

2. (Currently Amended) The non-transitory computer storage medium of claim 1, wherein [[a]]each command of the at least one command in the second format is a universal command.

3. (Original) The non-transitory computer storage medium of claim 2, wherein the first format is different than the second format.

4. (Currently Amended) The non-transitory computer storage medium of claim 1, wherein the second message is sent from the associated second computing device to the remote server device.

5. (Currently Amended) The non-transitory computer storage medium of claim 1, wherein the remote server device is configured to convert the at least one command in the second format ~~is converted~~ into the at least one command in the first format based at least in part on the second message including therein a reference to the first piece of content.

6. (Currently Amended) The non-transitory computer storage medium of claim 1, wherein the remote server device is configured to convert the at least one command in the second format ~~is converted~~ into the at least one command in the first format based at least in part on a reference to the first media player application having been included in the second message.

7. (Currently Amended) The non-transitory computer storage medium of claim 1, wherein the first media player application is ~~employed~~ selected based at least in part on the received first message including therein a reference to the first media player application.

8. (Currently Amended) The non-transitory computer storage medium of claim 1, wherein controlling ~~the presentation~~ how the selected first media player application plays the referenced first piece of content includes an execution of the first command.

9. (Currently Amended) The non-transitory computer storage medium of claim 1, the operations further comprising:

~~obtaining~~ retrieving the first media player application from a remote content provider based on a determination that the first media player application is not already ~~being employed~~ selected.

10. (Currently Amended) The non-transitory computer storage medium of claim 9, wherein ~~the first media player application is obtained from a~~ the remote content provider ~~that corresponds to~~ is associated with the referenced first piece of content.

11. (Currently Amended) The non-transitory computer storage medium of claim 1, the operations further comprising:

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
