## Velocity Micro announces desktops powered by NVIDIA GeForce GTX 780

Share

**Gaming and Enthusiast configurations start at \$2,249, available today**

Richmond, VA — May 23, 2013 — Velocity Micro®, the premier builder of award winning enthusiast desktops, laptops, peripherals, and Cruz™ tablets announces the immediate availability of custom desktops powered by the NVIDIA® GeForce® GTX 780. With 2,304 total cores and 3GB of GDDR5 memory, this bleeding-edge card offers Velocity Micro customers not only extreme performance, but improved thermals and acoustics and acoustics as well. The GTX 780 will be available on the Edge™ Z55, Raptor™ Z90, Raptor Signature Edition, and Overdrive™ PC BigBlock.GTX starting at \$2,249.

*"Since our first Editors' Choice award in 2002, we've seen PC hardware come a long way. NVIDIA has always led the way in that innovation," said Randy Copeland, President and CEO of Velocity Micro. "After spending a few days testing the GeForce GTX 780, all I can say is WOW – they've done it again. This is seriously fast hardware and a must have for enthusiasts."*

The Kepler™-based GeForce GTX 780 is designed to be fast and powerful, pairing perfectly with the ultra-performance hardware and superior quality of a Velocity Micro desktop. Key selling features and enhancements of this innovative graphics card include:

- 2,304 total cores – 50% more than its predecessor
- 3GB of GDDR5 memory
- NVIDIA GPU Boost 2.0 technology for greater customization and overclocking options
- GeForce Experience™ for one-click driver and settings optimization
- NVIDIA PhysX® and TXAA™ for smooth, sharp graphics
- Improved thermals and acoustics to keep fan noise to a minimum

All Velocity Micro desktops are hand built and supported in the USA. To custom configure an award-winning desktop featuring a GeForce GTX 780 or any other home office, workstation, enthusiast, or gaming desktop, notebook, or All-in-one, visit [VelocityMicro.com](http://VelocityMicro.com).
