Block a Caller

When you block a phone number or a contact, all calls from the phone number or contact will be declined automatically.

1. Tap  > .
2. Swipe right to display the **Call history** tab.
3. Touch and hold the contact or phone number you want to block, and then tap **Block contact** > **OK**.

Note: To remove a caller from your blocked list, on the **Call history** tab, tap  > **Blocked contacts**. Touch and hold a contact, and then tap **Unblock contacts**.

Erase Call History

If the Call history becomes long, you can delete an entry or the entire Call history list.

1. Tap  > .
2. Swipe right to display the **Call history** tab.
3. Do either of the following:
 - To delete a Call history entry, touch and hold the entry, and then tap **Delete from call history**.
 - To erase the entire Call history list, tap  > **Remove call history**. Tap  > **Select all**, and then tap **Delete**.

Voicemail

The following topics describe how to set up and use your phone's voicemail and visual voicemail features.

Voicemail Setup

Follow the instructions below to set up voicemail on your phone. You should set up your voicemail and personal greeting as soon as your phone is activated. Always use a passcode to protect against unauthorized access. Your phone automatically transfers all unanswered calls to your voicemail, even if your phone is in use or turned off.

1. Tap  > .
2. Touch and hold  to dial your voicemail number.
 - ❖ Your phone dials the voicemail access number.
3. Follow the system prompts to:
 - Create your passcode.

- Record your name announcement.
- Record your greeting.

Important: Voicemail Passcode – Sprint strongly recommends that you create a passcode when setting up your voicemail to help protect against unauthorized access. Without a passcode, anyone who has access to your phone is able to access your voicemail messages.

Visual Voicemail Setup

This topic describes the Visual Voicemail feature of your phone's service, as well as the steps required to set up Visual Voicemail on your phone.

About Visual Voicemail

Visual Voicemail gives you a quick and easy way to access your voicemail. Now you can find exactly the message you are looking for without having to listen to every voicemail message first. This feature periodically goes out to your voicemail, and gathers the caller information from all of the current voicemails. It then populates a list with the caller name and number, along with the length of time and priority level of the voicemail message.

Set Up Visual Voicemail

Setting up Visual Voicemail follows many of the same procedures as setting up traditional voicemail. You should set up your voicemail and personal greeting as soon as your phone is activated. Your phone automatically transfers all unanswered calls to your voicemail, even if your phone is in use or turned off.

Note: To set up your traditional voicemail box, see Voicemail Setup.

1. Tap  >  >  **Voicemail**.
 - ❖ You'll see a Welcome to Visual Voicemail screen.
2. Scroll through the introduction screens to view a brief explanation of visual voicemail services.
3. At the end of the welcome screens, you'll come to a Personalize your voicemail prompt.
4. Tap **Personalize now** and follow the system prompts to:
 - Create a passcode (part of standard voicemail).
 - Record your name announcement.
 - Record your greeting.

Important: Voicemail Passcode – Sprint strongly recommends that you create a passcode when setting up your voicemail to help protect against unauthorized access. Without a passcode, anyone who has access to your phone is able to access your voicemail messages.

Review Visual Voicemail

Visual Voicemail lets you easily access and select which messages you want to review.

1. Tap  >  >  **Voicemail**.
2. Tap a message.

3. While reviewing a voicemail message, you can:
 - Tap  to play or  to pause the voicemail.
 - Tap  to turn the speakerphone on or off during playback.
 - Touch and drag the timeline to scrub through the message to different points.
 - Tap  to call the person who left the voicemail message.
 - Tap  to reply with a text, audio, or avatar message.
 - Tap  to delete, share, or archive the current voicemail message or to access settings and help.
 - Tap  to return to your inbox.

Note: Not all options are available for all messages.

Listen to Multiple Voicemail Messages

When you are done listening to a voicemail message you can easily access other voicemail messages without returning to the main voicemail screen.

1. Listen to the current voicemail message.
2. Swipe your finger left or right to display the next or previous message.
 - ❖ The next or previous message will begin playing automatically.

You can navigate through voicemail messages as frequently as you'd like. You can even move to the next or previous message before you're finished listening to the current one.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
