About

NXP[®] IN THE UNITED STATES

Built on a 50-year legacy with Motorola and Philips, NXP has design, research, and development, manufacturing and sales operations in the United States.

NXP owns and operates three wafer fabrication facilities in the US, two of which are in Austin with a third facility in Chandler, Arizona. The representative products of these fabs include microcontrollers (MCUs) and microprocessors (MPUs), power management devices, RF transceivers and amplifiers, and sensors.
