With Quad SLI, Velocity Micro Introduces the World's Fastest Gaming PC

[f Share](#)

Capable of extremely high frame rates and excellent resolution at the same time, the Velocity Micro Raptor Signature Edition Gaming PC provides the world's fastest graphics.

Richmond, VA — March 9, 2006 — Velocity Micro, the premier manufacturer of award winning, ultra performance PCs, introduces today the world's fastest gaming PC. Powered by Quad SLI technology from NVIDIA, the Velocity Micro Raptor Signature Edition is a gaming powerhouse that's establishing a new class for PC gaming. Velocity Micro is the first to market with this new technology: the Raptor Signature Edition is available for sale today at www.velocitymicro.com.

"With NVIDIA Quad SLI, Velocity Micro is able to deliver to gaming fanatics the PC of their dreams," said Randy Copeland, Velocity Micro President and Founder. "As the premier builder of ultra performance gaming computers, we are proud to work with NVIDIA to bring this amazing technology to market."

"Today's launch continues Velocity Micro's tradition of first to market leadership with new technologies," Copeland added. "We're very excited to be the first in the world to offer this elite gaming PC to hard core gaming fans."

NVIDIA Quad SLI is comprised of four NVIDIA GeForce 7900 GPUs and an NVIDIA nForce4 SLI MCP. This technology harnesses the power of 48 gigapixels per second of graphics performance and 6 teraflops of compute power.

The Velocity Micro Raptor Signature Edition features the AMD Athlon 64 FX-60 dual core processor, from AMD's famed FX series for gamers, to power NVIDIA Quad SLI in what is the world's fastest gaming computer.

Gamers can customize and purchase the Raptor Signature Edition today at Velocity Micro's website. The elite gaming computer costs \$5995 in its original configuration.

**Note to Editors: Velocity Micro has available review units featuring NVIDIA Quad SLI. Please contact Velocity Micro for review opportunities.*
