Motion gestures

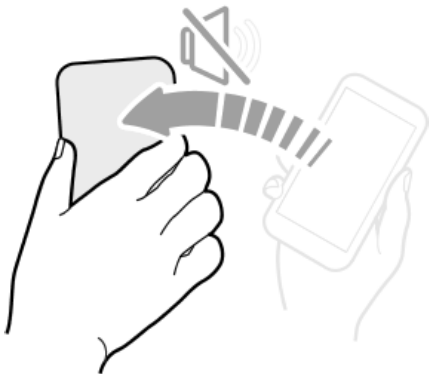
Use motion gestures to mute HTC One M9, lower the ring volume, and more.

Lift phone to auto answer a call

To automatically answer an incoming call, lift the phone and look at the screen first to see who's calling before you hold it to your ear.

You can turn this feature on or off. Go to Settings, tap **Call**, and then select or clear **Auto answer calls**.

Flip to mute



If your phone is facing up when a call comes in, turn the phone over to mute it.
If you go to Settings and then tap **Sound & notification** > **Flip to mute**, you can set your phone to:

Mute once	Mute only once after flipping the phone. While the phone is still facing down, it will ring again when there are other incoming calls.
Mute always	After flipping the phone to mute a call, keep it always muted while it's still facing down when there are other incoming calls.

Pick up to lower volume

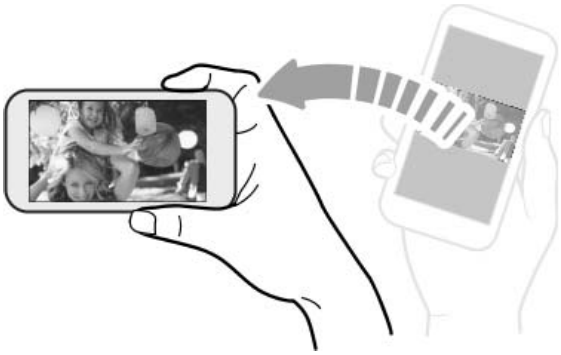
Notification LED

In a business meeting or restaurant, pick HTC One M9 up when a call comes in to lower the ring volume automatically.
You can turn this feature on or off. Go to Settings, tap **Sound & notification**, and then select or clear **Quiet ring on pickup**.

Increase ring volume automatically while phone is in your pocket or bag

Pocket mode makes HTC One M9 recognize when your phone is in your bag or pocket and raise the ring volume so that you can hear it in noisy environments.
You can turn this feature on or off. Go to Settings, tap **Sound & notification**, and then select or clear **Pocket mode**.

Rotate HTC One M9 for a better view



For many screens, you can automatically change the screen orientation from portrait to landscape by turning HTC One M9 sideways.
When entering text, you can turn HTC One M9 sideways to bring up a bigger keyboard.
