(57) **ABSTRACT**

(\* ) Notice: Subject to any disclaimer, the term of this patent is extended or adjusted under 35 U.S.C. 154(b) by 0 days.

A synchronous DRAM (SDRAM) having a posted column access strobe (CAS) latency and a method of controlling CAS latency are provided. In order to control a delay time from the application of a CAS command and a column address to the beginning of memory, reading or writing operations in units of clock cycles, a first method of programming the delay time as a mode register set (MRS) and a second method of detecting the delay time using an internal signal and an external signal, are provided. In the second method, the SDRAM can include a counter for controlling the CAS latency. This counter controls the CAS latency of the SDRAM by generating a signal for controlling the CAS latency according to the number of clock cycles of a clock signal from the generation of a row access command to a column access command in the same memory bank and reading the signal. It is therefore possible to appropriately perform a posted CAS latency operation and a general CAS latency operation by the SDRAM without an additional MRS command according to this SDRAM and the method of controlling the CAS latency.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
